OVERVIEW: OVERALL VIEW OF SUPPLY

Overview Supply Monitoring Summary of Needs Needs Monitoring

The data below represents needs expressed for products from the Gaza Ministry of Health to the Health Cluster and data shared on pipeline supplies and deliveries done by Health Cluster partners. Partners shared data through a reporting form and are asked to do so on a routine basis. This form captures committed pipeline, items that have arrived to Egypt, and items that have been delivered to Gaza.

Operational Challenges

Gaza Partners Functionality

West Bank Partners Functionality

Gaza

- Insecurity in Gaza has forced partners to stop operations and/or preventing them from reaching certain locations especially the north.
- Lack of fuel, medical supplies, water, food, and other essential supplies in Gaza.
- Displacement of partners, their staff and families are also affecting operational capacity.
- Overcrowding in the shelters is complicating health service delivery and increasing risk of communicable disease including outbreak-prone diseases.
- NGO partners are experiencing major issues signing MoU with Egyptian Red Crescent which is impacting their logistics capacity in Egypt.
- Only 19% of funding required to respond has been committed.

West Bank

- Insecurity and targeting of health workers continue to present challenges to emergency responses.
- 29 communities in the West Bank have been left without access to mobile clinic services due to closures.
- Reluctance of injured individuals to seek critical healthcare services and/or engage with rehabilitation program due to fears of arrest, given the extensive reach of IF in the West Bank.
- Only 14% of funding required to respond has been committed.

Preconditions to support partners response activities

Gaza

- Immediate ceasefire and protection of Palestinian population in the Gaza Strip
- Sustained humanitarian access for adequate quantities of supplies (including urgently needed fuel supplies) and people (humanitarian workers, health workers, and patients) to, from and around the Gaza Strip.
- Establish a humanitarian corridor to the north of Wadi Gaza to facilitate the immediate entry of urgently needed humanitarian and health supplies and evacuation of those who want to move south but are unable to due to immobility because of disability or old age.
- Ensure respect and the protection of health care at all times.
- Sufficient road/transportation infrastructure in the Gaza Strip to allow ambulance and logistical access and transportation.
- Mitigation measures to reduce risk to staff, such as armoured vehicles, personal protective equipment (ballistic), and communications equipment.

West Bank

- De-escalation of military violence and protection from settler violence for the Palestinian population living under occupation in the West Bank.
- Respect for medical missions and their protection from violence and attacks.
- End arbitrary restrictions on movement to allow health staff, ambulances, and patients to move throughout the West Bank and into east Jerusalem, where health access is needed.
- End to discriminatory planning policies and settlement expansion resulting in the displacement of Palestinians in the West Bank, particularly those in Area C, east Jerusalem, and area H2 of Hebron, and restricting the development of permanent or semi-permanent health facilities.
