Introduction

The Palestinian Ministry of Health launches its annual report for the year 2009; it is a comprehensive informative report about the health status in Palestine.

Palestinian people are facing continuous threats, which affect the Palestinian life in all its aspects: politics, social, economic, and health.

Also, Palestinian people live in epidemiological transition where health services will not be able to meet the challenges of non-communicable diseases without a detailed knowledge of the prevalence, incidence and severity of these diseases. To achieve this important objective, clinic and hospital information systems should be deployed in the main PHC centers and hospitals.

Palestinian Health Information Center (PHIC) is responsible for the production and dissemination of health related data and information for the Palestinian Health Providers and other relevant agencies, and all interested personnel. PHIC also plays a major role in building a unified health information system in Palestine to reflect the accurate spectrum of the Palestinian health status and indicators. The success in developing and building a unified health system across Palestine requires significant strengthening of existing health information system, introduction of new data capabilities, and more systematic use of data in health planning, policies and management.

It is hoped that this report will be an accurate reference and contribute positively in supporting the National and International organizations in targeting the health needs and allocating their resources for health priorities and welfare of Palestinian people.

There are four main health providers in Palestine; MOH, NGOs, UNRWA, and private for profit. Beside the role of MOH as health provider, MOH is the health authority responsible of governance, supervision, regulation, licensure and control for whole health sector.

No.	List of Annexes	Page
	Population (1- 5)	
1	Distribution of Estimated Population by Age Group and Sex, Palestine, 2009	34
2	Distribution of Estimated Population by Age Group and Sex, West Bank, Palestine, 2009	35
3	Distribution of Estimated Population by Age Group and Sex, Gaza Strip, Palestine, 2009	36
4	Distribution of Estimated Population by Sex and Governorate, Palestine, 2009*	37
5	Reported Natural Increase of Population by Governorate, Palestine, 2009	38
	Live Births (6 – 10)	
6	Distribution of Reported Live Births and Stillbirths by Governorate and Sex, Palestine, 2009	39
7	Distribution of Reported Live Births by Place of Delivery and Governorate, Palestine, 2009	40
8	Percentage of Reported Newborn Weights, by Governorate and Sex, Palestine, 2009	41
9	Relationship Between Number of Children and Number of Parents Years of Study, West Bank, Palestine, 2009	42
10	Relationship Between Number of Children and Parents Career, West Bank, Palestine, 2009	42
	Mortality (11- 29)	
11	Leading causes of Death among Infant by Sex and Region, Palestine, 2009	43
12	Reported Infant Deaths by Governorate, Age and Sex, Palestine, 2009	44
13	Infants Mortality, Palestine, 2000 - 2009	45
14	Rate (1000) of Stillbirth, Palestine, 2000 - 2009	45
15	Leading Causes of Death Among Age Group 0-4 Years by Sex, Palestine, 2009	46
16	Leading Causes of Death Among Age Group 1 - 4 Years by sex, Palestine, 2009	47
17	Leading Causes of Death Among Age Group 5 -19 Years by Sex, Palestine, 2009	48
18	Leading Causes of Death Among Age Group 20 - 59 Years by Sex, Palestine, 2009	49

19	Leading Causes of Death Among Age Group 60 Years and Above by Sex, Palestine, 2009	50
20	Leading Causes of Death among Population by Age Group and Sex, Palestine, 2009	51
21	Leading Causes of Death Among Population by Sex, Palestine, 2009	52
22	Leading Causes of Death Among Population by Age Group and Governorate, Palestine, 2009	53
23	Leading Causes of Death by Age Group, Palestine, 2009	54
24	Mortality by Age Group, Sex and Region, Palestine, 2009	55
25	Cancer Mortality by Site and Sex, Palestine, 2009	56
26	Reported Cancer Deaths, by Governorate and Sex, Palestine, 2009	57
27	Leading Causes of Infectious Diseases Death by Age Group, Sex and Region, Palestine, 2009	58
28	Leading Causes of Cardiovascular Diseases Death by Region and Sex, Palestine, 2009	59
29	Leading Causes of Diabetes Mellitus (E10-E14) Death by Age Group, Sex and Region, Palestine, 2009	60
	Primary Health Care (30- 33)	
30	Distribution of Governmental PHC Center by Level and District, Palestine, 2009	61
31	Distribution of PHC center by Governorate and Provider, Palestine, 2009	62
32	Distribution of Visits to PHC Clinics by Governorate, MOH, Palestine, 2009	63
33	Distribution of Visits to Specialized Clinics in PHC by Governorate and Type of Clinics, MOH, Palestine, 2009	64
	Child Health (34- 36)	
34	Distribution of Reported Morbidity and Disability Cases in MCH Clinics, Children 1-3 years, by Governorate and Type of Morbidity or Disability, West Bank, Palestine, 2009	65
35	Distribution of child growth Indicators, from 1-3 years, by District and Indicator, West Bank, Palestine, 2009	66
36	Immunization Coverage by Type of Vaccine and Governorate, Palestine, 2009	67
	Mother and Child Health (37- 42)	
37	Distribution of MCH Activities in PHC Centers by Governorate and Type of activity, Palestine, 2009	68

38	Distribution of High Risk Pregnancy Activities in MCH Centers, by Governorate and Type of Activity, West Bank, Palestine, 2009	69
39	Distribution of New Acceptors by District and type of Contraceptive in Governmental Family Planning Clinics), Palestine, 2009	70
40	Distribution of Acceptors Visits in Family Planning Clinics by Type of Contraceptive, Region and Type of visit, Palestine, 2009	71
41	Distribution of Acceptors in Family Planning Clinics by type of Contraceptive and Type of Visit, West Bank, Palestine, 2009	71
42	Distribution of Ultrasound reports, by District and Results, West Bank, Palestine, 2009	72
	Mental Health (43- 44)	
43	Distribution of New Cases of Mental Disorder by Governorate and Type of Disease, Palestine, 2009	73
44	Distribution of New Cases of Mental Disorder by Diagnosis & Region, Palestine, 2009	73
	School Health (45-58)	
45	Distribution of School Health Activities in Governmental Schools, 1st Grade by District, Type of Activity, Scholastic year 2008/ 2009, Palestine	74
46	Distribution of Morbidity Among Governmental School Pupils Grade 7, by Disease, Scholastic Year 2008/2009, Gaza Strip, Palestine	74
47	Distribution of Morbidity Among Governmental school pupils Grade 10, by disease, scholastic year 2008/2009, Gaza Strip, Palestine	74
48	Distribution of Morbidity Among 1st Grade Pupils, Governmental Schools, by Disease and Region, Palestine, Scholastic Year 2008/2009	75
49	Distribution of Oral School Health Activities, Grade 1, Governmental School, by Governorate and Type of Activity, Palestine, Scholastic Year 2008/ 2009	75
50	Distribution of Oral & Dental School Health Activities, 1st Grade, Governmental Schools, by governorate & type of activity, Palestine, scholastic year 2008/ 2009	76
51	Distribution of Oral & Dental School Health Activities, Grade 7, Governmental Schools by Governorate and Type of Activity, Palestine, Scholastic Year 2008/ 2009	77
52	Distribution of Oral & Dental School Health Activities, Grade7, Governmental Schools, by Governorate, Type of Activity, Palestine, scholastic year 2008/ 2009	78
53	Distribution of Oral & Dental School Health Activities Grade 10, Governmental Schools, by District and Type of Activity, Palestine, Scholastic Year 2008/ 2009	79
54	Distribution of Oral & Dental School Health Activities, Grade 10 , Governmental Schools, by District and Type of Activity, Palestine, Scholastic Year 2008/ 2009	80
55	Distribution of School Health Immunization Activities by District and Type of Vaccine, Palestine, Scholastic year 2008/ 2009	81
56	Distribution of Condition of Students Eyes by type of activity, Governmental Schools, West Bank, Palestine, Scholastic year 2008/ 2009,	82
57	Distribution of Students Eye Conditions by District & Grade, Scholastic Year 2008/ 2009, West Bank, Palestine	82

58	Distribution of MOH PHC Dental Clinic by District and Type of Activity, Palestine, 2009	83
	Communicable Diseases (59)	
59	Distribution of Reported Communicable Diseases by Disease and Governorate, Palestine, 2009	84
	Sexual Transmitted Diseases (60- 61)	
60	Reported Incidence Rate (new cases) of Sexual Transmitted Diseases by Sex Based on Syndromic Diagnosis, Palestine, 2009 (per 100,000)	87
61	Reported Incidence Rate (new cases) of Sexually Transmitted Diseases by Sex Based on Etiological Diagnosis, Palestine, 2009 (per 100,000)	87
	Non Communicable Diseases (62- 64)	
62	Distribution of New Registered Cases in PHC Diabetic clinics by District, Age Group and Sex, West Bank, Palestine, 2009	88
63	Distribution of Reported Visits to PHC Diabetic Clinics by Type of Treatment, Complications, Age Group and Sex, West Bank, Palestine, 2009	89
64	Distribution of Reported Visits to PHC Diabetic Clinics by Type of Diabetes, Management and Sex, West Bank, Palestine, 2009	90
	Road Accidents (65- 68)	
65	Distribution of Car Accident by Age Group, Sex and District, West Bank, 2009	91
66	Distribution of car Accident by Districts, Age Group and Accident Type, West Bank, Palestine, 2009	92
67	Distribution of Care Accident Injuries by Districts and Level of Injury, West Bank, Palestine, 2009	93
68	Distribution of Care Accident Injuries by Age Groups and Level of Injury, West Bank, Palestine, 2009	93
	Environment (69- 72)	
69	Distribution of Food and Water Samples by District, Palestine, 2009	94
70	Distribution of Existing Licensing Trades and Industries by Governorate, Palestine, 2009	95
71	Distribution of Environmental Investigations for Factory Applications by District and Result, Palestine, 2009	96
72	Distribution of Pesticides for Vector Control by District and Type, Palestine, 2009	97
	Hospitals (73- 91)	
73	Distribution of Hospitals by Specialty, Governorate, Sector and Total Beds, Palestine, 2009	98
74	Distribution of Hospital Beds by Type of Hospitals and Region, Palestine, 2009	99

75	Distribution of Hospitals and Beds by Sector, Palestine, 2009	99
76	Distribution of Hospitals and Total Beds by Governorate and Providers, Palestine, 2009	100
77	Distribution of Hospitals and Total Beds by Governorate and Specialty, Palestine, 2009	100
78	Distribution of Hospital Beds by Provider and Specialty, Palestine, 2009	100
79	Distribution of MOH Hospitals Beds by Department and Region, Palestine, 2009	101
80	MOH Hospitals Utilization by Hospital, Palestine, 2009	102
81	Reported utilization of governmental psychiatric hospital by region, Palestine, 2009	102
82	Visits for Out Patient Clinics (Gov. Hosp.) by Specialty and Region, Palestine, 2009	103
83	Utilization of daily care beds (Gov. Hospitals) by type region, Palestine 2009	104
84	Distribution of Deliveries (Gov. Hospitals)by Mode Region, Palestine, 2009	104
85	Radiology in MOH Hospitals by Type and Region, Palestine, 2009	104
86	Jerusalem Hospitals Utilization, by Hospital, Palestine, 2009	105
87	Rehabilitation Hospitals Utilization, by Hospital, Palestine, 2009	105
88	Non- Governmental Hospitals Utilization by Hospital, West Bank, Palestine, 2009	106
89	Non- Governmental Maternity Hospitals Utilization, by Hospital, West Bank, Palestine, 2009	106
90	Non- Governmental Hospitals Utilization by Hospital, Gaza Strip, Palestine, 2009	107
91	Military Hospitals Utilization by Hospitals, Gaza Strip, Palestine, 2009	107
	Laboratories and Blood Banks (92- 95)	
92	PHC Laboratories Activity, MOH, Palestine, 2009	108
93	Distribution of Lab Tests by Category, Provider and Region, MOH, Palestine, 2009	109
94	Laboratory Activities, MOH Hospitals, Palestine, 2009	110

95	Blood Bank Activities, MOH Hospitals, Palestine, 2009	111
	Human Resources (96-102)	
96	Development of Manpower in MOH During the Years (2006 - 2009), Palestine	112
97	Distribution of PHC Manpower by Health Directorate and Profession, Palestine, 2009	113
98	Distribution of Manpower in MOH Hospitals, by Hospital, Palestine, 2009	114
99	Distribution of MOH Physician by District, Palestine, 2009	115
100	Distribution of MOH Manpower (Administration and Services) by District, Region and Profession, Palestine, 2009	116
101	Distribution of Health Staff by Professionals, Region, Palestine 2009	117
102	Distribution of MOH Human Resources by Professional, Region & Place of Work, Palestine, 2009	118
	Medicine (103-109)	
103	Distribution of Registered Drug Products According to Companies (Local/ Foreign), Palestine, 2009	119
104	Distribution of Registered Veterinary Products According to the Company, Palestine, 2009	120
105	Distribution of Registered Cosmetics Products According to Companies (Local/ Foreign), Palestine, 2009	121
106	No. of Permissions According to: Row Materials, Cosmetics Products, Medicines (C29), Palestine, 2009	122
107	Inspection Visits to Local Pharmaceutical & Cosmetic Manufactures by Type of Visit, Palestine, 2009	123
108	Samples Tested by Drug Quality Central Dept. by Source of Sample and Test Result, Palestine, 2009	124
109	Consumption of Dangerous Drugs in MOH and Private Sector, Palestine, 2009	125
	Radiology (110)	
109	Distribution of Existing Advanced (heavy) Radiological Equipment by Governorate & Private Sector, Palestine, 2009	126
	Disability (111-116)	
111	Distribution of Reported Disability Cases by Governorate in West Bank, Palestine, 29/9/2000 -31/12/2009	127
112	Distribution of Reported Disability Cases by Site of Disability, West Bank, Palestine 29/9/2000 - 31/12/2009	128

113	Distribution of Reported Disability Cases by Type of Ammunition, West Bank, Palestine, 29/9/2000 - 31/12/2009	129
114	Distribution of Reported Disability Cases by Level of Disability, West Bank, Palestine 29/9/2000 - 31/12/2009	130
115	Distribution of Reported Disability Cases by Sex, West Bank, Palestine, 29/9/2000 - 31/12/2009	131

Section 1: Demographic Trends

1.1 Population size and structure:

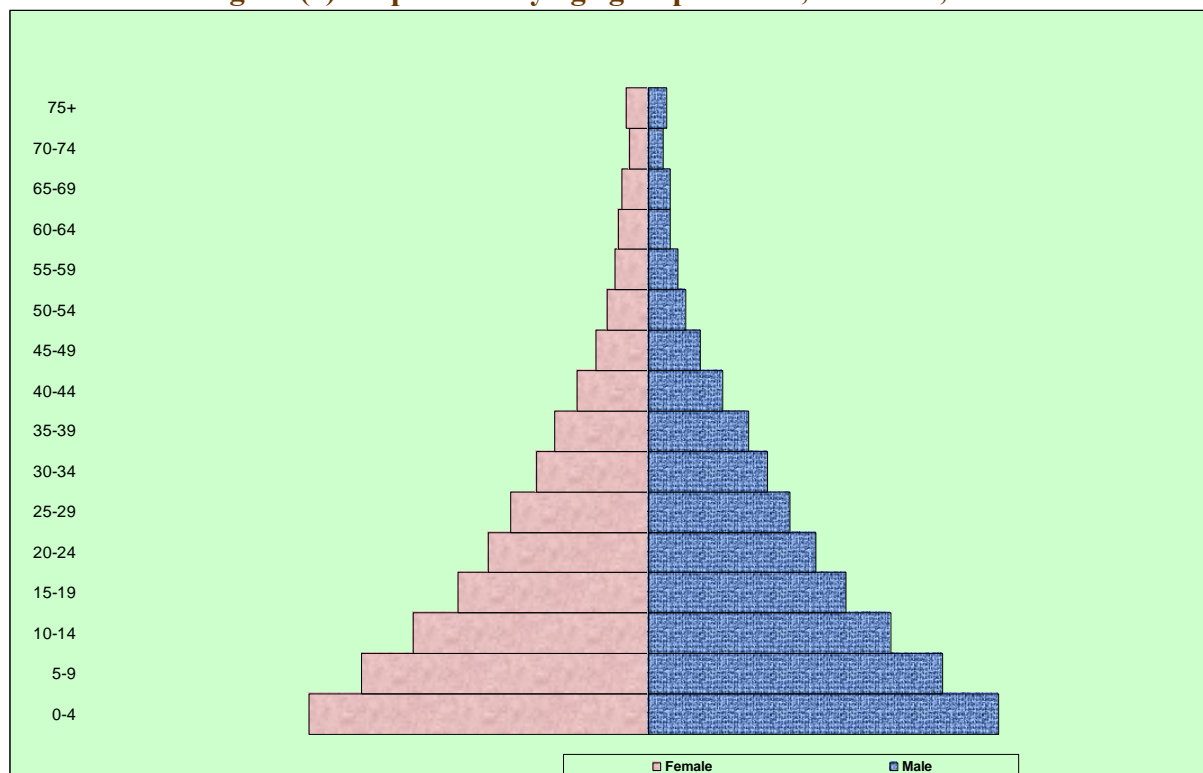

The total number of Palestinian people according to the estimation 2009 was 3,935,249 of which 50.8% are males and 49.2% are females.

1.1.1 Age and sex distribution:

Age distribution of the population has important implications for the health status of the population, due to the different health needs, the differential patterns of health care utilization and the different health status among the various age groups.

The below population pyramid shows age and sex distribution of population 41.9 % is under 15 years old. The age group (0-4) years still constitutes the largest proportion (14.8%), while for the ages over 65 years constitutes only 3.1%.

Figure (1): Population by age group and sex, Palestine, 2009

1.1.2 Dependency:

Dependency ratio is calculated as the number of persons below fifteen and above sixty-five per 100 person's aged 15-64 years. For 2009 the dependency ratio for Palestine is 80.5, (75.6 for the West Bank, and 89.1 for Gaza Strip). This does not reflect the actual economic dependency because not everybody enrolled in the workforce (15-64 years) is actually earning (students, housewives and unemployed).

1.1.3 Population growth:

According to the PCBS figures in 2009, the natural increase of population in Palestine was 2.9% (2.6% in West Bank, 3.3 % in Gaza Strip).

1.2 Births:

1.2.1 Crude birth rate:

Despite progressive decline over the years, the number of live births per 1000 of population per year is still high compared with other countries. The Crude birth rate (CBR) declined from 42.7\1000 in 1997 to 29.6 \1000 in 2008. The total number of reported births in Palestine 116,594 CBR in West bank was (25.8\1000) whereas in Gaza Strip the average CBR (36.8\1000

1.2.2 Fertility:

Fertility data are based on a family survey that PCBS conducted the total fertility rate in Palestine was 4.6; 4.1 in West Bank and 5.3 in the Gaza Strip. Comparing with fertility rates in the neighboring countries shows that it is higher in Palestine; it was 3.7 in Jordan, 3.1 in Egypt and 2 in Tunis.

Section 2: Trends in Health Status

2.1 Reported Morbidity:

2.1.1 Communicable diseases:

The control of communicable diseases plays a vital role in the achievement of “health for all”, a core principle of WHO policy. The tools needed for this task are available and well known. The great challenge facing the Mediterranean region today is to determine how best to use these tools and how to mobilize the resources needed to achieve this goal.

Palestine succeeded in prevention of many fatal and disfiguring diseases as schistosomiasis, leprosy, diphtheria, plague, poliomyelitis, rabies, but is still working toward control of other infectious diseases, such as meningococcal meningitis, brucellosis, AIDS/HIV, hepatitis, tuberculosis, diarrhea, pneumonia.

In spite of the successful control of many diseases through health education and vaccination, new diseases have emerged worldwide which have a negative impact on health status.

2.1.2 Vaccine preventable diseases:

Globally, at least 2 million people in all age groups die every year from diseases preventable by vaccines recommended by the WHO.

Coverage levels of vaccines are considered one of the best indicators of health system performance and progress towards Millennium Development Goals. The target for the Palestinian health care system is that every child will receive a safe vaccine for each childhood vaccine-preventable disease.

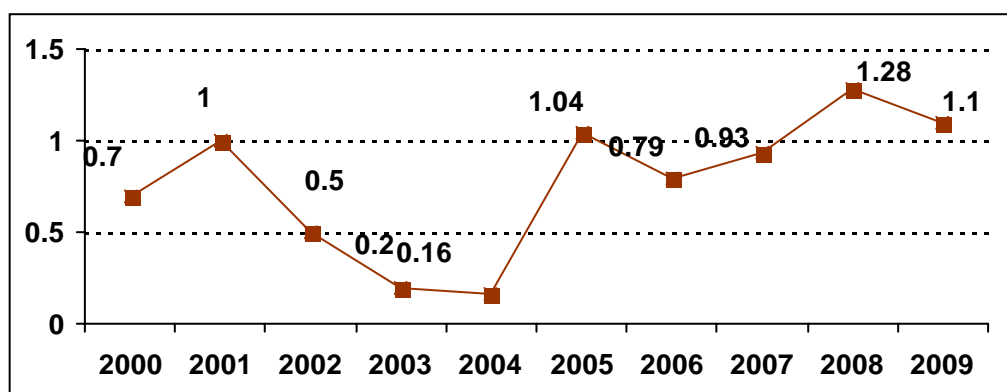

In Palestine, immunization coverage remains high. Based on the reports received from our immunization department, the average coverage rates were more than 99% for all vaccines, which directly impacts on the reduction in the incidence of vaccine preventable diseases.

2.1.2.1 Poliomyelitis and acute flaccid paralysis:

The Regional office for the Eastern Mediterranean Region (EMRO) of the World Health Organization (WHO) adopted a resolution to eliminate poliomyelitis from the region by 2000. In Palestine this target had been achieved earlier, where the last reported case of polio among Palestinian children was in 1984.

Regarding to AFP, 18 cases were reported in Palestine with incidence rate of 1.1 per 100,000 children ≤ 15 years. Regional distribution showed that 4 cases were reported in Gaza Strip, and 14 cases reported in West Bank.

Figure (2): Annual Reported Incidence Rate of Acute Flaccid Paralysis (per 100,000 children ≤ 15 year), Palestine, 2000 – 2009

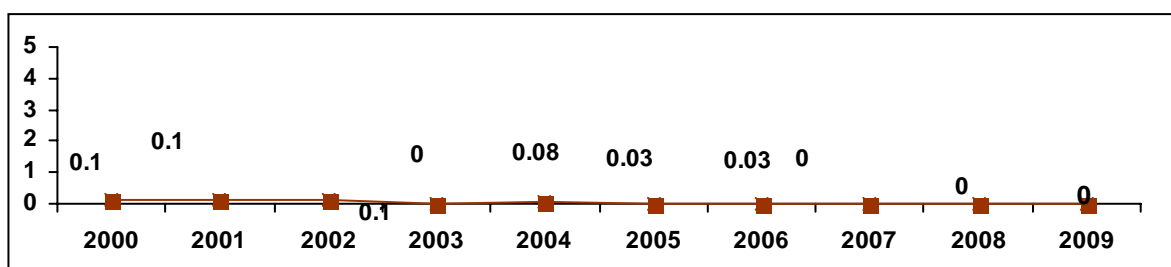

2.1.2.2 Measles:

Elimination of measles is a long-term commitment, and the WHO goal is to achieve elimination in the Region by 2010. Palestine considered one of the countries is about to achieve this goal. The Incidence of measles still under control, approximately one to three cases reported yearly in the last several years.

In the year 2006, only one case was reported. While no reported cases in 2008, where one case was reported in Ramallah district during 2009. The reported cases in 2005 and 2006 were from the Hebron governorate.

World Health Organization criteria for elimination of measles have been implemented in Palestine.

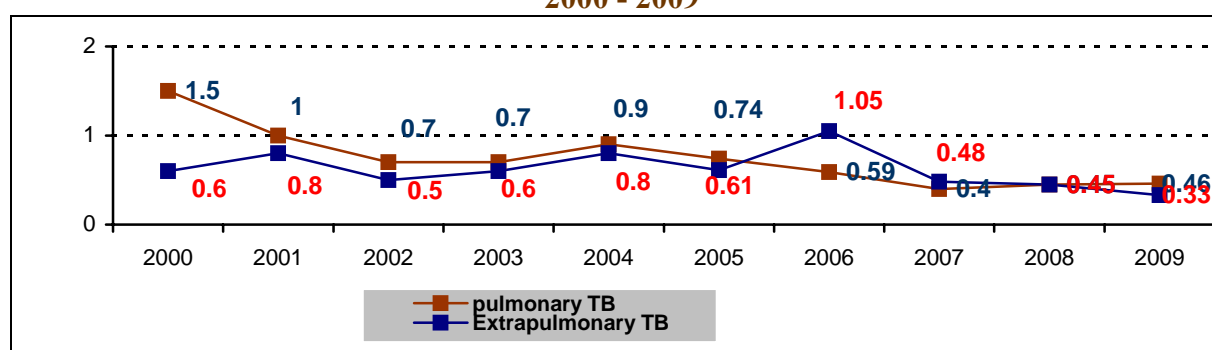

Figure (3): Annual reported incidence rate (per 100,000) of Measles, Palestine, 2000-2009

2.1.2.3 Tuberculosis:

The Palestinian health care system continues to strive toward the elimination of tuberculosis. In 2009, 31 cases were reported with incidence rate of 0.79 per 100,000, (in Gaza Strip 16 cases, 15 cases in West Bank).

Figure: (4) Annual reported incidence rate (per 100,000) of Tuberculosis, Palestine, 2000 - 2009

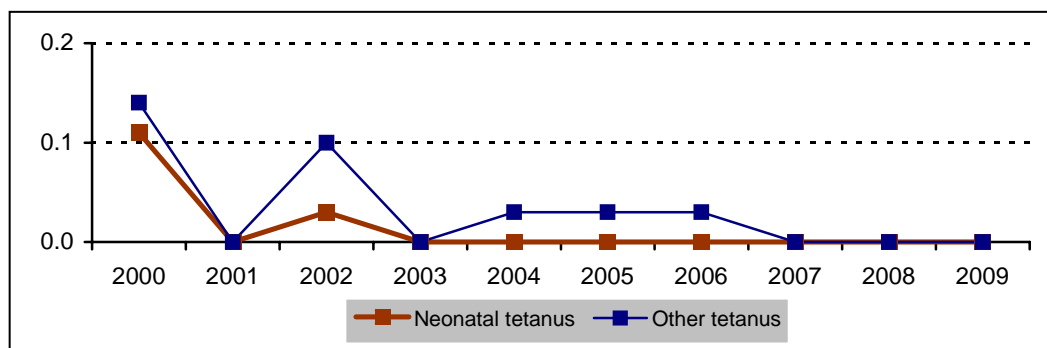

2.1.2.4 Tetanus:

Tetanus, particularly the neonatal form, remains a significant public health problem worldwide particularly in densely populated regions.

In spite of that, there are no reported cases of neonatal tetanus in the last four years, which reflect the success of Ministry of Health (MOH) in the control and elimination of neonatal tetanus. In addition, MOH ensures high vaccination coverage among pregnant women. One case was reported in South Hebron during year 2009.

Figure: (5) Annual Reported Incidence Rate of Tetanus (per 100,000), Palestine, 2000-2009

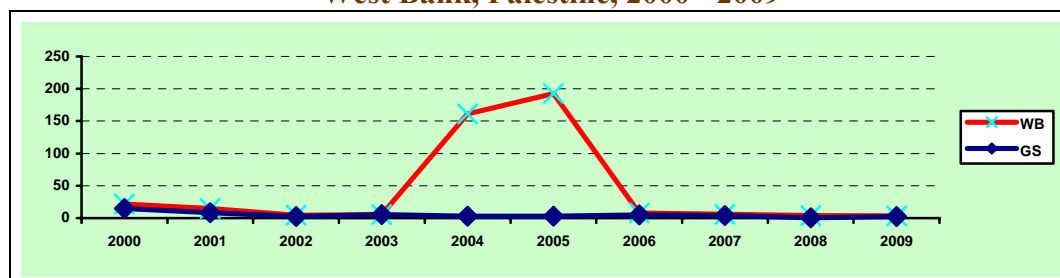

2.1.2.5 Mumps:

Since December 2003, there was a large outbreak of mumps in the Nablus area that affected children, mainly below 15 years of age, of whom 72.9% were previously immunized. In total, more than 4000 children, both refugees and non-refugees, were affected. The outbreak reached its peak during April and May 2004, subsided thereafter, but spread out to other districts in the West Bank. The mumps outbreak was attributed to possible breakdowns in the public sector cold chain system due to frequent power cuts.

In the year 2006, there was a notable decrease in reported cases of mumps in the West Bank, wherein 260 cases were reported with an incidence rate of 7.8 per 100,000 compared with 192.8 per 100,000 in the year 2005. However, there was an increase of reported cases in the Gaza Strip reaching 69 cases with an incidence rate of 4.7 per 100,000 compared with 3 per 100,000 in the year 2005. In 2007, 190 cases were reported with an incidence rate of 5.05 per 100,000 of populations (134 cases in West Bank, 56 in Gaza Strip). While in 2008, 105 cases were reported (97 cases of them in WB, 8 cases in GS). The incidence rate was 2.79 per 100,000 of population.

In 2009, 118 cases were reported (84 of them in WB, 34 in GS) with incidence rate 3/100,000 population (3.4 in WB, 2.3 in GS)

Figure (6): Annual Reported Incidence Rate of Mumps (per 100,000), West Bank, Palestine, 2000 - 2009

2.1.2.6 Meningitis:

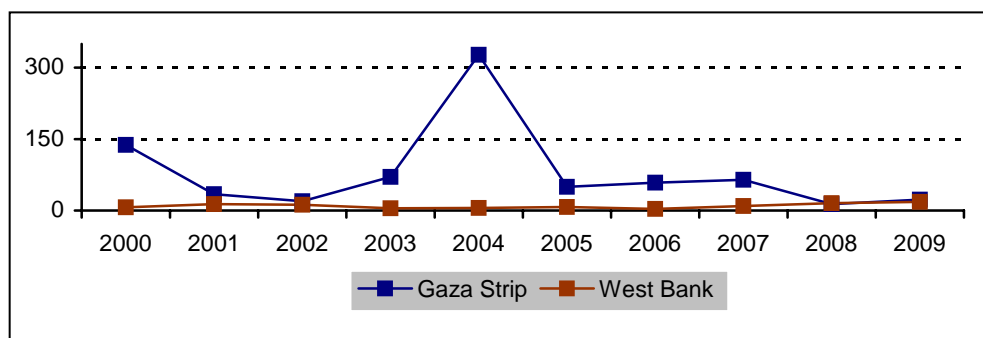

Meningitis can be caused by various sorts of viruses, bacteria, and even by fungi.

2.1.2.6.1 Viral (Aseptic) Meningitis:

Viral meningitis is rarely serious but requires supportive care. Viral meningitis is considered one of the endemic diseases in Palestine with some seasonal variation. The majority of viral meningitis cases (more than 72%) are reported in spring and summer seasons.

In the year 2009, 783 cases were reported with an incidence rate of 19.9 per 100,000 populations. 440 cases in WB with IR 18/ 100,000 population and 343 cases in GS, with IR 23.1 /100,000 populations).

Figure (7): Reported Incidence Rate of Viral (Aseptic) Meningitis by Region, Palestine 2000 - 2009

2.1.2.6.2 Bacterial Meningitis:

Bacterial meningitis is an important serious illness worldwide; it can be caused by a range of different bacteria: Haemophilus influenza type b, Neisseria meningitides, Streptococcus pneumoniae and other bacteria.

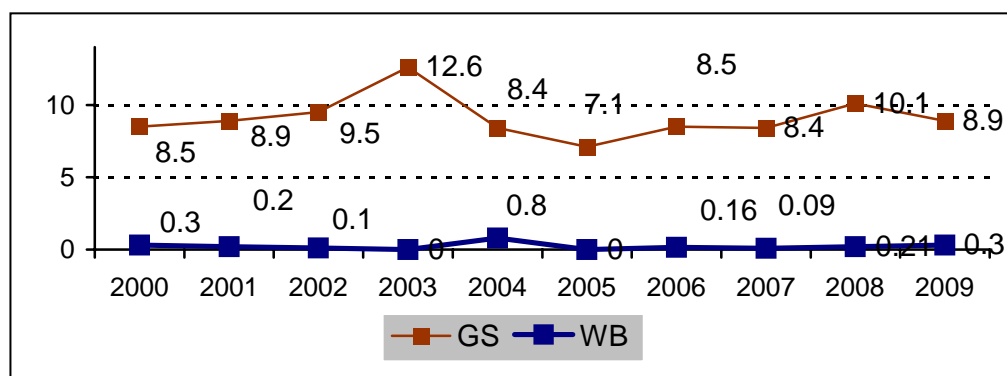

2.1.2.6.2.1 Meningococcal Disease:

Meningococcal disease remained a priority concern type of meningitis, because it is potentially fatal and should always be viewed as a medical emergency, which is caused by Neisseria meningitides.

Meningococcal meningitis is an endemic disease in Gaza Strip and sporadically reported in West Bank.

In the year 2009, 140 cases were reported with an incidence rate 3.6 per 100,000 population, 8 cases were reported on the West Bank with Incidence rate 0.3 per 100,000 population and 132 cases reported in Gaza Strip with incidence rate 8.9 per 100,000 of population.

Figure (8) Annual Reported Incidence Rate of Meningococcal Disease (per 100,000), Gaza Strip and West Bank, Palestine, 2000 - 2009

2.1.2.6.2.2 Haemophilus Influenza Meningitis:

Infections caused by Haemophilus influenza type b (Hib), as meningitis are responsible for high morbidity and mortality among children worldwide.

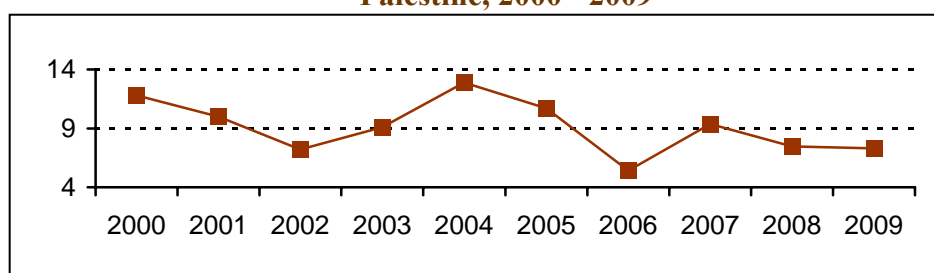

In Palestine, during the past years, the incidence rate of Haemophilus influenza meningitis was constant and kept at the same average, one case was reported in the year 2008 with an incidence rate of 0.03 per 100,000 populations were no cases reported in 2009.

2.1.2.6.2.3 Other Bacterial Meningitis:

Other bacterial meningitis is caused by variety of bacterial infection; mainly Streptococcus pneumoniae.

In Palestine, incidence rate in the year 2009 was 7.3 per 100,000 population (289 cases was reported, 153 in WB, with IR 6.2 per 100,000, 136 cases in GS with IR 9.1 per 100,000.

Figure (9) Annual Reported Incidence Rate of Other Bacterial Meningitis (per 100,000), Palestine, 2000 - 2009

2.1.2.7 Viral Hepatitis:

Viral hepatitis is one of the most serious health problems worldwide, with some variation from one type to another and from country to another. In Palestine, there are three types of diagnosed hepatitis: A, B, and C.

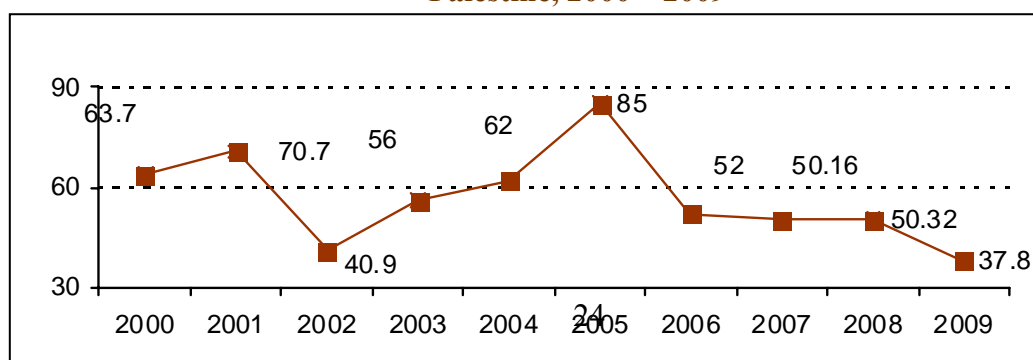

2.1.2.7.1 Hepatitis A Virus (HAV)

Hepatitis A is considered one of the most common diseases and the leading cause of acute viral hepatitis world wide.

Palestine as one of developing countries is still endemic for hepatitis A. A notable decrease in number of cases were reported in the year 2006 (2,044 cases) with an incidence rate of 52 per 100,000 population, compared with (3,199 cases) with an incidence rate of 85 per 100,000 in the year 2005. The number of reported cases decreased to 1893 cases in 2008 with an incidence rate of 50.32 per 100,000. Of them, 1046 cases were reported in the West Bank with an incidence rate of 44.6 per 100,000, and 847 cases were in the Gaza Strip with an incidence rate 59.79 per 100,000 populations. In 2009 the total numbers of cases continue to decline up to 1,488 cases with IR 37.8 per 100,000 populations (33.1 in WB, 45.6 in GS).

Good personal hygiene and proper sanitation can help in prevention of hepatitis A. The majority of HAV infection still takes place in early childhood, where it is asymptomatic and of little clinical significance.

Figure (10) Annual Reported Incidence Rate of Hepatitis A Disease (per 100,000), Palestine, 2000 – 2009

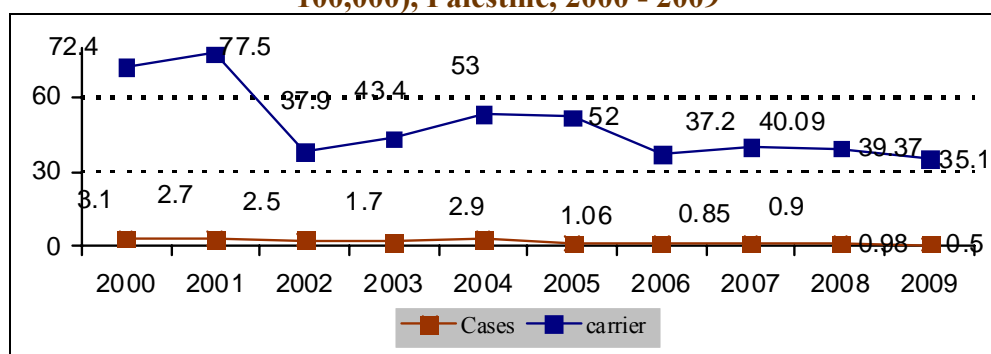

2.1.2.7.2 Hepatitis B Virus (HBV):

The Hepatitis B virus (HBV) infection is a major public health problem in the Middle East. The majority of the countries in the region have an intermediate or high endemic of HBV infection. Palestine is considered an intermediate endemic area of hepatitis B.

In the year 2008, there were 37 cases of hepatitis B reported with an incidence rate of 0.98 per 100,000 populations, 31 cases out of them were reported in WB with an incidence rate of 1.32 per 100,000. In 2009, 21 cases are reported in West Bank with IR 0.5 per 100,000 populations, where no cases reported in Gaza Strip.

In regards to hepatitis B carriers, 1,382 cases reported with incidence rate of 35.1 per 100,000 population, (41.9 per 100,000 in West Bank, 24 per 100,000 in Gaza Strip.

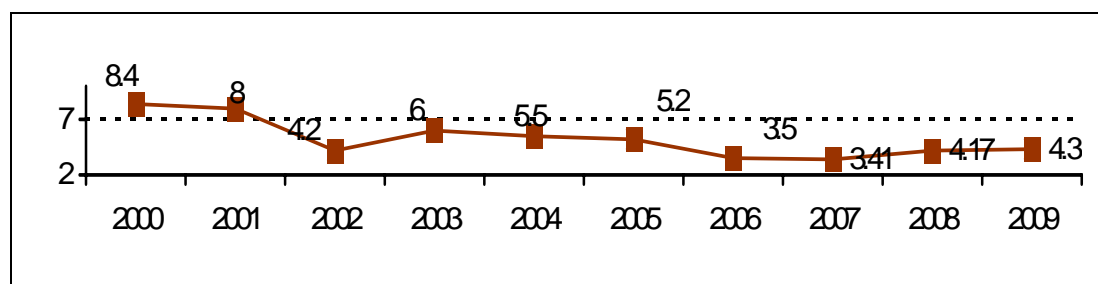

Figure (11) Annual Reported Incidence Rate of Hepatitis B Cases and Carrier, (per 100,000), Palestine, 2000 - 2009

2.1.2.7.3 Hepatitis C Virus (HCV):

Surveillance of hepatitis C in Palestine started in 1994, but it needs more national attention. Palestine still enjoys a low prevalence rate of HCV infection. In the year 2009, 2 cases of hepatitis C was reported in West bank with IR 0.1 per 100,000 population, where no cases was reported in Gaza Strip, and 166 hepatitis C carriers were reported with an incidence rate of 4.2 per 100,000 (122 cases in WB with IR 5, 44 cases in GS with IR 3).

Figure (12) Annual Reported Incidence Rate of Hepatitis C Cases and Carriers (per 100,000), Palestine, 2000 – 2009

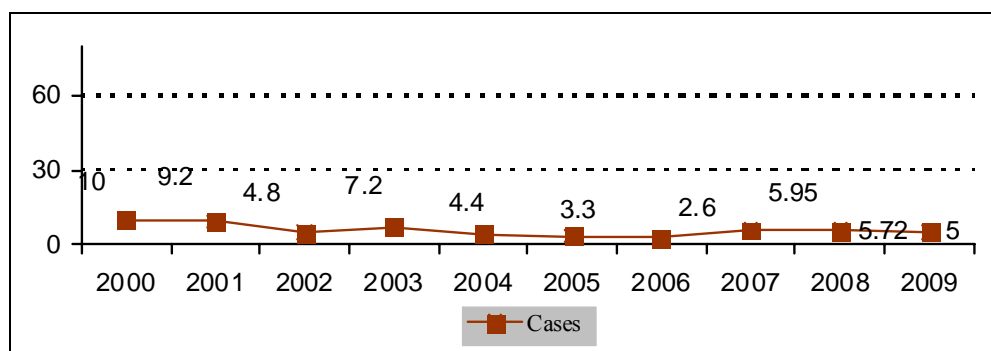

2.1.2.8 Human Brucellosis:

Brucellosis has been reported annually in Palestine since 1987, with a peak in 1990. which was considered one of the highest incidence rate in Mediterranean countries until a brucellosis

control program was implemented having a clear impact on the incidence rate of brucellosis and reducing its annual incidence rate to 2.6 per 100,000 population in the year 2006 compared with 3.3 per 100,000 in the year 2005. Where in 2008, 215 reported cases with incidence rate 5.72 per 100,000, 207 cases in West Bank. In 2009, the total number of reported cases was declined up to 196 cases with IR 5 per 100,000 populations, (194 cases in WB with IR 7.9, 2 cases in GS with IR 0.1).

Figure (13) Annual Reported Incidence Rate of Human Brucellosis (Per 100,000), Palestine, 2000 - 2009

2.1.2.9 Acquired Immunodeficiency Syndrome (HIV/ AIDS):

The Mediterranean Region is no longer free from this global epidemic. Although the epidemic is still in its early stage in general, there are alarming signs of expansion in Palestine.

The cumulative reported cases from 1988 total 66 cases, out of which there were 51 AIDS cases and 15 HIV carriers.

Table (1) Distribution of Cumulative Number of HIV/ AIDS, Palestine, 1988 - 2009

Classification	Number	Percent
HIV (Carrier)	15	22.7
AIDS (Case)	51	77.3
Total	66	100

Table (2) Distribution of HIV/AIDS by Mode of Transmission, Palestine, 1988 - 2009

Mode of transmission	Number	Percent
Heterosexual	34	51.5
Homosexual	1	1.5
Blood/blood product	11	16.6
Injecting Drug use	3	4.5
Mother to child	1	1.5
Bisexual	3	4.5
Unknown	13	20
Total	66	100

Table (3) Distribution of HIV/ AIDS by Sequel, Palestine, 1988 - 2009

Sequel	No	%
Dead	35	53

Alive	31	47
Total	66	100

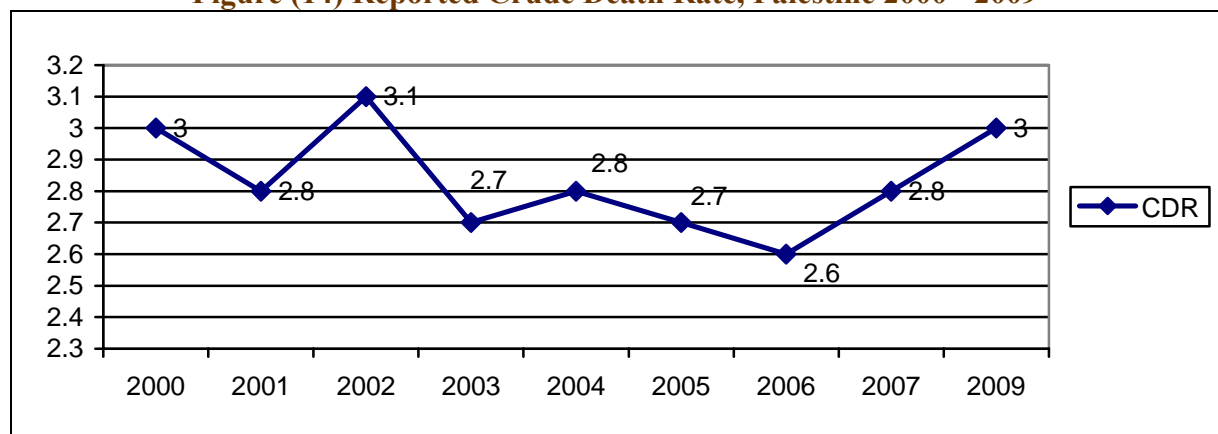

2.2 Reported Mortality:

The total number of deaths in 2009 was, 11,718 (6,712 Male, 5,006 Female), 6,469 out of them was in West Bank (3,538 Male, 2,931 Female), 5,249 was in Gaza Strip (3,174 Male, 2,075 Female).

2.2.1 Crude death rate (CDR):

According to MOH figures, the crude death rate declines progressively over the years. The CDR for Palestine declined from 4.9 per 1000 population in 1997 to 3 in 2009. In Gaza Strip it declined from 4.7 in 1997 to 3.5 in 2009. The crude death rate in West Bank declined from 5.1 per 1000 population in 1997 to 2.6 per 1000 population in 2009.

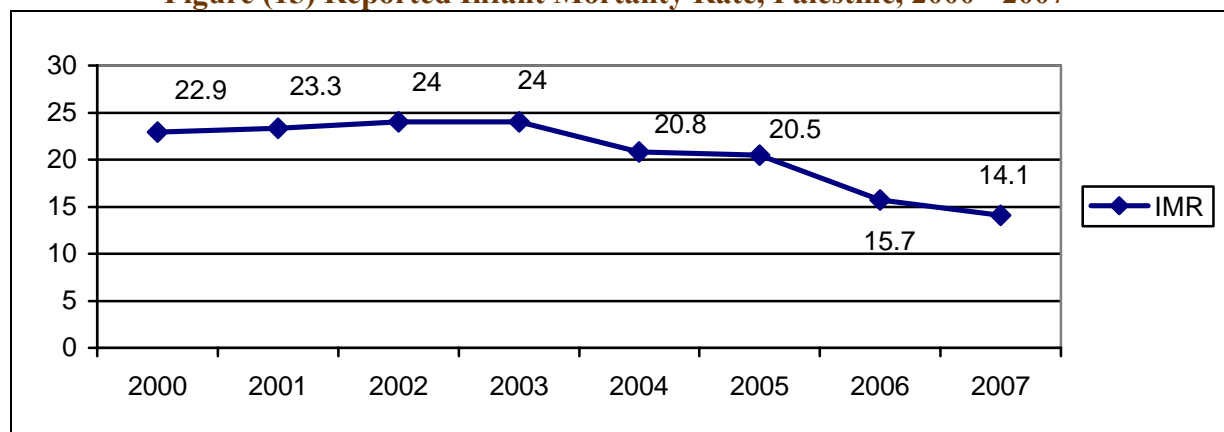

Figure (14) Reported Crude Death Rate, Palestine 2000 - 2009

2.2.2 Infant Mortality:

PCBS figures shows that 25.3 per 1000 live birth (27.1 for males, 23.4 for females) at the period 2002-2006m where the infant deaths in Jordan for the year 2003, was 22 per 1000 live birth, 44 per 1000 live birth in Egypt. Where the reported figures by MOH in Palestine was 14.1 per 1000 live birth (11.8 in West Bank, 17 in Gaza Strip).

Figure (15) Reported Infant Mortality Rate, Palestine, 2000 - 2007

2.2.3 Leading Cause of Death:

In 2009, the 10th leading cause of deaths in West Bank was as following:

- 1- Heart disease 26.1 % 2- Cerebrovascular diseases: 11.8 %
- 3- Cancer deaths: 11 % 4- Inflammation of the respiratory system: 8.4 %
- 5- Senility: 5.6 % 6- Renal failure: 5.1 % 7- Perinatal period: 4.9 %
- 8- Septicaemia: 4.4 % 9- Hypertensive disease: 3.9 % 10- Accidents: 2.8 %.

2.2.4 Cancer Mortality:

The reported figures by MOH shows a slight increase in Cancer mortality in 2009 compared with 2007, from 10.5% to 11 % from the total deaths. Trachea cancer was the highest one; it was 17.3 %, Colo-rectal and anus Cancer 13.3 %. Cancer mortality in Males is higher than in Females (56.9 %) & (43.1 %).

Section 3: Health

The four main health providers of health services in Palestine are Ministry of health, UNRWA, and NGOs and Private for profit. MOH bears the heaviest burden, as it has the responsibility. In the Gaza Strip, there are 59 primary health care centers and in the West bank, there are 381 primary health care centers. The health services are distributed throughout Palestine. In addition MOH provides a number of specific health programs as: health education/community involvement, school health, immunization, human resources development, and referral of patients to non – MOH facilities (when services are not available in governmental facilities). UNRWA operates 18 primary health care centers scattered in eight refugee camps in the Gaza Strip and 41 centers in the West Bank. The NGOs sector operates 194 primary health care centers and general clinics, 57 of them in Gaza Strip, and in the West Bank they operate 137 primary health care centers.

3.1 Health services

3.1.1 Health Services Providers:

In the Gaza strip, there are 134 primary health centers run by three main providers:

- 1-Government: 59 primary health care centers.
- 2- UNRWA: 18 primary health care centers.
- 3- NGOs: 57 primary health care centers.

In the West Bank there are (559) primary health centers run by three main providers:

- 1- Government: 381 primary health care centers.
- 2- UNRWA: 41 primary health care centers.
- 3- NGOs: 137 primary health care centers.

3.2 Manpower:

Table (4) Distribution of Medical Professions in MOH, Palestine, 2009

	West Bank	Gaza Strip	Total
Physician	647	1579	2226
Specialists	276	665	941
Dentist	48	252	300
Nurse	1811	1592	3403
Paramedical	729	783	1512
Total	3511	4871	8328
Administration	1924	3520	5444
Grand total	5435	8391	13826

3.3 Woman and Child health:

3.3.1 Family planning (FP):

MOH reported figures; shows that the main contraceptive method used in Palestine in 2009 was Pills with total of 23,737 women used it with percentage 64.8% (48.7% in GS, 66.5% in WB) , where 5,398 women used IUDs with percentage 14.7% (18.9% in GS, 14.3% in WB).

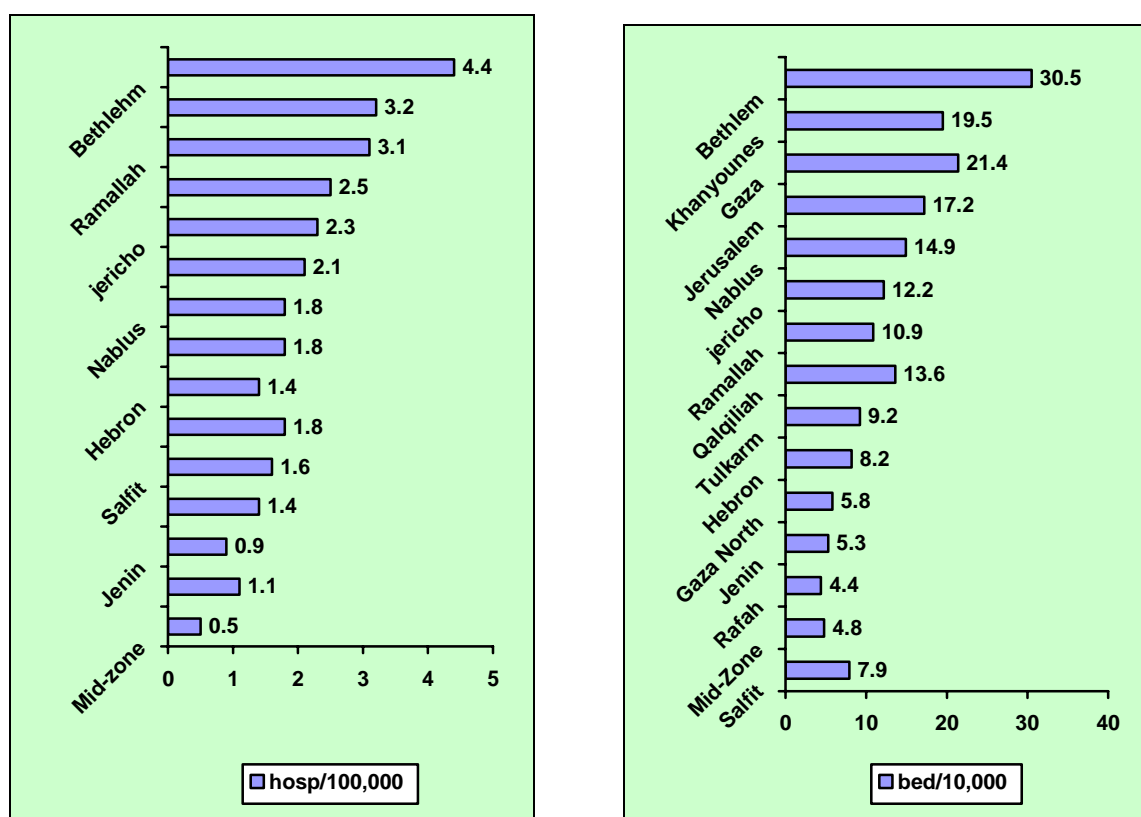

3.4 Secondary and Tertiary Health Care:

The hospital services are operated by the government and non-government sectors. The hospitals in both sectors have improved in terms of facilities, technical and support services over the years by adding new departments and diagnostic equipment, as well as providing continuous professional training.

3.4.1 Hospital facilities:

There are 75 hospitals in Palestine (50 in WB, 25 in GS), with total number of 5,058 beds in government and non-government hospitals (60.2 % in WB, 39.8 % in GS). 72.6 % of them are general beds, 16.0 % specialized beds, 3.8 % rehabilitation beds and 7.5 % maternity beds. In Palestine, there are 12.9 beds per 10,000 populations, (12.7 bed in WB, 13.5 bed in GS).

Figure (16) Distribution of Hospital Rate per 100,000 of populations, and Number of Beds per 10,000 Populations, by Governorate, Palestine, 2009

(12.7 bed in WB, 13.5 beds in GS).

3.5 Laboratories and blood banks:

Table (5) Distribution of Laboratories According to MOH Classification, Palestine, 2009

District	Central	Medium	Terminal	Total
West bank	2	12	128	142
Gaza Strip	2	11	37	50
Palestine	4	23	165	192

*Because we change booster dose from age 12 month to 18 month so OPV4 +DPT only of 6 month population

O MMR1 have more coverage because of new program Two cohorts take the vaccine for at least 3 months

()
