Hostilities in the Gaza Strip and Israel | Flash Update #70

15 Dec 2023

Key points

- Since about 17:45 on 14 December and as of midnight on 15 December, communication with the Gaza Strip has been severely disrupted due to the shutdown of telecommunication and internet services in the Middle Area and southern Gaza after damage was reported to the main telecommunications fibre lines in Khan Younis. Telecommunication and internet services in North Gaza has been also impacted. This marks the fifth blackout since 7 October. As a result, this Flash Update provides limited updated information about the humanitarian situation in Gaza over the past 24 hours.
- On 15 December, heavy Israeli bombardments from air, land, and sea across Gaza continued, with the most intense airstrikes reported in Khan Yunis and Rafah, along with naval shelling off the coast of Rafah. Since 14 December, the Ministry of Health (MoH) in Gaza has not updated its casualty figures. The latest reported figures as of 14 December afternoon stood at 18,787 Palestinians killed. About 70 per cent are said to be women and children. About 50,5897 Palestinians have reportedly been injured. Many people are missing, presumably buried under the rubble, waiting for rescue or recovery.
- Additionally, intense ground operations and fighting between Israeli forces and Palestinian armed groups continued, especially in Khan Younis and Rafah in southern Gaza. According to the Israeli military, three Israeli soldiers were killed in Gaza on 15 December, bringing the total number 119 soldiers killed in Gaza since the start of the ground operations with 648 soldiers injured. The firing of rockets by Palestinian armed groups into Israel has also continued, reaching Jerusalem and surrounding areas, while a fall was reported near Ramallah in the West Bank.

- On 15 December, an airstrike struck a school sheltering Internally Displaced People (IDPs), in Khan Yunis, reportedly killing 12 Palestinians, and injuring dozens of others. Since 7 October, at least 288 IDPs sheltering in UNRWA shelters have been killed and at least 998 injured, according to UNRWA. A total of 342 school buildings have sustained damage (about 70 per cent of all school buildings in Gaza). Seventy of the schools damaged are UNRWA schools, with at least 56 serving as shelters for IDPs. Several schools, including UNRWA schools, have been directly hit by Israeli airstrikes or tank shells.
- On 15 December, two Palestinian journalists were injured from a missile fired from a drone in Khan Younis, with one dying of his wounds after paramedics were impeded from reaching him for hours, according to media reports. Expressing its alarm at the unprecedented rate of journalists and media workers killed in Gaza since 7 October, the UN Human Rights Office (OHCHR) in the occupied Palestinian territory has verified the killing of 50 journalists and media workers, and received information that 30 more may have died, amounting to approximately six per cent of all those registered with the Journalists' Syndicate in Gaza.
- Since 3 December, tens of thousands of IDPs, who have arrived in Rafah, continue to face extremely overcrowded conditions both inside and outside shelters. With an estimated fourfold increase in population density, exceeding 12,000 per square kilometre, it is now the most densely populated area within the Gaza Strip.
- A new World Food Programme (WFP) [rapid food security assessment](#) reveals alarming trends in the food security situation in southern Gaza, with 44 per cent of assessed households facing very severe hunger. This is an increase from the 24 per cent recorded in the previous assessment undertaken during the humanitarian pause (24-30 November).
- On 15 December, as of 22:00, there are initial reports that 115 trucks carrying humanitarian supplies and four tankers of fuel have entered the Gaza Strip. This is well below the daily average of 500 truckloads (including fuel and private sector goods) that entered every working day prior to 7 October.
- On 14 December, 69 injured people and 543 dual nationals were evacuated from Gaza to Egypt. The total number of wounded Palestinians and other medical cases evacuated since 7 October represents one per cent of the reported injury toll. This corresponds to 500 people, while an additional 8,000 of the reported 50,500 injured are said to require immediate medical intervention.
- On 15 December, the Israeli Security Cabinet approved the re-opening of the Kerem Shalom crossing for the entry of humanitarian aid into Gaza. Since 13 December, aid trucks have been screened at the crossing, before being allowed to enter Gaza through Rafah crossing. Aid agencies have been advocating the complete re-opening of Kerem Shalom, which prior to 7 October was the main access point for both humanitarian and commercial goods entering and exiting Gaza. Welcoming the announcement, Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, Martin Griffiths said the, "fast implementation of this agreement will increase the flow of aid. But what the people in Gaza need most is an end to this war."

Hostilities and casualties (Gaza Strip)

- The following are among the deadliest incidents reported between 14:00 on 14 and 15 December:
 - On 14 December, at about 12:00, continuous Israeli forces shelling in the centre of Khan Younis, hit several locations including Osama Bin Zaid Mosque, Al Hoob market, and Jasser building killing at least 13 Palestinians and injuring many others.
 - On 14 December, at about 19:20, at least five Palestinians were reportedly killed when a house in Ash Shaboura Refugee Camp, in Rafah was hit.

- On 14 December, at about 11:10, an Israeli military drone reportedly killed two Palestinians in a school sheltering IDPs in Ad Darraj area, in Gaza city. According to the Ministry of Education (MoE), between 7 October and 5 December, more than 3,477 students and 203 educational staff were reportedly killed, and more than 5,429 students and 507 teachers injured.

Displacement (Gaza Strip)

- Areas encompassing nearly 30 per cent of the Gaza Strip (excluding the orders to evacuate the areas north of Wadi Gaza) have been marked for evacuation on the Israeli military's online map that was launched on 1 December. Access to this information is impaired by recurrent interruptions in telecommunications and the lack of electricity.
- Obtaining an accurate total of the IDPs remains challenging, but as of 12 December, according to UNRWA, almost 1.9 million people in Gaza, or nearly 85 per cent of the population, are estimated to be internally displaced, including people who have been displaced multiple times.
- Nearly 1.3 million of these IDPs are registered in 155 UNRWA facilities across Gaza, including more than 1.2 million in 98 UNRWA shelters in the Middle Area, Khan Younis and Rafah governorates.
- The average number of IDPs in UNRWA shelters located in middle and southern areas is about 12,400 more than four times their capacity.

Electricity

- Since 11 October, the Gaza Strip has been under an electricity blackout, after the Israeli authorities cut off the electricity supply, and fuel reserves for Gaza's sole power plant were depleted. For more information on electricity supply to the Gaza strip, please see this [dashboard](#).

Health care, including attacks (Gaza Strip)

- Currently, only 11 out of 36 hospitals in the Gaza Strip are functional and able to admit new patients, although services are limited. Only one of these hospitals is in the north, according to WHO. The two major hospitals in southern Gaza are operating at three times their bed capacity, while facing critical shortages of basic supplies and fuel. According to the MoH in Gaza, occupancy rates are now reaching 206 per cent in inpatient departments and 250 per cent in intensive care units. Additionally, these hospitals are providing shelter to thousands of IDPs.
- On 14 December, an airstrike hit the vicinity of Al Ahli Hospital in the east of Gaza City, causing large damage in the hospital facilities with no reported casualties.

Food security

- On 15 December, the World Food Programme (WFP), through its partners distributed 9,270 hot meals to IDP outside shelters and with host families and food parcels to IDPs in UNRWA shelters in three locations in Rafah and Deir Al Balah.
- Between 3 and 12 December, WFP conducted a [rapid food security assessment](#), following the significant deterioration of the food security situation in the south of Gaza, following the large influx of IDPs with the resumption of hostilities on 1 December. Very severe hunger levels were reported in 44 per cent of respondent households, compared with 24 per cent in a previous assessment conducted on 27-30 November. The proportion of IDP households reporting members going to sleep hungry at night increased from 34 per cent to half of all assessed households. The acute shortage of cooking gas has led to heavy dependence on firewood, wood residues, and waste burning, raising the risk of respiratory diseases. The food security situation in the northern governorates of Gaza is believed to be significantly worse.

Hostilities and casualties (Israel)

- Over 1,200 Israelis and foreign nationals have been killed in Israel, including 36 children, according to the Israeli authorities, the vast majority on 7 October.
- During the humanitarian pause (24-30 November), 86 Israeli and 24 foreign national hostages were released. The Israeli authorities estimate that about 130 people remain captive in Gaza, including Israelis and foreign nationals. On 15 December, three hostages who are believed to have eluded their captors were mistakenly shot and killed by Israeli forces, according to Israeli officials.

Violence and casualties (West Bank)

- On 15 December, Israeli forces killed a Palestinian man at Huwwara checkpoint (Nablus), following an alleged stabbing attack, according to the Israeli army. No Israeli casualties were reported.
- Since 7 October, 278 Palestinians, including 70 children, have been killed in the West Bank, including East Jerusalem. Additionally, two Palestinians from the West Bank were killed while carrying out an attack in Israel on 30 November. Of those killed in the West Bank, 268 have been killed by Israeli forces, eight by Israeli settlers and another two either by forces or settlers. This toll represents more than half of all Palestinians killed in the West Bank this year. With a total of 477 Palestinians killed in the West Bank, 2023 is the deadliest year for Palestinians in the West Bank since OCHA began recording casualties in 2005.
- Since 7 October, four Israelis, including three members of Israeli forces, have been killed in attacks by Palestinians in the West Bank, including East Jerusalem. An additional four Israelis were killed in an attack by Palestinians from the West Bank in West Jerusalem (one of the four was killed by Israeli forces who misidentified him).
- Two-thirds of the Palestinian fatalities in the West Bank since 7 October have occurred during search-and-arrest and other operations carried out by Israeli forces, including some – mainly in Jenin and Tulkarm governorates – involving exchanges of fire with Palestinians. More than half of the fatalities were reported in operations that did not involve armed clashes.
- Since 7 October, Israeli forces have injured 3,607 Palestinians, including at least 552 children; 45 per cent of them in the context of demonstrations and 46 per cent in the context of search-and-arrest and other operations. Another 85 Palestinians have been injured by settlers and 18 other Palestinians injured either by Israeli forces or settlers. Some 33 per cent of those injuries have been caused by live ammunition, compared with 9 per cent in the first nine months of 2023.

Settler Violence

- Since 7 October, OCHA has recorded 344 Israeli settler attacks against Palestinians, resulting in Palestinian casualties (35 incidents), damage to Palestinian-owned property (264 incidents), or both casualties and damage to property (45 incidents).
- The weekly average of incidents since 7 October stands at 35, compared with 21 incidents per week between 1 January and 6 October 2023. The number of incidents since 7 October has declined from 80 incidents in the first week (7-14 October) to 21 incidents between 9 and 14 December. One-third of these incidents included firearms, including shootings and threats of shootings. In nearly half of all recorded incidents, Israeli forces were either accompanying or reportedly seen as supporting the attackers.

Displacement (West Bank)

- Since 7 October, at least 189 Palestinian households comprising 1,257 people, including 582 children, have been displaced amid settler violence and access restrictions. The displaced households are from 15 herding/Bedouin communities. More than half of the displacements occurred on 12, 15, and 28 October, affecting seven communities.
- Also, since 7 October, 338 Palestinians, including 182 children, have been displaced following the demolition of their homes in Area C and East Jerusalem, due to lack of Israeli-issued building permits in Area C of the West Bank and East Jerusalem, which are almost impossible to obtain. The monthly average of displacement between 7 October and 7 December represents 27 per cent increase compared with the monthly average of displacement in the first nine months of the year.
- On 14 December, in Area B of 'Urif (Nablus), Israeli forces demolished, on punitive grounds, two residential buildings belonging to families whose members were accused of killing four Israeli settlers near Eli settlement in June 2023. As a result, three families comprising 18 people were displaced. Punitive demolitions are a form of collective punishment and are prohibited under international law.
- Another 68 Palestinians, including 34 children, have been displaced following the demolition of 16 homes on punitive grounds since 7 October. The same number of homes were punitively demolished in the first nine months of the year. The Human Rights Committee, in its review of the fourth periodic report of Israel, in 2014, concluded that punitive demolitions are a form of collective punishment and as such are illegal under international law.
- Another 269 Palestinians, including 121 children, have been displaced since 7 October following the destruction of 42 residential structures during other operations carried out by Israeli forces across the West Bank; 61 per cent of the displacement was reported in Jenin Refugee Camp, and 29 per cent in Nur Shams and Tulkarm Refugee Camps (both in Tulkarm).

Funding

- As of 14 December, Member States have disbursed [US\\$525 million](#) against the [updated Flash Appeal](#) launched by the UN and its partners to implement its response plan in support of 2.2 million people in the Gaza Strip and 500,000 in the West Bank. This constitutes nearly 39 per cent of the \$1.2 billion requested. Private donations are collected through the [Humanitarian Fund](#).

HUMANITARIAN NEEDS AND RESPONSES: 4 December – 10 December

Health

UNRWA carried out the following health activities across Gaza between 7 and 9 December:

- Some 97 medical teams attended about 30,000 IDPs in UNRWA shelters.
- Some 10,700 medical consultations were provided at health centres daily.
- Some 18,208 patients received health care in eight UNRWA health centres in the middle and south areas of Gaza.
- Mental health and psycho-social support services (MHPSS) were delivered to about 2,000 people.

Protection

- Explosive Ordnance Risk Education and Conflict Preparedness and Protection messages continue to be disseminated via available channels.

- UNMAS, Mines Advisory Group and NPA continue with social media campaigns and HI and UNMAS are planning SMS campaigns to educate the public and to mitigate Explosive Remnants of War risks.
- A total of 35 Child Protection Case Management actors attended remote training on Identification, Documentation, Tracing and Reunification of unaccompanied and separated children.
- Child protection partners reached 35,290 boys and girls and 13,780 women and men in the past 15 days with awareness raising messages regarding protection issues, MHPSS support, case management and winter clothing kits.
- Temporary alternative care shelter in Rafah has been arranged for unaccompanied children who are identified and registered. Hosting capacity for children will be arranged in phases, with 15 children accommodated in the first phase.
- Partners specializing in addressing gender-based violence continue to provide support to women and girls in the south. During the reporting period, partners distributed 17,000 menstrual health management (MHM) kits and 9,500 dignity kits to 26,500 women and girls of reproductive age in the south.

Food security

Most food distribution focused on IDPs in UNRWA shelters, public shelters, and host families. Food security partners have provided the following responses during the reporting period:

- UNRWA distributed flour to about 160,000 people in the north of Gaza. In the south, flour distribution reached about 1,153,020 people.
- About 100,000 people received food parcels and about 130,000 people received hot meals in southern Gaza.

Nutrition

Nutrition partners provided the following essential nutrition preventive and curative supplies during the reporting period to prevent malnutrition among children and mothers:

- UNICEF delivered Ready to Use Therapeutic Food (RUTF) for over 4,850 high-risk children with severe and moderate acute malnutrition.
- UNICEF delivered additional quantities of High Energy Biscuits (HEB) to 11,760 children under the age of five. To date, 24,000 children have received HEB since the start of the response on 9 November.
- WFP delivered medium-quantity lipid-based supplements to cover the needs of 57,500 pregnant-breastfeeding women and children under two years of age.
- Some 500 pregnant and breastfeeding women received iron-folate supplementation to prevent malnutrition.

Water, Sanitation and Hygiene (WASH)

No updates were provided for the reporting period. Below are the updates for the period, 27 November to 4 December:

- Some 3,896 cubic metres of water, and 690 cubic metres of bottled water were distributed to displaced people.
- Two desalination plants were installed in two IDP centres in Khan Younis. During the ceasefire period, WASH actors increased their activities in IDP locations. However, fewer WASH supplies entered Gaza, and there were no new deliveries of storage tanks, jerry cans, or cleaning kits to Rafah. No latrines were built. A consignment of pipes and generators was refused entry over the ceasefire period. Fuel supply to WASH facilities, currently at 19,520 litres per

day is at 35 per cent of the amount needed to operate water production, treatment and distribution, sewage treatment and storm water management.

Shelter and Non-Food Items (NFI)

During the reporting period, a significant shortage of basic shelter materials was reported, which includes tents, tarpaulins, and plastic sheeting for protection during rainy days, particularly for people living outside shelters. Shelter partners distributed the following items to IDPs:

- 470 mattresses.
- 420 water jerrycans.
- 250 sleeping mats.
- 150 kitchen sets.

There is still a major gap in shelter winterization materials and essential NFIs, including sealing off kits for damaged houses; a high shortage in bedding sets, including mattresses and blankets to cover the needs of the IDPs in various settings, including UNRWA shelters, as well as winterized tents to protect IDPs in the open air.

Education

Education Cluster's 10 partners currently active in the Gaza strip have reached 84,262 individual students and teachers since 7 October with provision of emergency learning and recreational supplies (52,653 reached), psychosocial support (64,854 reached), and recreational activities (83,262 reached), in Khan Younis, Rafah and Middle governorates.

The Gaza Education Cluster conducted an Observation Assessment between 25 to 27 November in the three Southern governorates to assess the level of damage of 41 schools and conduct a preliminary mapping of available space for setting up temporary learning spaces as well as the presence of teachers and personnel trained to carry out recreational activities at shelters. All assessed schools sustained some level of damage. The assessment report includes recommendations to the Ministry of Education and UNRWA, Education cluster partners, and for the education cluster coordination team itself. Two task forces for the Gaza response were activated following this exercise, one on MHPSS and recreational activities and one on Continuity of Education. The assessment of school damage will continue if/when security allows.

Multi-Purpose Cash assistance (MPCA)

Needs:

- Post-distribution monitoring data from recipients of cash assistance indicate that food, water, medicines, hygiene products, and clothing are the top expenditures reported.
- About 81 per cent of respondents reported that unrestricted cash helped them access needed goods and services, either fully or partially.
- Over 95 per cent reported unrestricted cash as their preference for future assistance.

Response:

- Since the beginning of hostilities, 66,870 households (including roughly 449,000 people) received Emergency MPCA.
- Cash out rates across the response stand at 70-75 per cent but have been declining slightly.

- While distribution has been provided across the Gaza Strip, the vast majority is now concentrated in the south.
- Formal market actors, such as supermarkets and retailers are largely depleted and face major challenges in re-stocking and operating. Therefore, informal markets, such as vendors, minimarts, carts, and stalls are reportedly the main source for goods.

Logistics

- The Logistics Cluster launched common storage services in Gaza and Egypt.
- In Gaza, three warehouses, managed by a Logistics Cluster partner, are available for storage in Deir al Balah (495 square metres), Khan Yunis (170 square metres), and Rafah (70 square metres).
- The Logistics Cluster also facilitates transport from Rafah to the three warehouse locations in the Gaza Strip.
- In Port Said, Egypt, 800 pallet positions are available for common storage for the humanitarian community.
- Additionally, a cargo notification service in Rafah will support the access of partners' cargo into Gaza: details of the process in [Standard Operating Procedures](#).
- The Logistics Cluster installed three Mobile Storage Units (MSUs) at the Rafah transshipment base to increase partners' offloading capacity in Rafah with an additional 960 square metres. Three more MSUs have been installed at the UNRWA base in Rafah to increase warehousing capacity.
- An additional eight MSUs will be installed in Gaza by the Logistics Cluster, pending assessment with partners regarding key locations. The IMPACCT Working Group (hosted at the Global Logistics Cluster) held a national workshop on the importation of humanitarian aid with relevant ministries, authorities, the Egyptian Red Crescent, UN and INGOs.

Emergency Telecommunications

- The Emergency Telecommunications Cluster (ETC) continues to coordinate a collective approach among partners for the importation of telecommunications equipment into Gaza.
- On 3 December, the ETC team, UNDSS, the NGO Help, and OCHA met with the Israeli Coordinator of Government Activities in the Territories (COGAT) to discuss the list of technical equipment submitted for importation into Gaza and install an independent connectivity and security communications services for humanitarian responders.
- On 3 December, COGAT authorized the team to import 20 satellite phones into Gaza for humanitarian responders.

Protection against sexual abuse and exploitation (PSEA) remains a cross-cutting priority for all clusters. The SAWA helpline, reachable at 121 and through WhatsApp at +972 59-4040121 (East Jerusalem at 1-800-500-121), operates 24/7. This toll-free number is widely disseminated across all areas of intervention to report cases of SEA and to facilitate emergency counselling and referrals for affected communities to access life-saving services. The PSEA Network monitors calls daily and will increase the number of counsellors if necessary.

The Gaza Strip prior to the current escalation
