**Ministry of Health**

**Health Annual Report  
Palestine 2016**

**General Directorate of Health Policies & Planning**

**Palestinian Health Information Center**

*PHIC*

**July 2017**

## **FOREWORD**

*I am pleased to present the 2016 annual health report for Palestine, issued by Palestinian Health Information Center (PHIC) in General Directorate for Health Policies and Planning in Ministry of Health.*

*The report reflects in statistical numbers the great efforts that the Ministry of Health employed to improve health services to provide them to Palestinian citizens in quality and fairness.*

*As the decision makers and planners increasingly rely on evidence for decision making, this statistical report is a reflection of the activities and achievements of the Palestinian health sector throughout the year 2016.*

*We hope that this report will help and support national and international institutions in improving their delivery of health services and in order to better distribute their resources in a way that achieves the health and well-being of the Palestinian people, hoping that our Palestinian citizens will enjoy a healthy life.*

*We will continue to work hard to achieve the objectives of the National Health Strategic Plan and to improve access to high quality health services that are available to all our Palestinian people, who deserve our best.*

***Dr. Jawad Awwad  
Minister of Health***

## **Introduction**

Under the directives of His Excellency Minister of Health **Dr. Jawad Awwad** and in support of the great efforts exerted by the Palestinian Ministry of Health to continuously enhance its performance to improve the level of health services provided by all levels of prevention, diagnosis and treatment at the Palestinian national level, we are pleased to present you the annual health report, Palestine 2016.

This report presents statistics and indicators that reflect the health situation in Palestine during 2016, and reflects the performance of various government and non-governmental health service providers.

Palestinian Health Information Center (PHIC) in General Directorate of Health Policies and Planning collects, analyzes and publishes health data in Palestine, and has become a reliable reference in this field.

We hope that this report will be a good and useful reference for all Palestinian health workers, researchers, specialists, decision-makers, health policy makers, and international bodies and organizations to look at health data and indicators in Palestine and contribute to the development of the Palestinian health situation.

I would like to seize this opportunity to thank all those who contributed to this report, especially the director and staff of Palestinian Health Information Center (PHIC), staff of General Directorate for Health Policies and Planning, and all those who provided the information center with the data that we have relied upon in this report.

May God Almighty always help us to serve the Palestinian people, who deserve our best.

**Dr. Naim Sabra**  
**Assistant Deputy Minister of Planning**

## Health Indicators 2016

### Population and Demography:

Indicator	Palestine	Indicator	Palestine
<b>Total Population</b> Gaza Strip 1,881,135 West Bank 2,935,368      PCBS	4,816,503	<b>Proportion of Pop. Aged under 5 years (16.8% in GS &amp; 13.7% in WB)</b> PCBS	14.9
<b>Males</b> Gaza Strip 955,971 West Bank 1,491,645      PCBS	2,447,616	<b>Proportion of Pop. Aged under 15 years (42.8% in GS &amp; 36.9% in WB)</b> PCBS	39.2%
<b>Females</b> Gaza Strip 925,164 West Bank 1,443,723      PCBS	2,368,887	<b>Proportion of pop. aged 65 years and above (2.4% in GS &amp; 3.2% in WB)</b> PCBS	2.9%
<b>Male/ Female ratio in general pop (per 100).</b>	103.3	<b>Number of Reported Births (GS 58,170 &amp; 72,327 WB)</b>	130,497
<b>Life Expectancy among pop. (year)</b> PCBS	73.7	<b>Number of Reported Deaths (GS 3,763 &amp; 7,177 WB)</b>	10,940
<b>Life Expectancy among males (year).</b> PCBS	72.1	<b>Reported CBR per 1,000 pop (30.9 in GS Vs in 27.1 WB).</b>	28.7
<b>Life Expectancy among females (year)</b> PCBS	75.2	<b>Reported CDR per 1,000 pop (2.0 in GS Vs 2.7 in WB)</b>	2.4
<b>Median age (years) (18.4 Y in GS &amp; 21.2 Y in WB)</b> PCBS	20.0	<b>Reported Under 5 Mortality Rate (per1,000)</b>	12.2
<b>Total Dependency Ratio 82.1 in GS &amp; 66.6 in WB)</b> PCBS	72.3	<b>Reported Infant Mortality Rate (per1,000)</b>	10.5
<b>Population natural increase rate (3.3% in GS &amp; 2.5% in WB)</b> PCBS	2.8%	<b>Percentage of low birth weight (&lt;2500 gm) of total births</b>	5.9
<b>Percentage of refugees in Palestine Strip out of Total Population</b> PCBS	41.9%	<b>Percentage of unemployment rate (41.7 in GS &amp; 18.2 in WB)</b> PCBS	26.9
<b>Percentage of refugees in Gaza Strip out of Total Population</b> PCBS	66.7%	<b>Crude marriage rate per 1000 pop.</b> PCBS	10.8
<b>Percentage of refugees in WB out of Total Population</b> PCBS	26.0%	<b>Crude divorce rate per 1000 pop.</b> PCBS	1.7
<b>Percentage of rural (2.8% in GS &amp; 25.5% in WB)</b> PCBS	16.4	<b>Percentage of adult literacy rate, 15-24 years</b> PCBS	99.4

### Women Health:

Indicator	Palestine	Indicator	Palestine
<b>Rate of women of childbearing age of total population (23.8 in GS &amp; 25.4 in WB)</b> <b>PCBS</b>	<b>24.8</b>	<b>% of Reported anemia among pregnant women</b>	<b>28.2%</b>
<b>Total fertility rate (4.5in GS &amp; 3.7 in WB)</b> <b>PCBS</b>	<b>4.1</b>	<b>% of Reported anemia among high risk pregnant women</b>	<b>30.4%</b>
<b>% of deliveries in health institution</b>	<b>99.9</b>	<b>% of deliveries at homes</b>	<b>0.1</b>
<b>Maternal mortality rate (15.5 in GS &amp; 12.4 in WB) / 100,000 live births</b>	<b>13.8</b>	<b>% of Reproductive age women deaths of total deaths</b>	<b>3.8</b>

### Primary Health Care:

Indicator	Palestine	Indicator	Palestine
<b>No. of PHC centers in Palestine</b>	<b>739</b>	<b>No. of MOH PHC centers</b>	<b>466</b>
<b>Pop\ PHC centers</b>	<b>6,159</b>	<b>Percent of MOH PHC centers of total PHC centers</b>	<b>63.1%</b>

### MOH Laboratories:

Indicator	West Bank, Palestine
<b>The direct cost per test in MOH hospitals (NIS)</b>	<b>2.7</b>
<b>The direct cost per test in MOH PHC (NIS)</b>	<b>2.5</b>
<b>Lab tests per Person in the population.</b>	<b>2.5</b>
<b>Total transfused blood units</b>	<b>67,027</b>
<b>Transfused blood and blood components units per 100 person\ year</b>	<b>2.3</b>
<b>Total number of blood donors</b>	<b>32,502</b>
<b>Number of MOH hospital lab tests*</b>	<b>50,911,12</b>
<b>Number of MOH PHC lab tests</b>	<b>2,142,143</b>

\*Including Blood Bank and not including Histopathology tests

### Hospitals:

Indicator	Palestine
<b>No. of Hospitals</b>	<b>81</b>
<b>Population \ hospital ratio</b>	<b>59,463</b>
<b>No. of beds</b>	<b>6,146</b>
<b>Population \ bed ratio</b>	<b>784</b>
<b>Beds Per 10,000 Pop.</b>	<b>12.8</b>
<b>MOH Hospital Indicators</b>	
<b>No. of Hosp</b>	<b>27</b>
<b>Population\ hospital ratio</b>	<b>178,389</b>
<b>No. of beds</b>	<b>3,325</b>
<b>population bed ratio</b>	<b>1,449</b>
<b>Beds Per 10,000 Pop.</b>	<b>7</b>
<b>Average length of stay (days)</b>	<b>2.2</b>
<b>Bed occupancy rate (%)</b>	<b>91.9</b>
<b>West Bank MOH Hospital Indicators</b>	
<b>No. of Admissions</b>	<b>226,943</b>
<b>No. of Hospitalization days</b>	<b>498,179</b>
<b>No. of Births</b>	<b>36,050</b>
<b>% of Caesarian Sections</b>	<b>24.9</b>
<b>No. of Operations</b>	<b>59,278</b>
<b>No. of Deaths</b>	<b>2,535</b>
<b>Treatment without hospitalization</b>	<b>1,446,326</b>

### Human Resources:

Specialty	Palestine / 10,000 Pop.
<b>Physicians*</b>	<b>21.7</b>
<b>Dentists</b>	<b>6.6</b>
<b>Pharmacist</b>	<b>10.0</b>
<b>Nursing</b>	<b>20.9</b>
<b>Midwifery</b>	<b>2.0</b>

\*Physicians = General and Specialists

### Purchasing Health Services:

Indicator	Palestine		
	West Bank	Gaza Strip	Total
<b>Total number of patients referred to treatment outside MOH facilities</b>	<b>67,311</b>	<b>24,616</b>	<b>91,927</b>
<b>Estimated cost (NIS) of patients referred to treatment outside MOH facilities</b>	<b>401,772,673</b>	<b>164,948,307</b>	<b>566,720,980</b>
<b>Total number of patients referred to treatment outside MOH facilities inside Palestine</b>	<b>58,579</b>	<b>18,370</b>	<b>76,949</b>
<b>Estimated cost (NIS) of patients referred to treatment outside MOH facilities inside Palestine</b>	<b>318,738,965</b>	<b>121,743,894</b>	<b>440,482,859</b>
<b>Total number of patients referred to treatment outside MOH facilities outside Palestine</b>	<b>8,732</b>	<b>6,246</b>	<b>14,978</b>
<b>Estimated cost (NIS) of patients referred to treatment outside MOH facilities outside Palestine</b>	<b>83,033,708</b>	<b>43,204,413</b>	<b>126,238,121</b>
<b>Estimated cost (NIS) per patient referred to treatment inside Palestine</b>	<b>5,441</b>	<b>6,627</b>	<b>5,724</b>
<b>Estimated cost (NIS) per patient referred for treatment outside Palestine</b>	<b>9,509</b>	<b>6,917</b>	<b>8,428</b>

### Non Communicable Diseases:

Indicator	Palestine
<b>Reported Cancer incidence rate (per 100,000 pop)</b>	<b>86.4</b>
<b>Reported Diabetes Mellitus incidence rate (per 100,000 pop)</b>	<b>192.8</b>
<b>% of Reported Cardiovascular deaths of all deaths</b>	<b>30.6</b>
<b>% of Reported Cancer deaths of all deaths</b>	<b>14.8</b>
<b>% of Reported Cerebrovascular deaths of all deaths</b>	<b>12.8</b>
<b>% of Reported Diabetes Mellitus deaths of all deaths</b>	<b>8.0</b>

**Communicable Diseases:**

Diseases	Gaza Strip IR/ 100,000	West Bank IR/ 100,000	Palestine IR/ 100,000
Acute Flaccid Paralysis	2.0	3.0	2.6
Poliomyelitis	0	0	0
AIDS	0.00	0.19	0.11
HIV Infection	0.00	0.07	0.04
Cholera	0	0	0

## **Executive Summary**

This annual health statistics report, Palestine 2016, is developed by the Palestinian Health Information Center. Through this report, we provide interested parties, specialists and researchers with health statistics and indicators at the national level, despite all the obstacles that we face in our work to obtain health data from various sources throughout Palestine.

### **Palestinian Health Information Center (PHIC):**

Palestinian Health Information Center (PHIC) is responsible for preparing the health information and providing health indicators on the Palestinian health situation.

The mission of the Palestinian Health Information Center is to build a national health information system that utilizes the latest technology in data collection, archiving, analyzing, dissemination and distribution to make it available for use by healthcare providers, institutions, students, researchers and parties interested in health issues.

### **Annual Health Report, Palestine 2016:**

This report has three sections: Section one on the demographic situation in Palestine, Section two on the Palestinian health system and Section three on health trends in Palestine.

### **Section one: Demographic Trends**

#### **Population:**

In 2016, the estimated population of Palestine was 4,816,503, including 426,533 inhabitants of Jerusalem, the eternal capital of the State of Palestine.

The population distribution shows that 60.9% live in the northern governorates (West Bank) and 39.1% in the southern governorates (Gaza Strip).

Population distribution by sex shows that 50.8% of the population is male and 49.2% is female.

#### **Distribution of Population by Age Groups:**

Palestinian society remains a young society. In 2016, in Palestine, the percentage of children under five years of age is 14.9% of the total of population. The percentage of children in the 0-14 age group is 39.2%, while the percentage of the population aged 65 years and above is 2.9%.

#### **Total Fertility Rate:**

According to the Palestinian Central Bureau of Statistics (PCBS), the total fertility rate among women of childbearing age 15-49 years in 2016 is 4.1 births per woman in Palestine, 4.5 in Gaza Strip and 3.7 in West Bank.

#### **Crude Birth and Death Rate:**

According to data from the Palestinian Health Information Center, the crude birth rate in 2016 was 28.7 per 1000 population, while the crude death rate in the same year was 2.9 per 1000 population.

### **Births:**

In 2016, the number of births reported in Palestine was 130,497 of which 72,327 were born in West Bank, (55.4% of all births)) and 58,170 in Gaza Strip, (44.6% of all births reported in 2016).

Data on births reported that 99.9% of births occurred at qualified health facilities in Palestine by specialized and / or trained medical personnel. The percentage of home births in Palestine in 2016 was only 0.1% of the total number of births in Palestine.

53.6% of births in Palestine in 2016 were carried out in MoH hospitals; the MoH provides full financial coverage for child birth for women ensured by the Ministry of Health.

### **Deaths:**

In 2016, the number of reported deaths in Palestine was 10,940, with 7,177 deaths occurred in West Bank, accounting for 65.5% of the reported deaths in Palestine while in Gaza Strip 3,763 deaths occurred, accounting for 34.4% of the reported in Palestine.

Cardiovascular disease was the main leading cause of deaths in Palestine, reported at 30.6% of total deaths in 2016, followed by cancer reported at 14.0%, while stroke was the third leading cause of death reported at 12.8% from the total deaths. The forth cause of death was, related to complications in the perinatal period which accounted for 8.0% of total deaths, with complications of diabetes also with 8.0% of all deaths.

It is important to note that, the four causes of chronic diseases including cardiovascular disease, cancer, stroke and diabetes accounted for 65.4% of all reported deaths in 2016.

### **Maternal Mortality:**

In 2016, the reported maternal mortality rate in Palestine was 13.8 deaths per 100,000 live births. 12.4 deaths per 100,000 live births in West Bank and 15.5 deaths per 100,000 live births in Gaza Strip.

While in 2015, the maternal mortality rate reported in Palestine was 15.7 deaths per 100,000 live births. In 2014, the reported maternal mortality rate in Palestine was 24.7 deaths per 100,000 live births, while in 2013 the reported maternal mortality rate in Palestine was 24.1 deaths per 100,000 live births.

## **Section Two: Palestinian Health System**

### **Primary Health Care:**

Since the Ministry of Health assumed its responsibilities at the end of 1994, the Ministry has emphasized the importance of implementing the principles of primary health care (PHC). Primary health care is provided by various health service providers including the Ministry of Health, non-governmental organizations, the United Nations Relief and Works Agency for Palestine Refugees (UNRWA) and military medical services. The centers of the Ministry of Health constitute 63.1% of the total centers working in the field of primary health care in Palestine.

The number of PHC centers expanded from 454 in 1994 to 739 in 2016, with an increase of 62.8% since 1994.

In the year 2016, the total number of visits to PHC physicians in West Bank was 2,470,451, while the number of to PHC nurses was 2,381,519.

Out of the total, 2,076,213 visits were for general clinics.

## **Family Planning Program:**

Family planning program is an important aspect of service provision at by the Ministry of Health.

In 2016, there were 306 MoH centers providing family planning services in West Bank, and the number of new beneficiaries registered in those clinics was 36,877 beneficiaries. The contraceptive pills used by Palestinian women during 2016 accounted for 69.6% of the total means used, while condoms ranked second reaching 17.3%, followed by the IUDs12.5%, for injections 0.5%, and 0.05% for suppositories use.

## **Dental Health:**

In 2016, the total number of PHC facilities that provided dental services in West Bank was 37, of those 28 had computerized dental health information system.

A total of 52,782 visits were recorded in the MoH dental clinics in the West Bank.

## **Laboratories and Blood Banks:**

Ministry of Health has 203 laboratories in West Bank, including the central laboratory 14 laboratories in hospitals and 188 laboratories in Primary Health Care centers.

During 2016, the laboratories of MoH in West Bank completed 7,246,847 laboratory tests, including pathological examinations.

The number of staff working MoH laboratories and blood banks in West Bank was 565 technicians, administrative and specialists.

The total number of blood donors in MoH in West Bank was 32,502, of which33.1% were voluntary donors, and 66.9% were relatives or acquaintances.67,027 units of blood were donated to patients in West Bank.

All donated blood units are subjected to laboratory tests for hepatitis B and C viruses, and HIV.

## **Secondary Health Care (Hospitals):**

Ministry of Health is considered the main provider of secondary health care services (hospitals) in Palestine. There are 81 hospitals in West Bank and Gaza Strip with a bed capacity of 6,146 beds. 51 of the total hospital are in West Bank including East Jerusalem with a total bed capacity of 3,747 beds, while the rest are in Gaza Strip. Of the total hospitals, 27 of them are owned and operated by the Ministry of Health with a total bed capacity of 3,325 beds.

In Palestine, Non-Governmental Organizations have 34 hospitals with a capacity of 2,061 beds and the private sector has 16 hospitals with a capacity of 536 beds.

UNRWA has one hospital in Qalqilya with the capacity of 63 beds.

Military medical services have three hospitals in Gaza Strip with capacity of 161 beds.

The hospital beds of Ministry of Health cover almost all specialties, including general surgery services and subspecialties, internal medicine, pediatrics, psychiatric and other specialties.

Rehabilitation and physiotherapy services are offered by non-governmental organizations.

MoH hospitals also provide services to patients through outpatient clinics, emergency departments and haemodialysis units. There are 11 kidney dialysis units in hospitals of the Ministry of Health in West Bank and in addition to one unit in An-Najah National University hospital in Nablus with a total of 183 machines. In 2016, a total of 147,494 haemodialysis sessions took place in total.

Diagnostic radiological and laboratory services are provided in MoH hospitals, with a total of 643,324 Medical graphics conducted in West Bank in 2016.

## **Manpower:**

Since the establishment of the Palestinian National Authority, the Ministry of Health is striving to meet the growing health needs of the Palestinian population.

**Table (1) Distribution of Number of MoH Employees in 2016 Compared to 1995**

Years	* Physicians	** Nursing	Paramedical Professionals	Administrators	Total
<b>1995</b>	<b>963</b>	<b>1,634</b>	<b>804</b>	<b>1,357</b>	<b>4,758</b>
<b>2016</b>	<b>2,529</b>	<b>4,142</b>	<b>1,574</b>	<b>5,525</b>	<b>13,77</b>

\* Includes physicians (general and specialists) and dentists.

\*\* Includes nursing and midwifery

## **Health Expenditure:**

According to the data of the General Department of Finance in the Ministry of Health, the current budget of MoH for the year 2016 was NIS 1,711,900,000 (one billion, seven hundred and eleven million and nine hundred thousand). Salaries accounted for 50% of the total budget.

The balance of arrears (for revolving debt from 2015 and earlier) was NIS 604,700,216. The purchase of service from outside the MoH facilities constituted the largest proportion of expenditure which accounted for 55% of the total expenditure.

## **Section Three: Trends in Health Status**

### **Infectious Diseases:**

In recent years, Ministry of Health has achieved remarkable successes in controlling several infectious diseases. No cases of leprosy or diphtheria have occurred in Palestine since 1982. No cases of polio have been reported since 1988. No cases of rabies or cholera have been reported despite the presence of these diseases in neighboring countries.

### **Non-communicable diseases:**

Epidemiological changes affect morbidity trends as well as mortality trends in Palestine, when infectious diseases are controlled and reduced, chronic diseases are on the rise as a major cause of morbidity and mortality. The increase in chronic diseases is associated with changes in lifestyle, behavior, physical inactivity and poor eating habits. This also contributes to increased rates of cancer, cardiovascular disease, diabetes and mental disorders.

## Section One

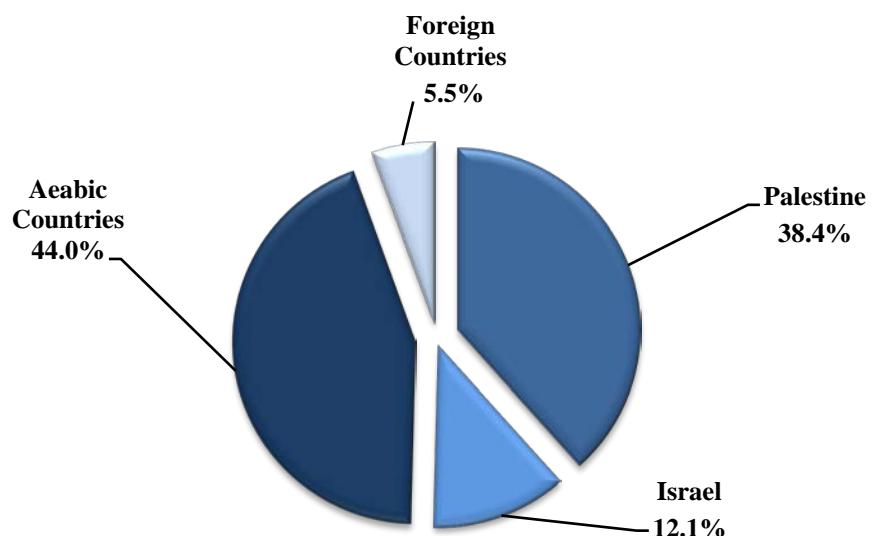

### Demographic Situation in Palestine 2016

#### 1. Population and Demography:

##### 1.1 Palestinians in Diaspora and Palestine:

At the end of 2016, the Palestinian Central Bureau of Statistics (PCBS) estimated the number of Palestinians in the world at 12.70 million, distributed according to place of residence by 4.88 million in State of Palestine, representing 38.4% of the total number of Palestinians in the world, and about 1.53 million Palestinians living within the Green Line 12.1% in Israel, while the number of Palestinians in the Arab countries is 5.59 million, or 44.0% of the total number of Palestinians in the world, and the number of Palestinians in foreign countries is about 695 thousand, or 5.5% of the total number of Palestinians in the world .

**Graph (1) Proportional Distribution of Palestinian Population by Country of Residence, 2016**

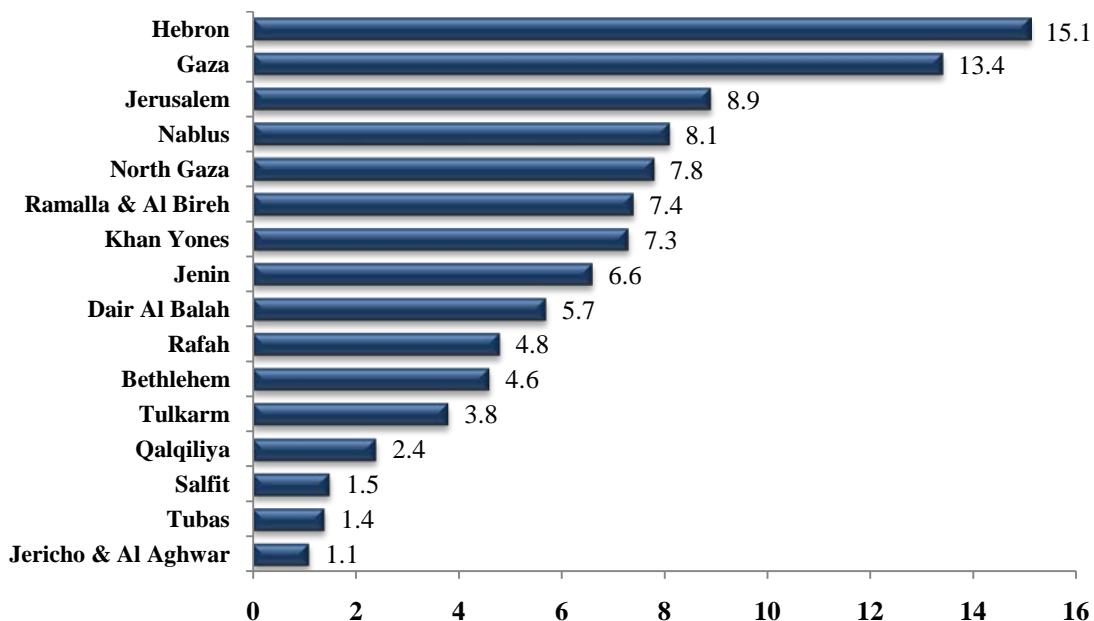

##### 1.2 Palestinian Population in Palestine:

The Palestinian Central Bureau of Statistics (PCBS) estimates that in the middle of 2016 the total population of Palestine is 4,816,503 people, about 2.44 million males compared to 2.36 million females. The estimated population of West Bank is 2.93 million, 60.9% of which 1.49 million males compared to 1.44 million females. On the other hand, the population of Gaza Strip for the same year is about 1.88 million, 39.1% of the total population of Palestine, including 955 thousand males compared to 925 thousand females.

Hebron governorate is the largest governorate in West Bank with 15.1% of the population, considered the highest percentage of the population in Palestine, followed by Gaza governorate (13.4%), then by Jerusalem governorate with 8.9%. Jericho and Al Aqaba has the lowest population recorded at 1.1% of the total population in Palestine.

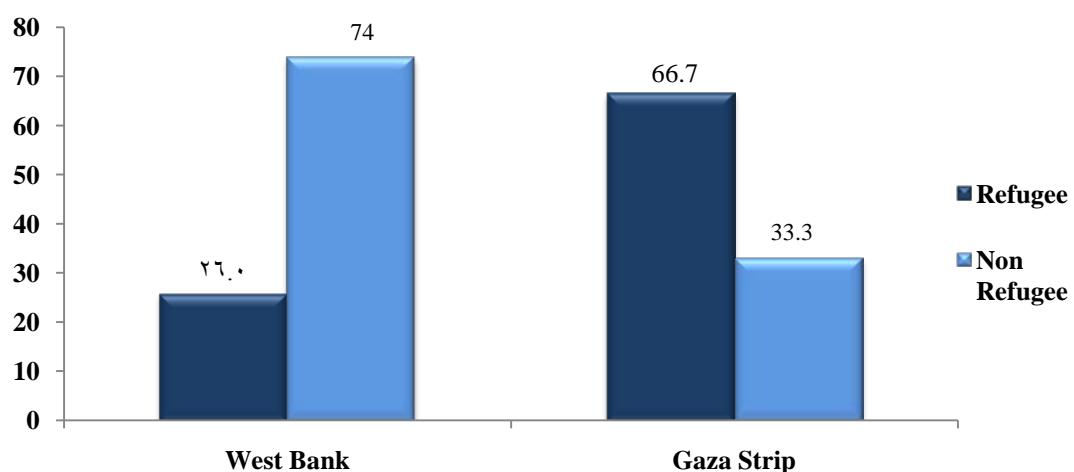

**Graph (2) Proportional Distribution of Population by Governorate, Palestine 2016**

### 1.3 Palestinian Refugee in State of Palestine:

41.9% of the population in the State of Palestine is refugees, about 2.05 million refugees, of whom 773,000 are refugees in West Bank; 26.0% of the total population of West Bank, and 1.28 million refugees in Gaza Strip; 66.7% of the total population of Gaza Strip.

**Graph (3) Proportional Distribution of Palestinian Population by the refugee situation & region, Palestine 2016**

### 1.4 Age Structure:

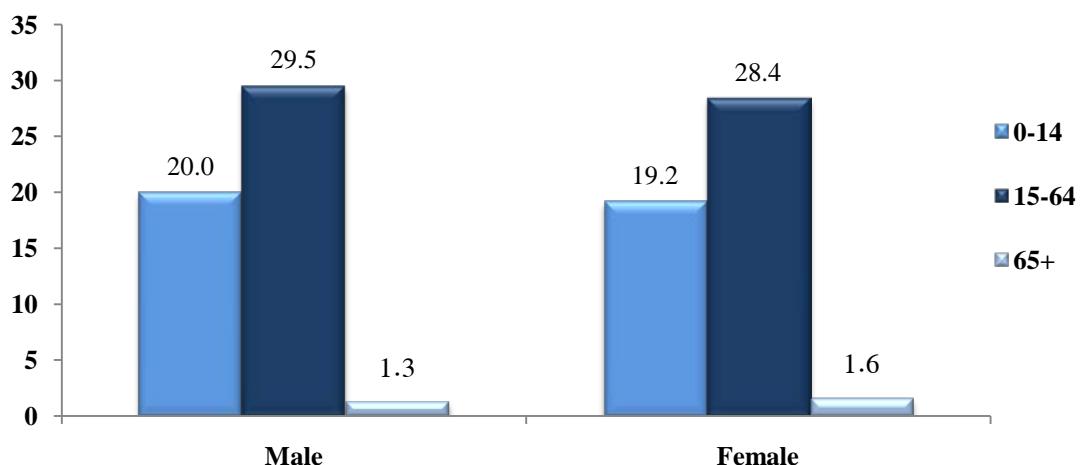

The population pyramid shows that the Palestinian society is a young society. The population pyramid is composed of young people under the age of 15 with the percentage of 39.2% of the total population in Palestine, 36.9% in West Bank and 42.8% in Gaza Strip.

The percentage of individuals aged 65 and over in 2016 is 2.9%, with a difference between West Bank and Gaza Strip, 3.2% in West Bank and 2.4% in Gaza Strip.

**Table (2) Distribution of Population by Age Group & Sex, Palestine 2016**

Age Group (Years)	Males		Females		Total	
	No.	%	No.	%	No.	%
0 - 14	963,470	20.0	923,266	19.2	1,886,736	39.2
15 - 64	1,423,131	29.5	1,366,494	28.4	2,789,625	57.9
65+	61,015	1.3	79,127	1.6	140,142	2.9
Total	2,447,616	50.8	2,368,887	49.2	4,816,503	100

**Graph (4) Proportional Distribution of Population by Age Group & Sex, Palestine 2016**

### 1.5 Population Natural Growth Rate:

The rate of natural increase in the population in 2016 in Palestine was 2.8%, 2.5% in West Bank and 3.3% in Gaza Strip. It is worth mentioning that, the low level of mortality and high fertility rates maintain the rate of natural increase of the population.

### 1.6 Dependency Ratio:

The dependency ratio in Palestine declined from 100.6% in 2000 to 72.3% in 2016. It is noted that there is a significant difference in the dependency ratio between West Bank and Gaza Strip, which decreased in West Bank from 94.3 in 2000 to 66.6 in 2016, From 112.8 in 2000 to 82.1 in 2016.

### 1.7 Ratio of Males to Females:

The estimated number of males in the year 2016 in Palestine was about 2.44 million males compared to 2.36 million females, with a gender ratio of 103.3 males per 100 females. The number of males in West Bank was 1.49 million males compared to 1.44 million females

with a gender ratio of 103.3. Gaza Strip has 955 thousand males compared to 925 thousand females, with a gender ratio of 103.3.

### **1.8 Percentage of Females of Reproductive Age (15-49) Years:**

The number of females of reproductive age (15 - 49 years) was 1,195,588, accounting for 24.8% of the total population in 2016 with the distribution of 746,758 in West Bank; 25.4% of the total population in West Bank and 448,830 in Gaza Strip, representing 23.9% of the total population in Gaza Strip.

### **1.9 Total Fertility Rate:**

According to the Palestinian Central Bureau of Statistics (PCBS), the total fertility rate in Palestine declined to 4.1 births, 4.5 in Gaza Strip and 3.7 in West Bank.

### **1.10 Life Expectancy:**

As a result of the improvement in the health conditions in Palestine and the gradual decline in infant, child mortality rates and maternal mortality, life expectancy has increased. The life expectancy in 2016 is 73.7 years, 72.1 years for males and 75.2 years for females, with a difference between West Bank and Gaza Strip. In West Bank, it was 74.0 years; 72.4 years for males and 75.5 years for females.

In Gaza Strip, life expectancy was 73.1 years; 71.5 years for males and 74.6 years for females.

## **1.11 Reported Live Births 2016:**

### **1.11.1 Reported Live Births by Region:**

The number of births reported in 2016 in Palestine was 130,497, of which 72,327 were born in West Bank, 55.4% of the reported births, while 58,170 were born in Gaza Strip; 44.6% of the reported births.

### **1.11.2 Reported Live Births by Sex:**

In 2016, the number of reported live male births was 66,741, 51.1% of total reported of live births, while the number of female births was 63,756, or 48.9%. In West Bank there were 37,385 reported male births, the number of reported female births was 34,942, representing 48.3% of total reported births. In Gaza Strip, 29,356 live births were reported, or 50.5% were born in Gaza Strip, while the number of female births was 28,814; 49.5% of the total number of births in Gaza Strip.

### **1.11.3 Reported Live Births by Place of Birth:**

The percentage of reported live births in 2016 and those born in health facilities (hospitals and birth centers) was 99.9%.

The percentage of reported live births at homes was only 0.1% of total reported live births in Palestine in 2016.

### **1.11.4 Crude birth rate in Palestine:**

In 2016, the reported crude birth rate in Palestine was 28.7 births per 1000 population. In West Bank, 27.1 births per 1000 population were recorded and 30.9 births per 1000 population in Gaza Strip.

### **1.11.5 Reported Birth Weights 2016:**

The percentage of newborns weighing less than 2,500 g in Palestine was 5.9% of total newborns.

## Section II

### Health System in Palestine

#### **2. Health System in Palestine:**

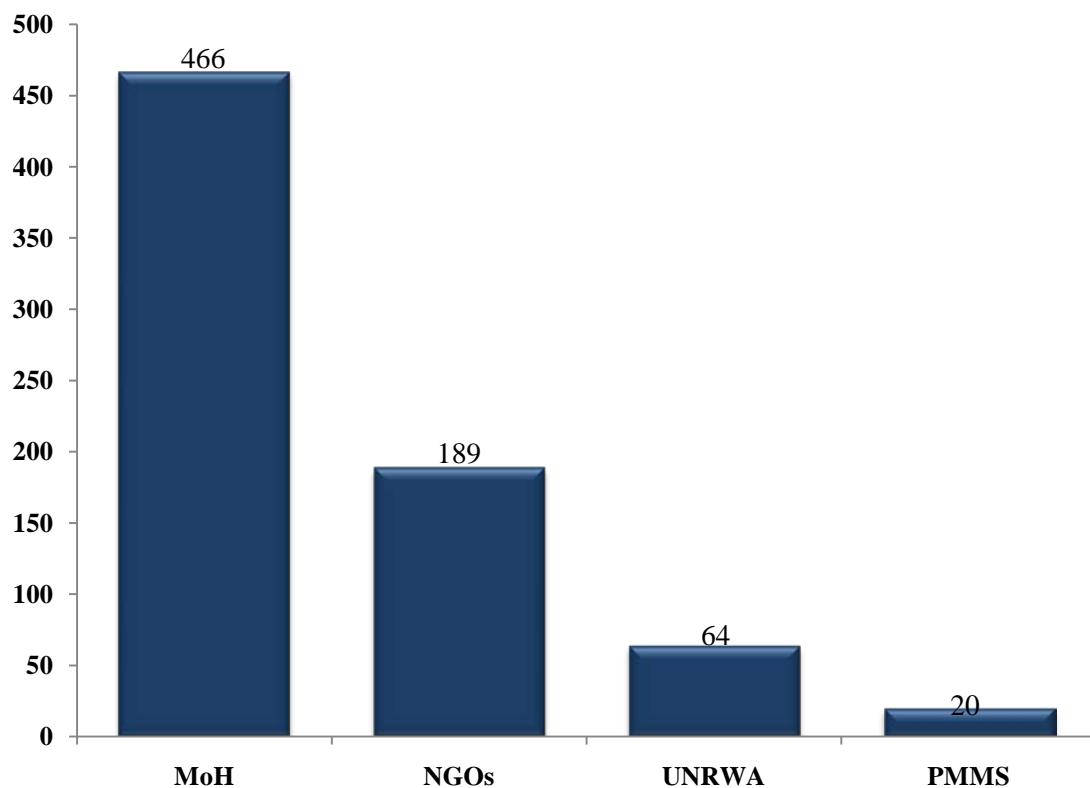

##### **2.1. Primary Health Care in Palestine:**

###### **2.1.1 Primary Health care centers in Palestine by Health Provider Sector:**

The number of PHC centers in Palestine reached to 739 in 2016, of which 587 are in West Bank and 152 in Gaza Strip.

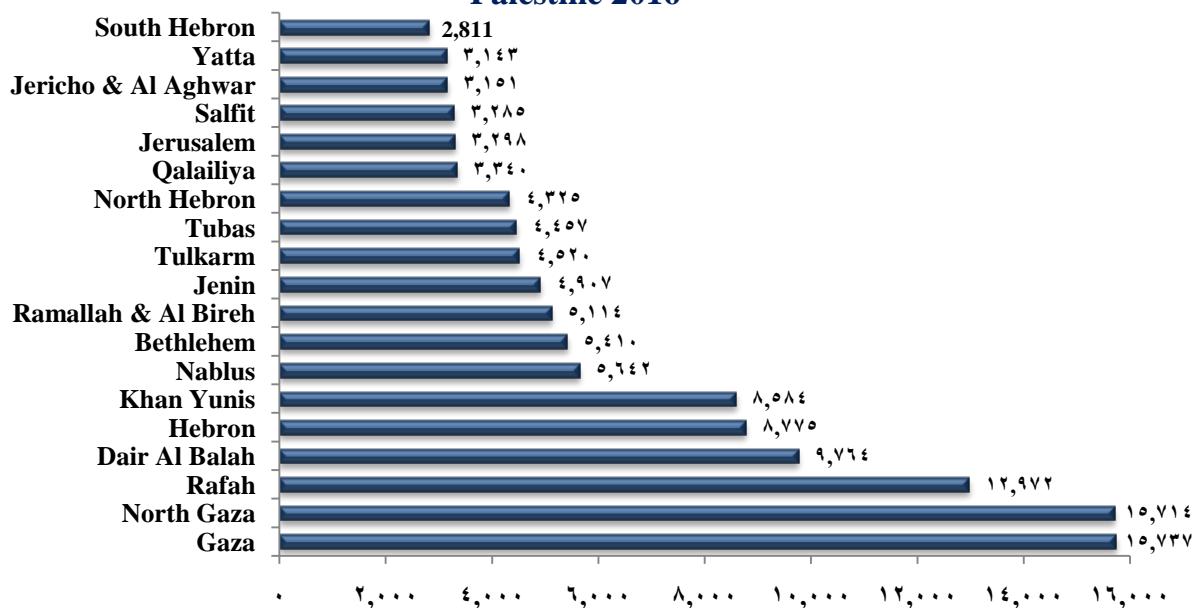

466 primary health care centers belong to the Palestinian MoH, which constitutes 63.1% of the total number of primary health care centers. The number of primary healthcare centers managed by NGOs reached 189, constituting 25.6% of all Primary health care facilitates, while the number of UNRWA centers reached 64, and the military medical centers reached to 20 centers.

**Graph (5) Distribution of PHC Centers by Health Care Provider Sector,  
Palestine 2016**

Population rate per health center in Palestine was 6,159 by person; it was 4,549 people per health center in West Bank and 12,376 people per health center in Gaza Strip.

**Graph (6) Distribution of Population Rates per PHC Center by Governorate, Palestine 2016**

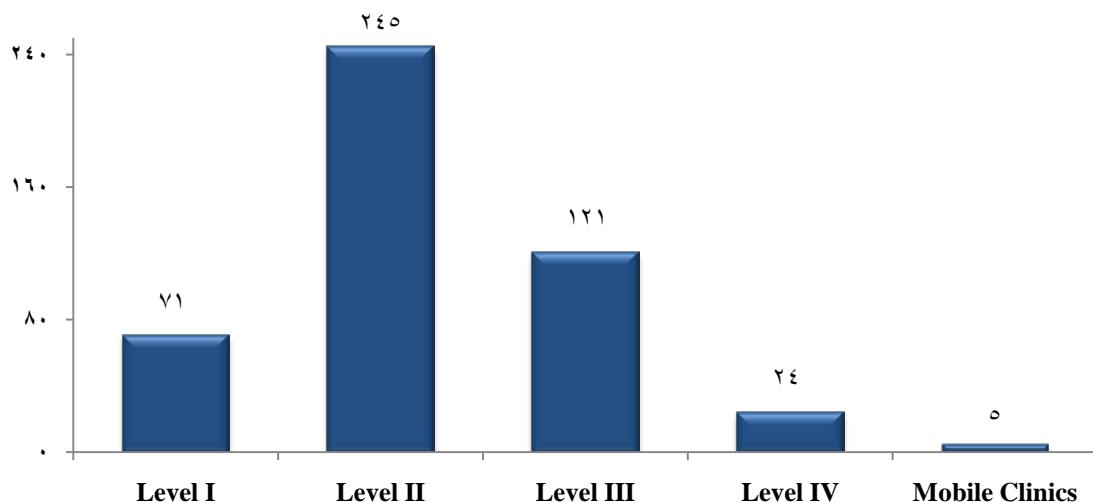

### 2.1.2 PHC Centers by Level:

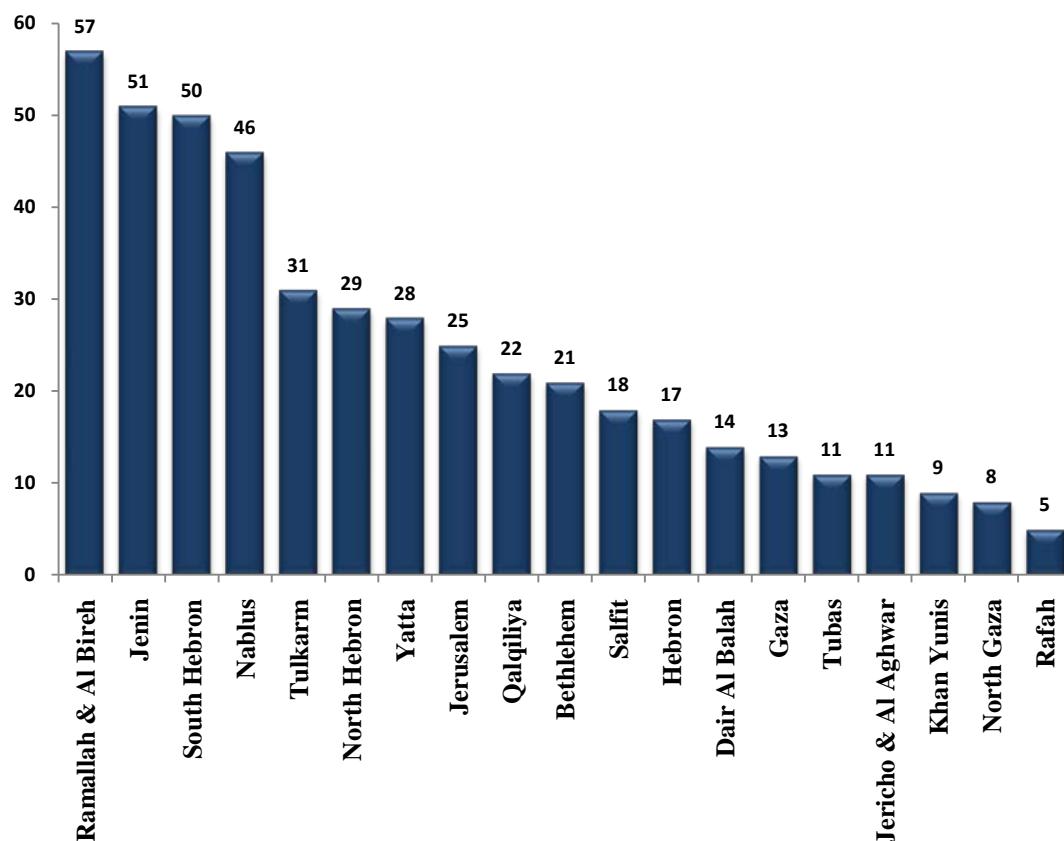

The number of PHC centers of MOH in Palestine increased from 203 in 1994 to 466 in 2016, with variation rate of 129.6%.

The MOH classifies PHC centers into four levels of which 71 clinics are level one, constituting 15.2% of the total centers of MOH and 245 clinics are level two, accounting for 52.6% of the total clinics, 121 clinics were classified as level three 26.0% of the total centers and 24 clinics are level four; 5.1% of the total centers. In addition, five PHC mobile clinics provide health services in Jericho and Al Aghwar, Jerusalem, Bethlehem and Yatta Governorates. These five mobile clinics constitute 1.1% of the total clinics.

**Graph (7) Distribution of Number of PHC Centers by Level of Services, Palestine 2016**

**Graph (8) Distribution of Governmental PHC Centers by Governorates, Palestine 2016**

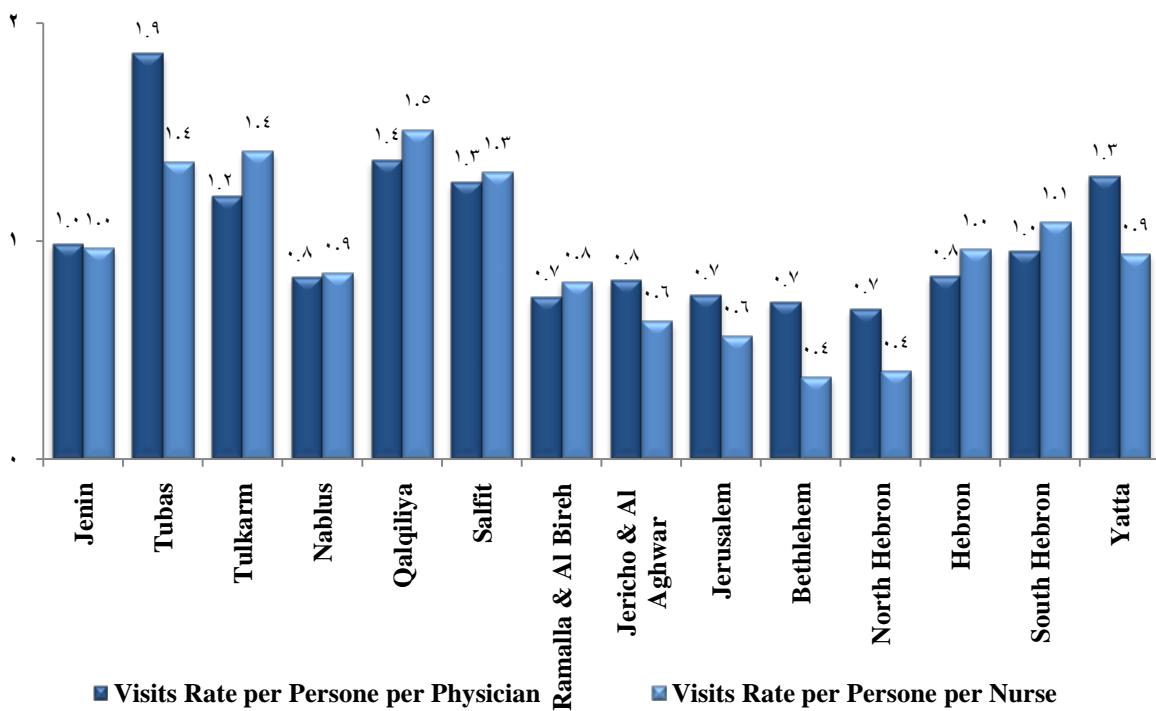

PHC centers in MoH, offer a range of health services, 306 centers provide family planning services, 234 provide specialized services, 37 provide oral and dental health services, and 188 provide laboratory services. The high risk pregnancy service is available in 72 clinics, while mammography is provided at 12 clinics and X-ray service in 15 centers in MOH in West Bank.

### 2.1.3 PHC Services:

In 2016, there were 2,470,451 visits seen by doctors. The average number of patient's visits per doctor's visits per year was 0.9. Tubas governorate recorded the highest number of patients' visits per doctor's visit averaging at 1.9 patient visits per doctor visit per year. Ramallah, Jerusalem, Bethlehem and northern Hebron, recorded the lowest, which was 0.7 visits per person per year.

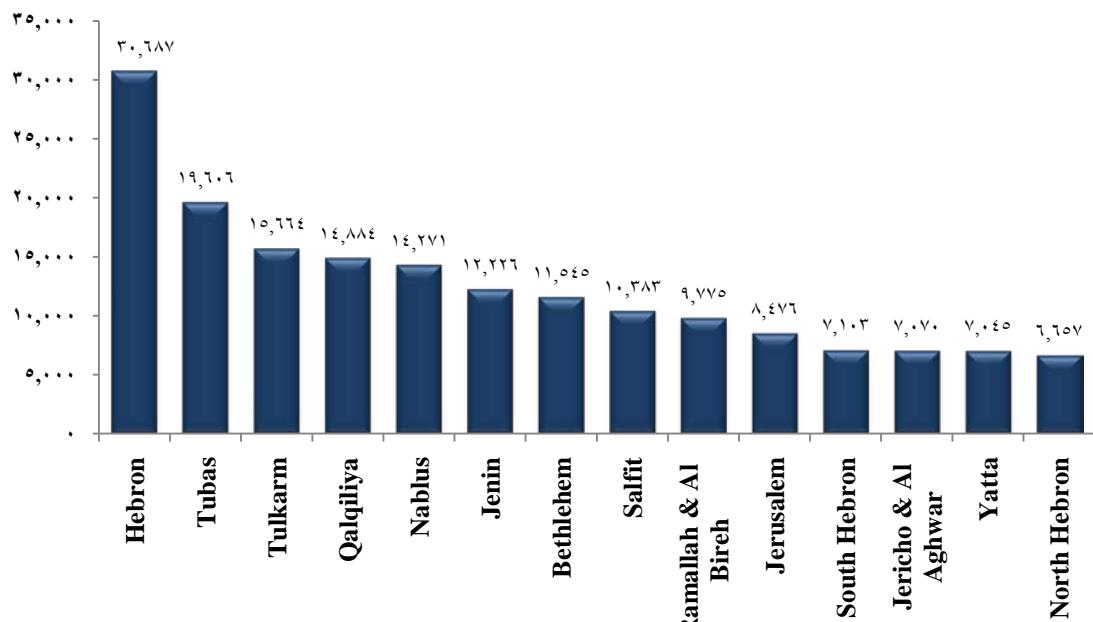

The total number of visits seen by nurses was 2,381,519. The average number of patients' visits per nurse per year for was 0.9. Qalqiliya are corded the highest number of patients visits to nurses, which were 1.5 visits. Bethlehem and northern Hebron were recorded the lowest number of visits which was 0.4 patient's visits per nurse per year.

**Graph (9) Distribution of Visits Rate to Physician & Nurses in MoH PHC Centers per year, Palestine 2016**

Rate of patients visits by clinic in 2016, was 11,635. Hebron Health Directorate recorded the highest rate of visits to the clinic, reaching 30,687. North Hebron Health Directorate recorded the lowest rate of visits to 6,657.

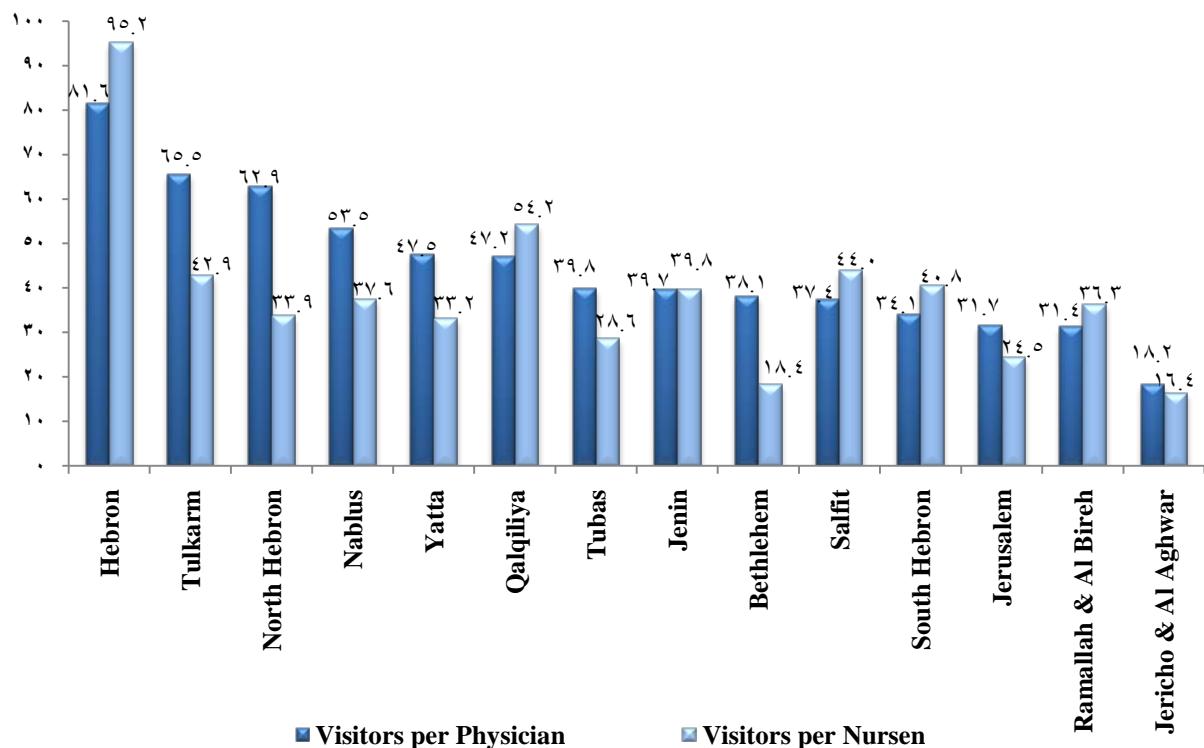

**Graph (10) Distribution of Visits Rate per PHC Center by Governorate, West Bank, Palestine 2016**

## 2.1.4 Visitors to General Clinics in MoH PHC Centers:

In 2016 was registered 2,076, visits was in all PHC clinics in West Bank through 48,011 physicians visits to clinics. The rate of visitors to physicians in each visit was 43.2 visitors. The highest rate of visits was recorded by Hebron Health Directorate, with 81.6 visitors per physician. Jericho and Al Aghwar were the lowest rate, at 18.2 visitors per physicians' visit. While 2,021,879 visits was registered to nurses during the same period through 52,111 nursing visits, with a rate of 38.8 visitors per nursing visit. Hebron recorded the highest rate of follow up nursing visits per visit, reaching 95.2 follow up visitors per visit, while the lowest in Jericho and Al Aghwar was 16.4 visitors per every nursing visit.

**Graph (11) Distribution of Visitors Rate per Physician in PHC General Clinics by Health Directorate, West Bank, Palestine 2016**

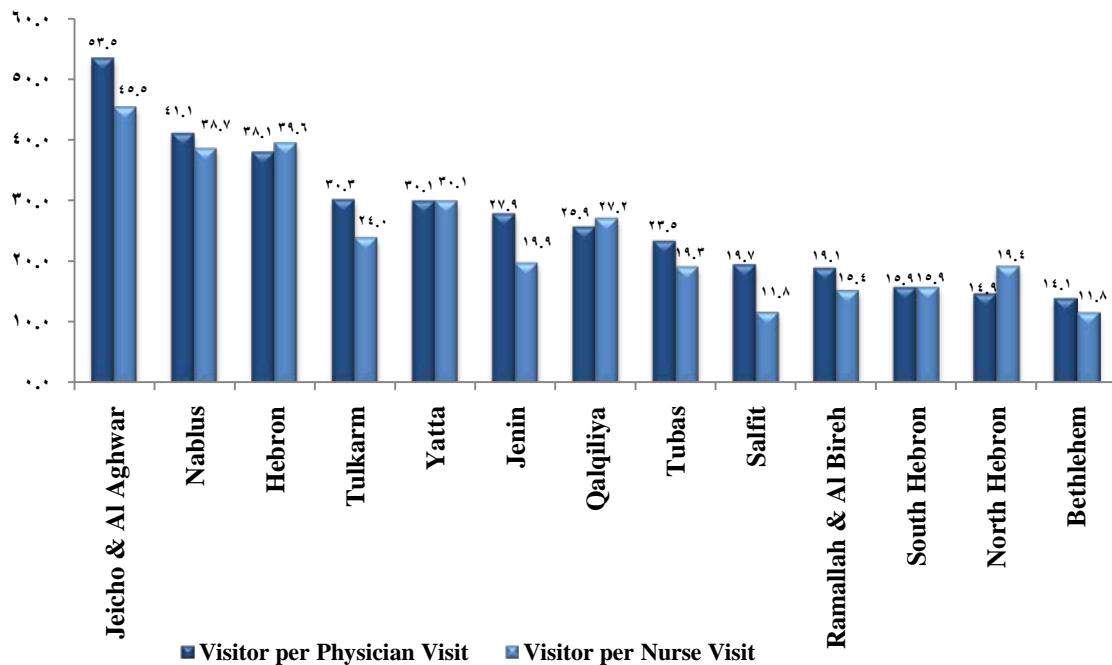

## 2.1.5 Specialized Clinics Visitors in MoH PHC Centers:

### - Patients Visits in West Bank:

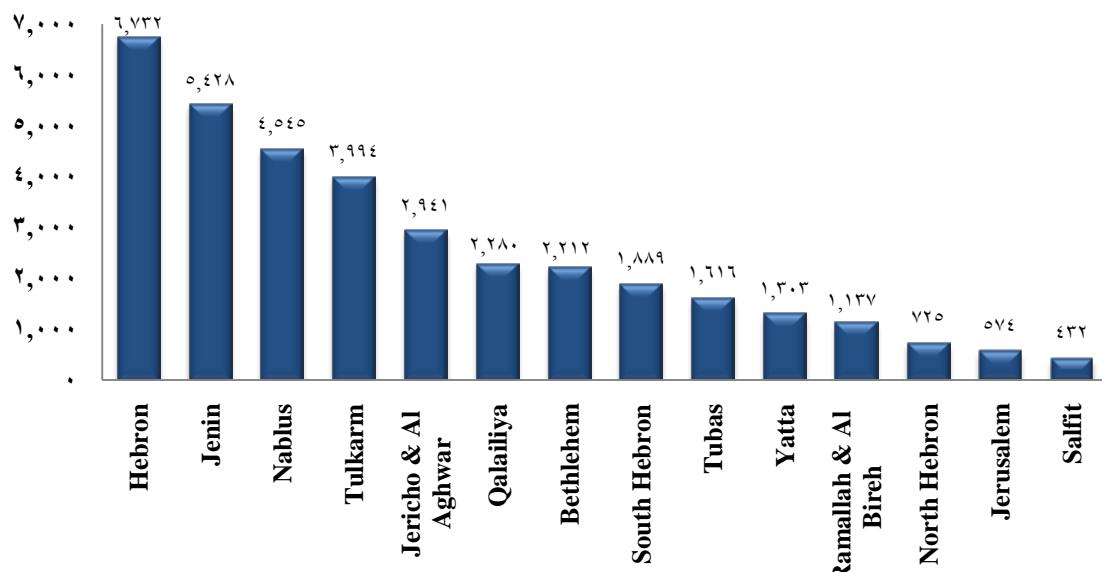

In 2016, the total number of patient visits to specialized clinics in MoH PHC centers reached 423,943 visits to different specialties offered, which provided services through 234 PHC facilities offering specialized treatment services in MoH PHC centers in West Bank. 17,169 physician visits were recorded with rate of 23.0 visitors per specialist visit to the clinic, while 359,640 visits registered to nurse services during the same period with a total of 17,226 nurse visits and a rate of 20.9 visitors per one nursing visit.

**Graph (12) Distribution of Visitors per Physician & Nurses in Specialized MoH PHC Centers by Health Directorate, West Bank, Palestine 2016**

PHC provides a variety of specialized medical services. During 2016, specialized services were provided through Dermatology clinics, Paediatrics, Diabetic, Psychiatry, Risk pregnancy, Pulmonology, Gynecology, Orthopedic, ENT, Communicable and Non-Communicable disease, and Endocrinology.

**Graph (13) Distribution of Visits Rates to each MoH PHC Specialized Clinics per Health Directorate, West Bank, Palestine 2016**

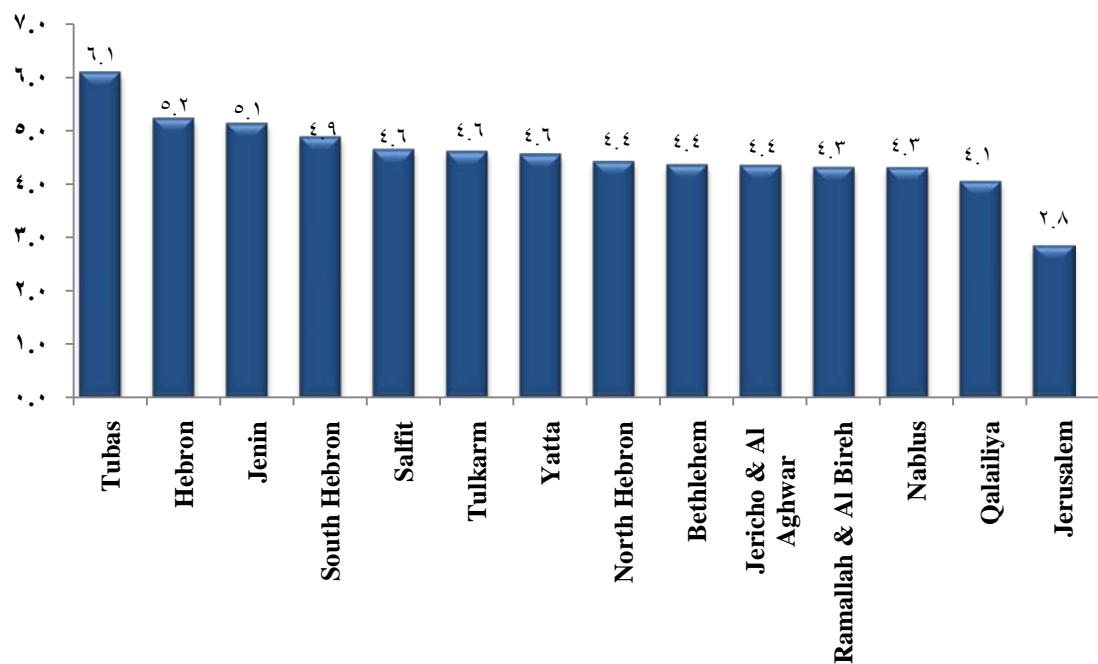

## 2.2 Mother and Child Health (MCH):

### 2.2.1 Maternity Care (Prenatal and Postpartum):

#### 1. Care for Pregnant Women:

In 2016, the total number of pregnant visits to PHC centers was 150,698. The total number of pregnant women registered (first visit) in the MOH PHC centers was 32,691, with coverage of 45.2% of pregnant women; the average visit rate for pregnant women to the centers during pregnancy was 4.6 visits.

**Graph (14) Distribution of Pregnant Women Visits Rates to PHC Centers during Pregnancy by Health Directorate, West Bank, Palestine 2016**

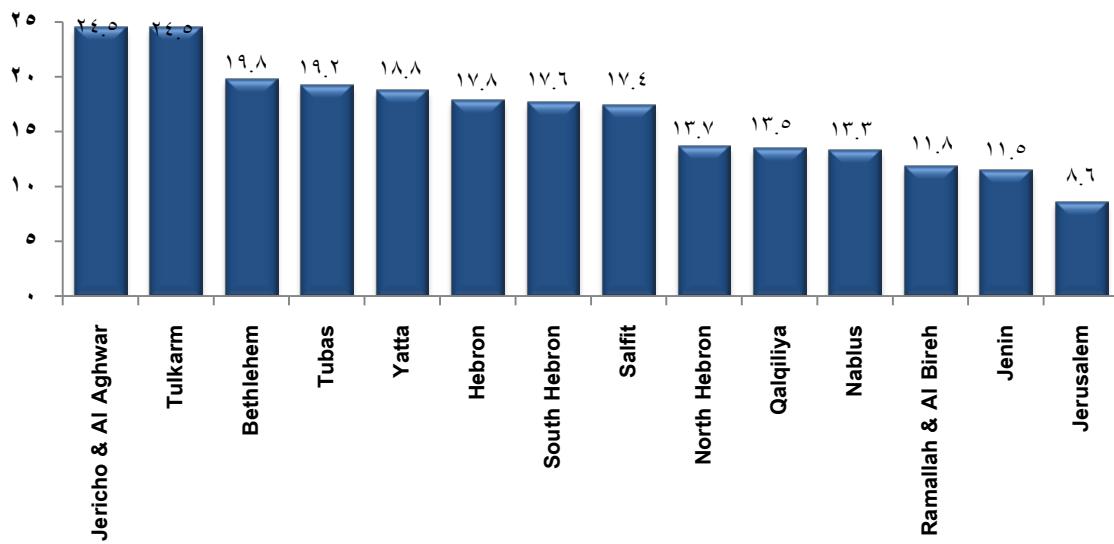

#### 2. High Risk Pregnancy (HRP):

In 2016, 5,067 pregnant women were referred to high risk pregnancy clinics which constituted 15.5% of total pregnant women registered in different MoH MCH clinics, while total visits to high risk pregnancy centers amounted to 26,341 during the same period.

Jericho & Al Aghwar and Tulkarm Governorates recorded the highest rate of referral to HRP clinics, which reached 24.5% of the total number of registered pregnant women.

While Jerusalem governorate recorded the lowest rate of referral to HRP clinics, which amounted to 8.6% of all pregnant women registered.

**Graph (15) Proportional Distribution of Pregnant Women referred to High Risk Pregnancy Clinics from the Total Registered in PHC Pregnant Women by Health Directorate, West Bank, Palestine 2016**

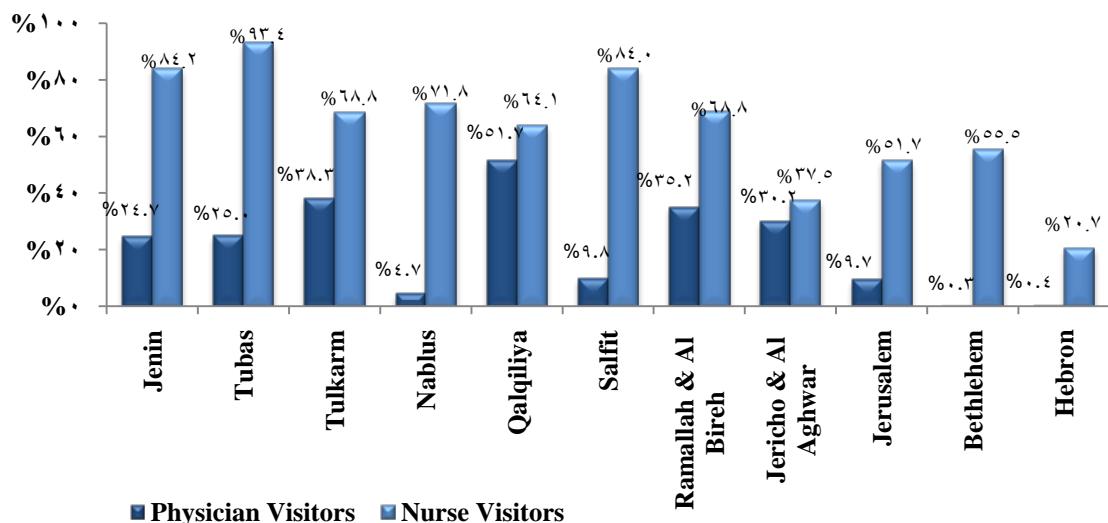

In 2016, the most common causes of referral to high risk pregnancy centers were the existence of uterine surgical history, the presence of consecutive abortions and more, carrying multiple fetuses or the presence of RH, which recorded 1,668, 642, 314 and 296 respectively.

### 3. Postnatal care:

The total number of visits by mothers to maternal and child centers in 2016 were 15,723 visits per physician at 21.7% of the reported live births and 54,738 visits per nurse at 75.7% of reported live births.

**Graph (16) Proportional Distribution of Postnatal Visits from the Total Number of Reported of Newborns in MoH MCH PHC Centers by Governorate, West Bank, Palestine 2016**

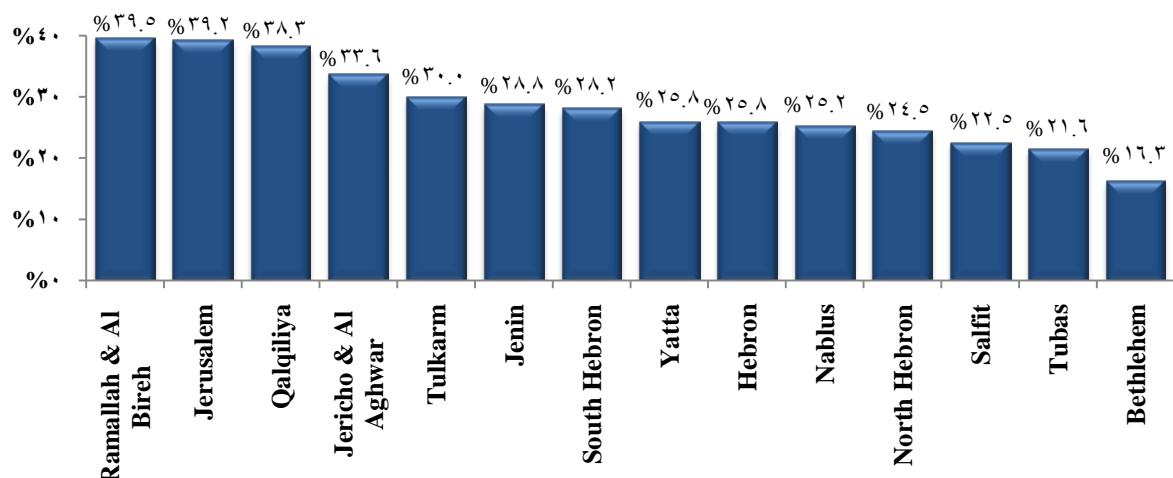

#### 4. Anemia:

##### Anemia among Pregnant Women Recorded in PHC Centers:

2016 records indicate that the incidence of anemia among pregnant women registered in the PHC centers is 28.2%, of which mild anemia (hemoglobin 9 to 11 gm/ dl) is 26.6% of pregnant women, while moderate anemia (hemoglobin 7 to 8.9 gm/ dl.) was 1.5% among pregnant women, while those with severe anemia (hemoglobin less than 7 gm/ dl) were 0.1% of all pregnant women registered in PHC centers.

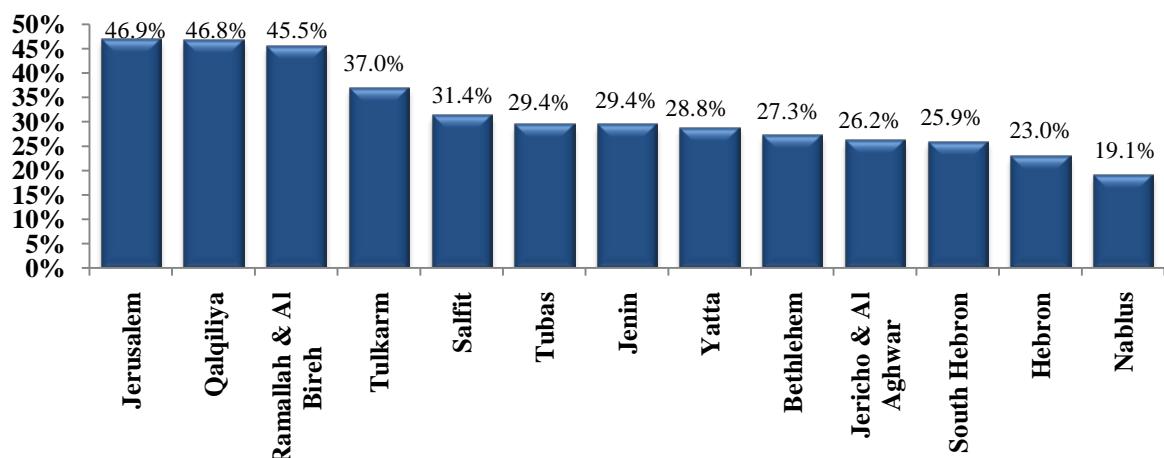

**Graph (17) Anemia among Registered Pregnant Women in PHC Centers by Health Directorate, West Bank, Palestine 2016**

##### Anemia among Pregnant Women Registered in high Risk Pregnancy Clinics in PHC:

The incidence of anemia among pregnant women recorded in high risk pregnancy centers was 30.4%, of which 27 % were with mild anemia (hemoglobin 9 to 11 gm/ dl) and 3.3% with moderate anemia (hemoglobin 7 to 8.9 gm/ dl) ,and those with severe anemia (hemoglobin less than 7 gm / dl) were 0.04% of all HR pregnant women.

**Graph (18) Proportional Distribution of Anemia among Pregnant Women Registered in High Risk Pregnancy, PHC, MoH, West Bank, Palestine 2016**

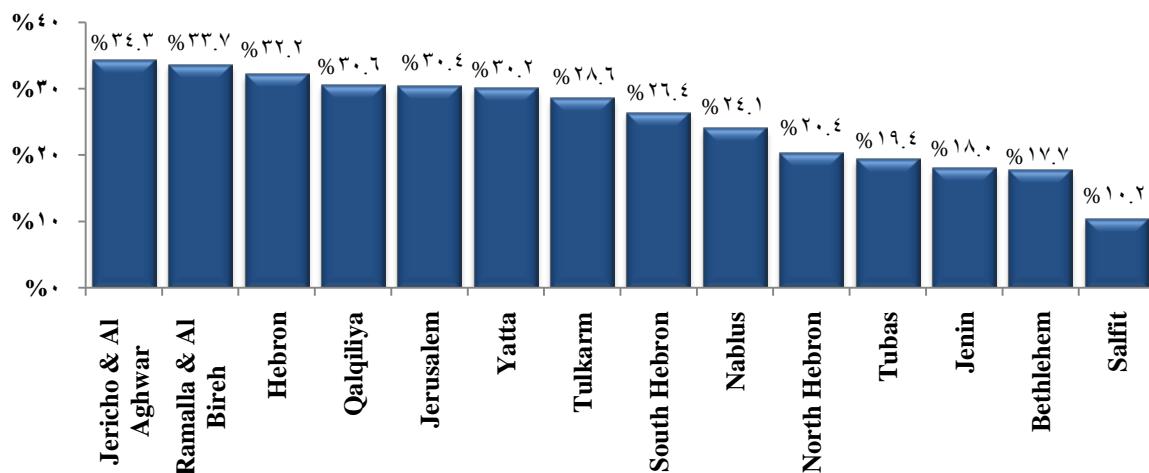

### Anemia among Mothers Registered in PHC Centers (after Delivery):

During the year 2016, the different governorates of the West Bank registered only 23.4% mild anemia of the total number of mothers after delivery.

While the percentage of moderate anemia was 2.2% and the severe anemia cases were 0.03% among mothers.

**Graph (19) Proportional Distribution of Anemia among Mothers Registered in PHC Centers by Health Directorate, West Bank, Palestine 2016**

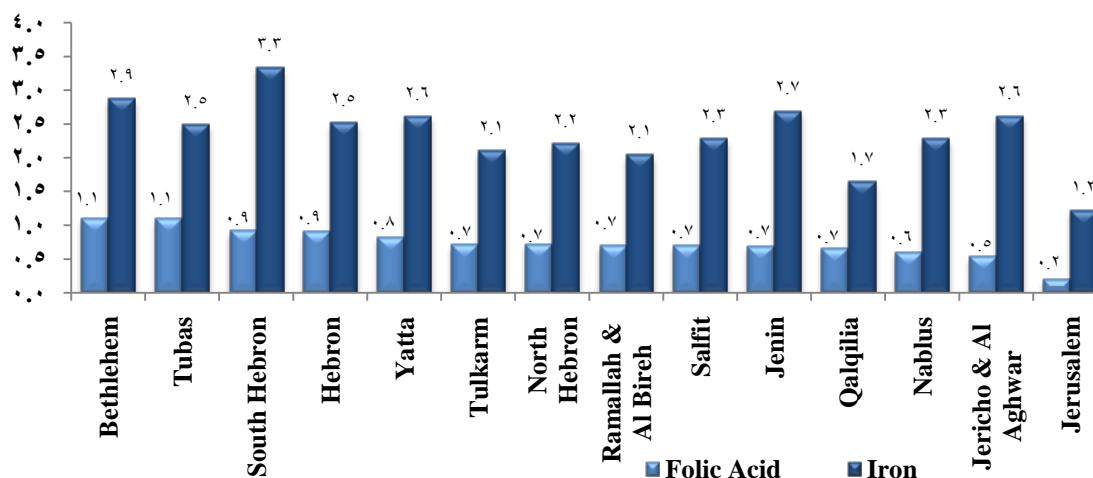

### 5. Supplements Dispensing:

#### Supplements Dispensing of Pregnant Women Recorded in PHC Centers:

The rate of folic acid expenditure was 0.7 units per registered pregnant woman, Tubas and Bethlehem governorates are registering the highest rate of dispensing which were 1.1 units per pregnant woman. Jerusalem governorate recorded the lowest rate of exchange and reached 0.2 units per pregnant woman. While folic acid dispensing rate was 2.4 units per registered pregnant woman, where South Hebron health directorate recorded the highest rate of dispensing and amounted to 3.3 units per pregnant, while Jerusalem governorate recorded the lowest rate of dispensing which amounted to 1.2 units per pregnant.

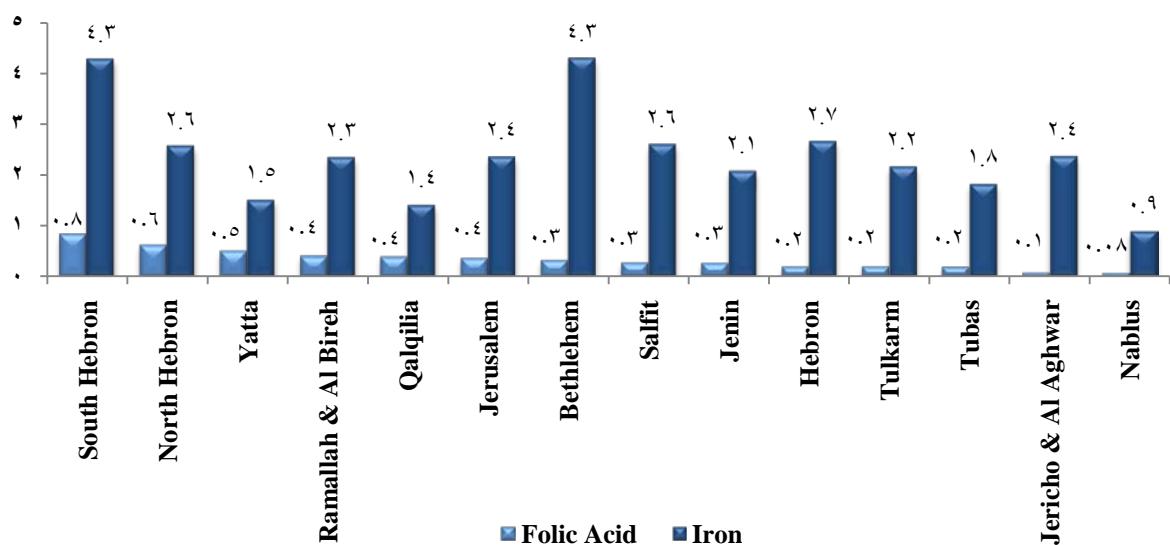

**Graph (20) Distribution of Supplements dispensing Rate (Folic Acid & Iron) for Pregnant Women Registered in MoH PHC by Health Governorate, West Bank, Palestine 2016**

### **Supplements Dispensing of High Risk Pregnant Women:**

In 2016 the number of registered pregnant women were at high risk pregnancies affiliated to MOH centers are 5067 pregnant, where folic acid dispensing rate was 0.3 unit drug per registered pregnant woman, where south Hebron district registered the highest disbursement rate of 0.8 unit per pregnant woman, while Nablus recorded the less expenditure rate which is 0.08 unit per pregnant woman, the rate of iron is 2.3 unit per registered pregnant woman. Bethlehem and south Hebron are recorded the highest rate of units of iron dispensing, where 4.3 unit dispensed per registered pregnant woman, while Nablus recorded the lowest dispensing rate at 0.9 units dispensed per registered pregnant woman in the risk pregnancy clinic .

**Graph (21) Distribution of Supplements dispensing Rate (Folic Acid & Iron) for High Risk Pregnant Women Registered in MoH PHC by Health Governorate, West Bank, Palestine 2016**

### **6. Family Planning Services:**

PHC provides family planning services in 306 centers. The total number of visits to family planning centers during 2016 for the purpose of benefiting from family planning services was 97,169 visits in West Bank.

The number of new registered family planning beneficiaries was 36,877 in Palestine. The highest percentage of use was in the use of Contraceptive pills which is 69.6% of the total. The condoms were the second in consumption reaching 17.3%, while the IUDs recorded 12.5% of the total number of methods obtained by the new beneficiaries.

### **7. Pap Smear Test:**

PHC services provided the Pap smear examination in WB governorates through the following laboratories: Jenin Health Directorate Laboratory, Ramallah & Al Bireh Health Administration Laboratory, and Hebron Health Directorate Laboratory. The total numbers of samples were 554 samples, of which 5 were positive.

### **8. Mammography and Ultrasound Mammography:**

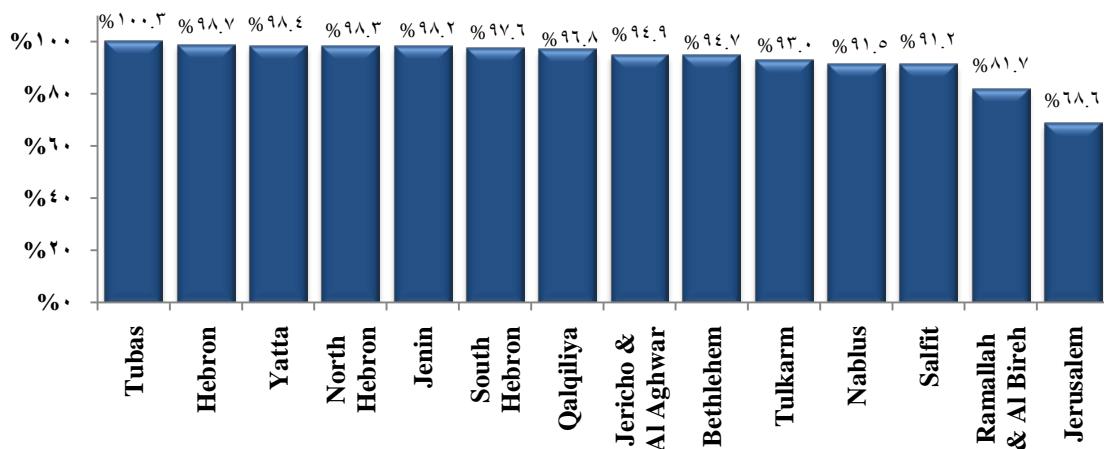

Primary health care clinics in the Ministry of Health provide mammography services in the various health directorates in West Bank. The number of cases examined in the various governorates was 8,412, of which 6,137 were normal and accounted for 73% of the examined cases.

The number of ultrasound cases in the various West Bank governorates was 1,872, of which 812 cases were normal and accounted for 43.4% of the examined cases.

### **2.2.2 Child Care:**

Since the beginning of 2016, MOH has increased the age of children receiving free health services in their centers from 3 to 6 year olds. During 2016, PHC clinics registered 484,195 visits for children under 3 years. The Total number of children registered in PHC centers and cared for by doctors was 55,640 children with coverage of 93.5% of the total number of children recorded in the PHC clinics in MOH. The lowest coverage was recorded in Jerusalem governorate, reaching 68.6%.

**Graph (22) Proportional Coverage of Registered Children received Health Care by Physician In MoH PHC by Health Directorate, West Bank, Palestine 2016**

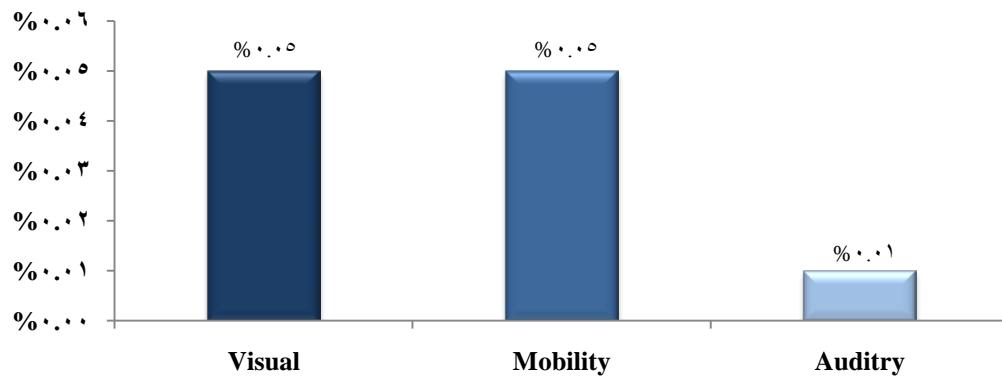

### **1. Disabilities and Congenital Diseases:**

In 2016, 61 cases of disability were recorded in PHC centers in West Bank, with percentage of 0.11% of the total number of children examined by physicians. North Hebron reported the highest percentage of disability which reached 0.23 %.

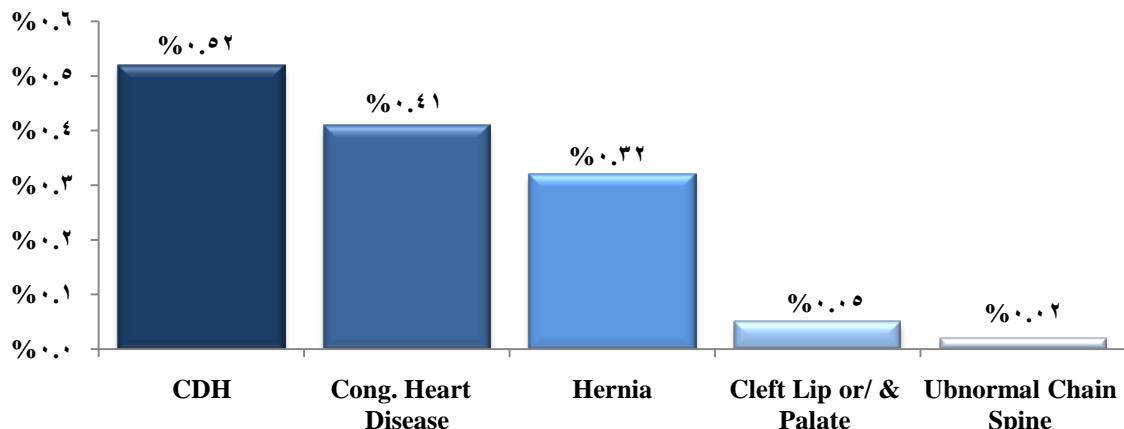

Reported disabilities distributed is as follows: 27 cases of mobility disabilities, constituting 0.05%, and an auditory (hearing) disability reported 5 cases, with a percentage of 0.01% and the Visual disabilities recorded 29 cases with percentage of 0.05% of the total number of examined live births.

**Graph (23) Proportional Distribution of Reported Disability of Total Examined Children (1- 3 years) in MoH PHC Centers, West Bank, Palestine 2016**

In 2016, 1,023 cases of congenital diseases were reported in PHC centers in West Bank, with percentage of 1.8% of the total number of examined live births. The number of cases of hip dislocation was 287, which is 0.52% of the total number of live births examined in 2016.

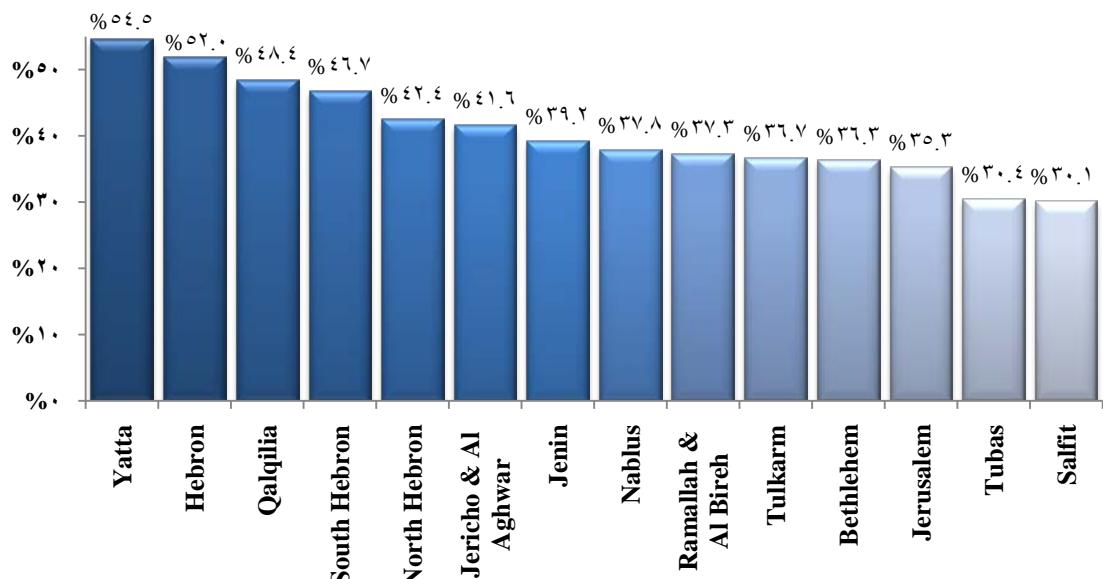

**Graph (24) Proportional Distribution of Reported Congenital Anomalies of the Total Examined Babies (1- 3 years) in MoH PHC Centers, West Bank, Palestine 2016**

## 2. Anemia in Children at Age of 12 Months:

The percentage of anemia among children examined at age of 12 months was 41.8% in the various districts of West Bank in 2016, where the percentage of mild anemia was 39.2% among children; the percentage of moderate anemia was 2.6%, while the severe anemia was 30.0%.

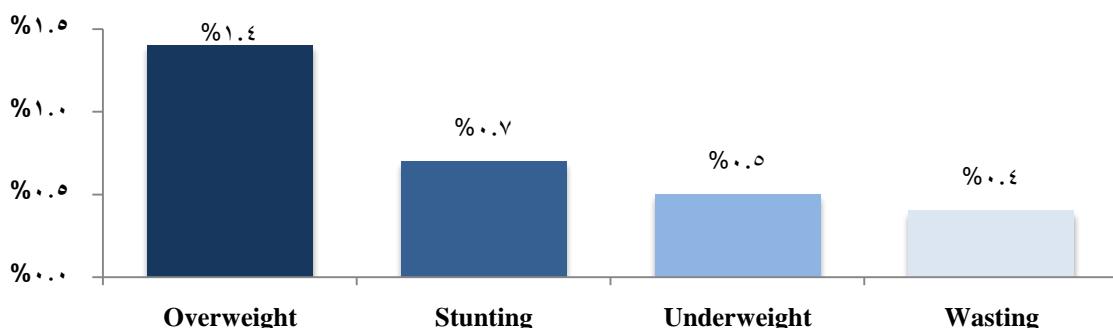

**Graph (25) Proportional Distribution of Anemia among Registered Children at Age of 12 Months in MoH PHC Centers by Health Directorate, West Bank, Palestine 2016**

### 3. Basic Growth Indicators:

In 2016, data from PHC centers in West Bank indicated that 0.4% of children are suffering from wasting, 24.9% have severe wasting, 0.5% suffer from underweight, 30.8% are severely underweight, 1.4% of the children with an overweight, where 27.2% of them are obese, and children with stunting of 0.7% of the total children examined in mother and child centers in PHC, where it was found that 30.6% of stunted children suffer from severe stunting.

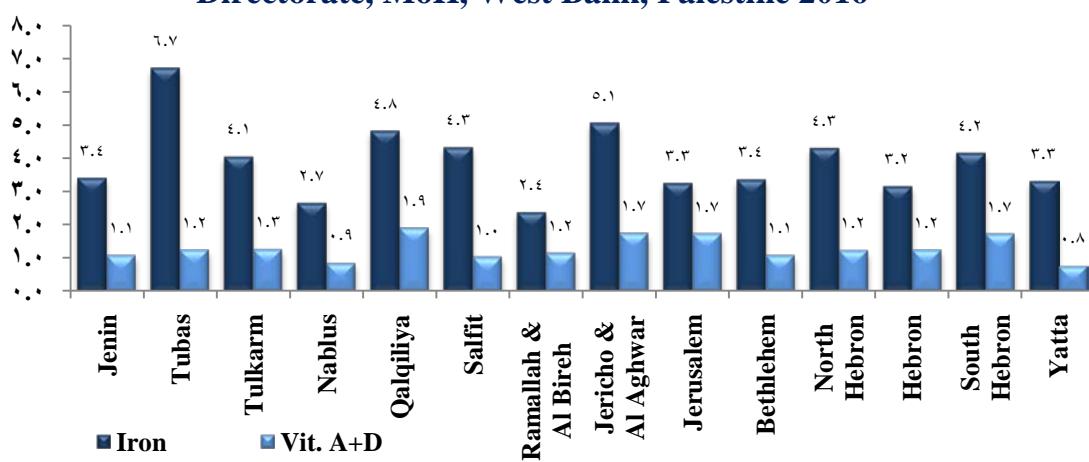

**Graph (26) Distribution of Registered Child Growth Indicators at 12 Months of Age in MoH PHC Centers, West Bank, Palestine 2016**

### 4. Child Supplements:

PHC provides supplements for children under the age of 3 who receive PHC services at their clinics, where they are provided with iron and vitamin A + D. The figures recorded during 2016 indicate that the iron bottle rate for children reached 3.5 bottles per child. The rate of bottle of vitamin A + D is 1.2 bottles per child.

**Graph (27) Proportional Distribution of Supplementation for Registered Children in PHC MCH Centers by Type of Supplementation & Health Directorate, MoH, West Bank, Palestine 2016**

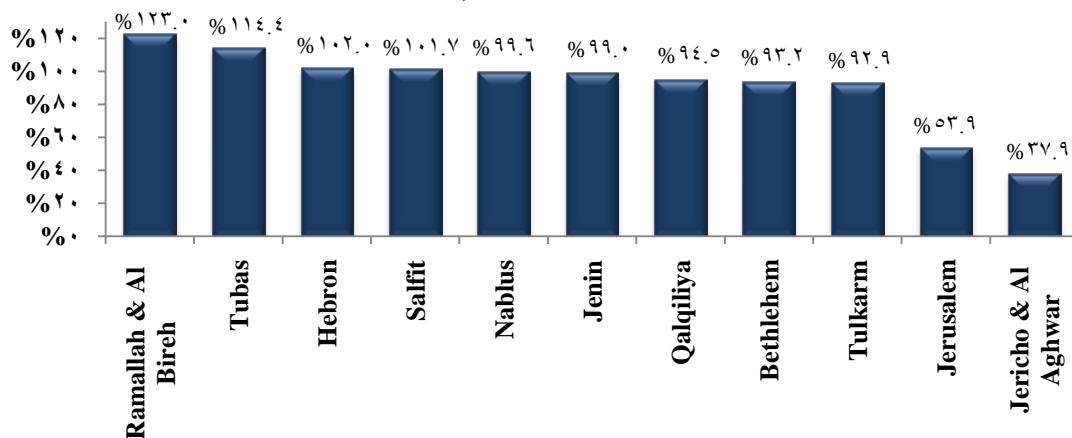

### 5. PKU and TSH Tests:

Maternal and Child Health (MCH) centers performed PKU test to the newborns in all PHC centers. 71,027 drawing samples were recorded during 2016 with a coverage rate of 98.2% of the total number of reported live births, 53,313 of the total samples withdrawn were during the first week of life, with percentage of 75.1%, and 14,717 samples were withdrawn during the period from 8 to 15 days of life, a percentage of 20.7% of the total number of samples

withdrawn, while the number of children the samples of PKU and TSH withdrawn for them after 15 days was 2,997 samples, with percentage of 4.2% of the total samples. The total Positive cases found were as follows: PKU 19 cases and TSH screening was 32 cases.

**Graph (28) Proportional Coverage of PKU & TSH Tests by Governorate, West Bank, Palestine 2016**

## **6. Maternal and Child Health Handbook:**

In 2016 MOH in PHC and hospitals as well as health providers from NGOs and UNRWA distributed 51,183 Maternal and Child Health Handbook; 42,881 of the total were distributed in PHC centers.

The number of handbooks distributed in PHC centers for children was 11,490, with percentage of 26.8%, while 30,563 handbooks were distributed to mothers with percentage of 71.3%, 828 handbooks were replaced the lost handbooks with percentage of 1.9%.

In hospitals 8,302 handbooks were distributed, 318 of its were distributed for children with percentage of 3.8%, while 7,763 of its distributed for mothers with percentage of 93.5%, and 221 of its were replaced the lost handbooks with percentage of 2.7%.

## **2.3 School Health:**

### **2.3.1 School Health Program (SHP):**

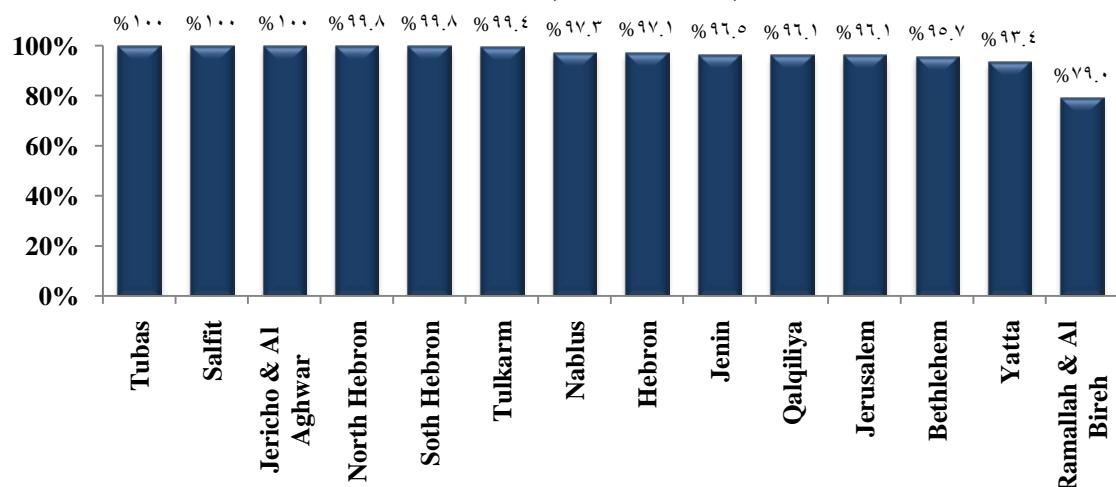

The School Health Program aims to provide medical services, especially preventive ones, to all Palestinian students through the Government School Health Program, which provides services to public and private schools and government schools affiliated to the Ministries of Social Affairs, Labor and the Ministry of Awqaf and Religious Affairs, as well as in some kindergartens. Another SHP is the UNRWA School Health Program, which provides services to refugee students in its schools.

### **2.3.2 School Health Services:**

#### **1. Services Provided for First Grade:**

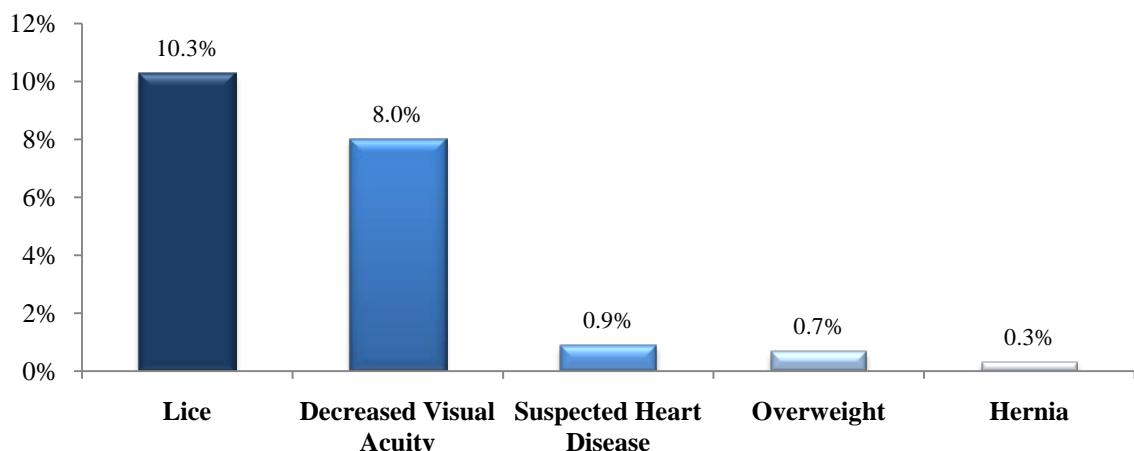

The school health program staff conducted several tests for first grade students through their staff in all districts. The total number of examined students was (43,448) with coverage of 95.5% of the total number of students, 9,836 cases were diagnosed among the students with percentage of 22.6% of the total examined students.

**Graph (29) Proportional Distribution of Coverage of First Grade Pupils in the Governmental School, West Bank, Palestine 2016**

School health program staff provided several tests for students in the first grade, including ophthalmology, weight, hearing, skin, etc. The highest number of cases reported from lice was 4,539 cases, represented 46.1% of all diagnosed cases.

**Graph (30) Proportional Distribution of Diseases among First Grade Examined Pupils, West Bank, Palestine Scholastic Year 2015/ 2016**

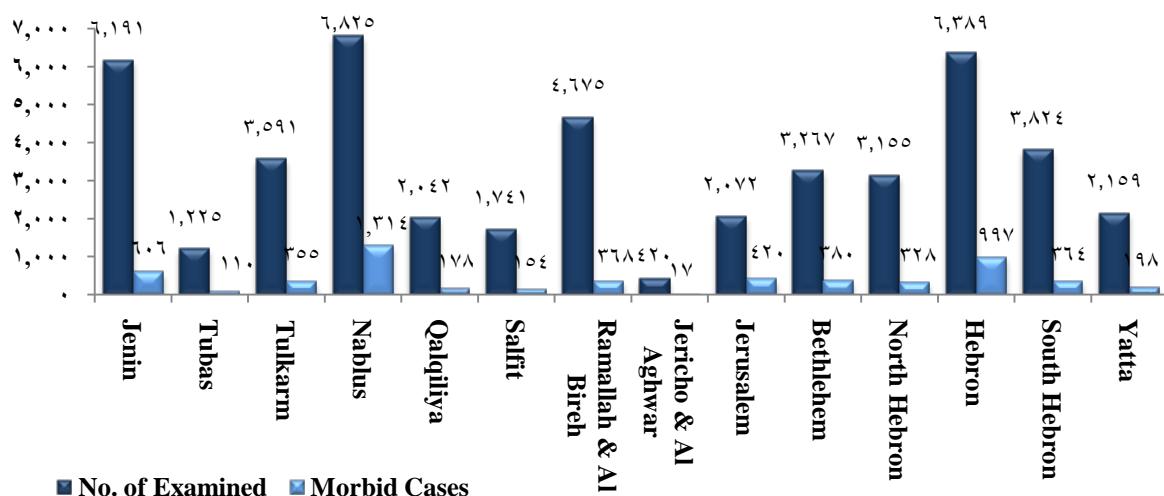

## 2. Preventive Optometry Test for Fifth and Eighth Grades:

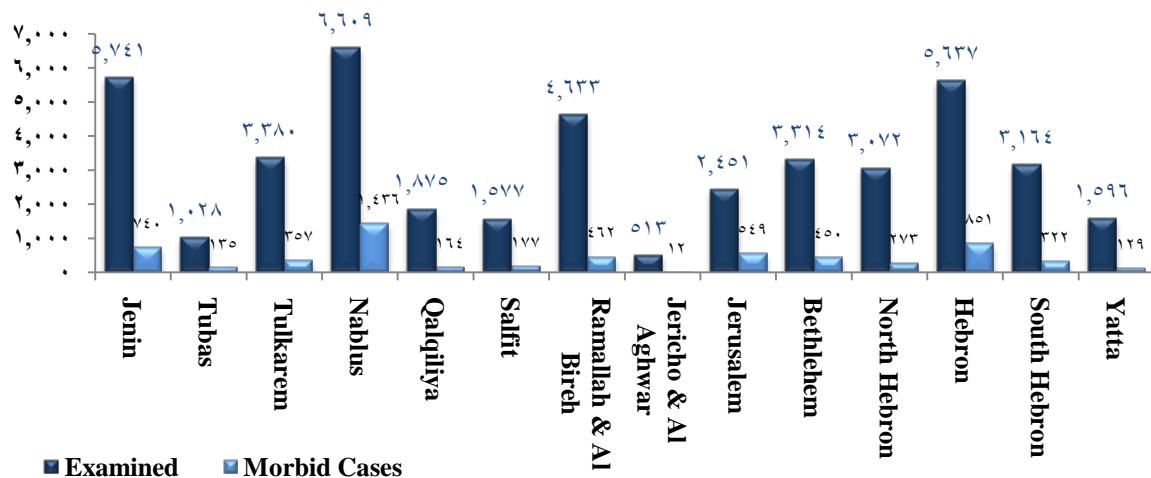

MoH school health teams are implementing a preventive program for optometry (eye test) in West Bank through screening services for 5<sup>th</sup> and 8<sup>th</sup> grades in addition to first grade.

The number of examined students in the fifth grade was 47,576, and a visual impairment was found in 5,789 students with percentage of 12.2%. In the eighth grade, the total number of examined students was 44,590; 6,057 of them diagnosed with a visual impairment with percentage of 13.6% of the total number of examined students.

**Graph (31) Distribution of Examined & Morbid Cases of Fifth Grade Pupils by Health Directorate, West Bank, Palestine Scholastic Year 2015/ 2016**

**Graph (32) Distribution of Examined & Morbid Cases of Eighth Grade Pupils by Health Directorate, West Bank, Palestine Scholastic Year 2015/ 2016**

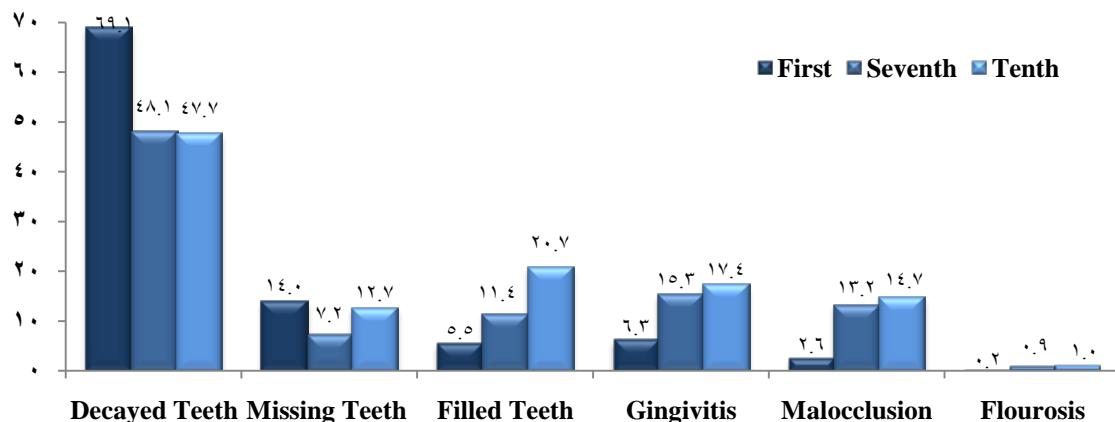

### 3. Dental Health of Pupils:

School health staff conducted examination of teeth for first, seventh and tenth graders.

The number of screened pupils in the first grade was 42,017, of which 29,897 were diagnosed with different dental problems. In the seventh grade, 42,570 students were screened, of which 23,499 were diagnosed with different dental problems. The number of screened pupils in the 10<sup>th</sup> grade was 40,950, of which 22,767 were diagnosed with different dental problems.

The reported cases indicate that dental decay recorded the highest cases of dental problems in grades 1<sup>st</sup>, 7<sup>th</sup> and 10<sup>th</sup> reached 29,015, 20,463 and 19,544 respectively

**Graph (33) Proportional Distribution of Dental Problems among Examined Pupils by Grade & Situation, West Bank, Palestine Scholastic Year 2015/ 2016**

### 2.3.3 School Environment:

#### Water Samples:

##### \* Water Tank Samples:

The total number of examined water samples from schools was 1,520, of which 299 were found to be contaminated, with percentage of 19.7% of water tanks samples collected in schools in West Bank.

##### \* Network Water Samples:

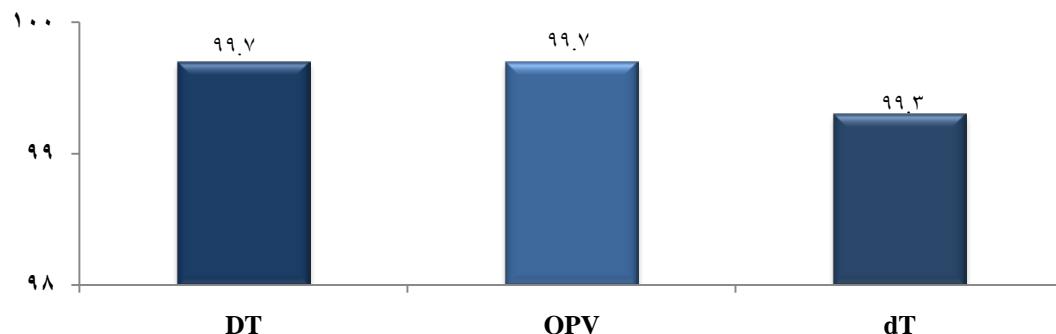

The total number of samples examined was 71 samples, 7 samples were contaminated with percentage 9.9% of total network water samples examined.

### 2.3.4 Vaccinations for School Students:

The school health program teams in the Ministry of Health vaccinate schoolchildren in Palestine, according to the national immunization schedule, where the total number of vaccinated students was 241,762 in Palestine.

136,861 of them received diphtheria and tetanus (DT) and poliovirus taste .The coverage of oral poliomyelitis vaccine (OPV) vaccine in the first grade was 99.7% coverage, (104,901) students in the ninth grade received diphtheria and tetanus vaccine (dT) with coverage of 99.3%.

**Graph (34) Distribution of Pupils Vaccine Coverage by Vaccine Type & Grade, West Bank, Palestine Scholastic Year 2015/ 2016**

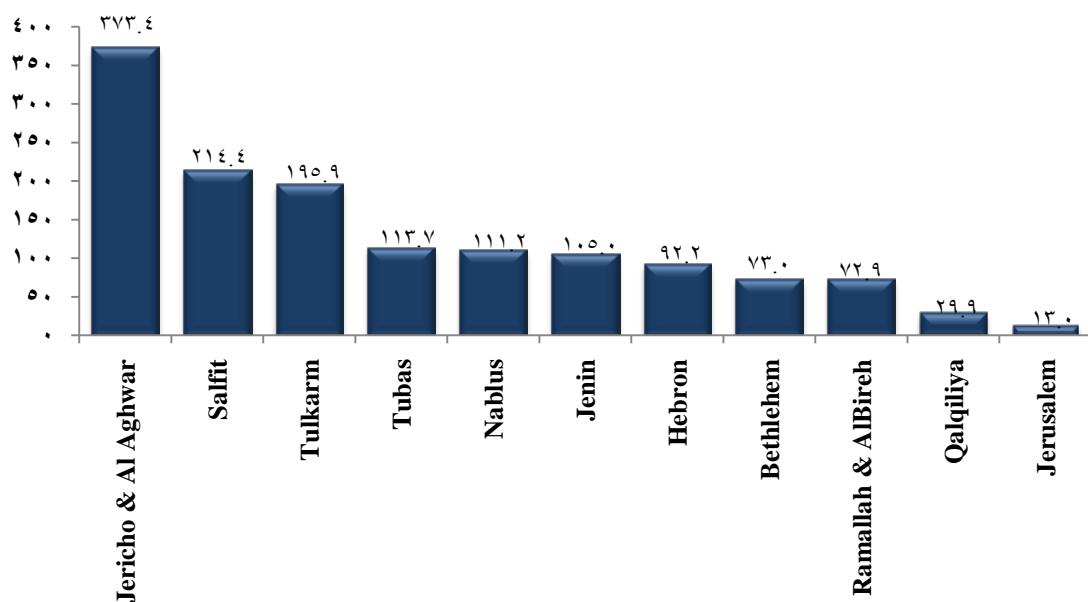

## 2.4 Mental Health

### 2.4.1 Activities of Community Mental Health Clinics:

Mental health services in Palestine are provided through 16 specialized psychiatric and community health clinics in West Bank, including a mental health center for children and adolescents in the North Hebron Health Directorate.

In 2016, there were 2,712 new patient registered at different mental health centers in WB, with a incidence rate of 101.6 per 100,000 population.

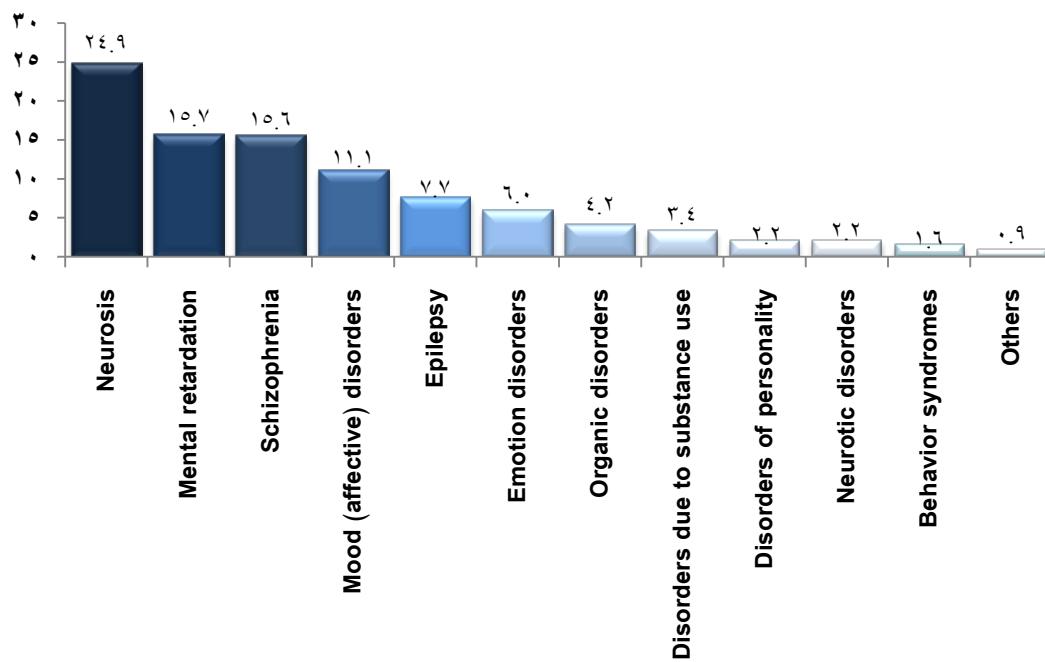

**Graph (35) Distribution of Reported Incidence Rate of Psychiatric Diseases per 100,000 Pop. by Governorate, MoH, West Bank, Palestine 2016**

### 2.4.2 New Reported Psychiatric Cases by Diagnosis:

In 2016, The incidence rates for new reported cases in MoH mental and community health centers in West Bank show that Neurosis, Mental retardation and Schizophrenia are the highest incidence respectively, reaching incidence rate of 24.9, 15.7, 15.6 per 100,000 population respectively.

**Graph (36) Distribution of Incidence Rate of Psychiatric Diseases by Diagnosis, West Bank, Palestine 2016**

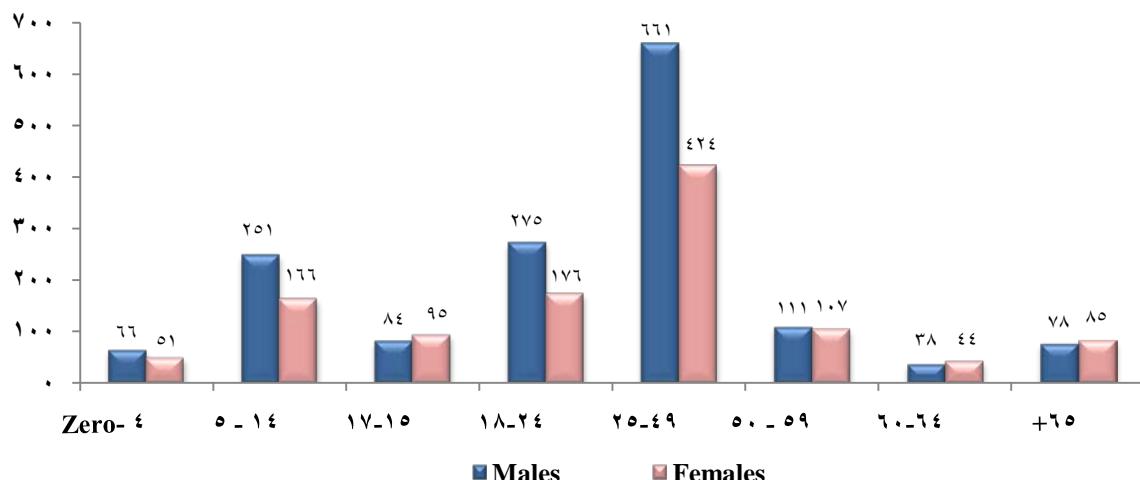

#### 2.4.3 New Reported Cases of Psychiatric Diseases by Sex & Age Groups:

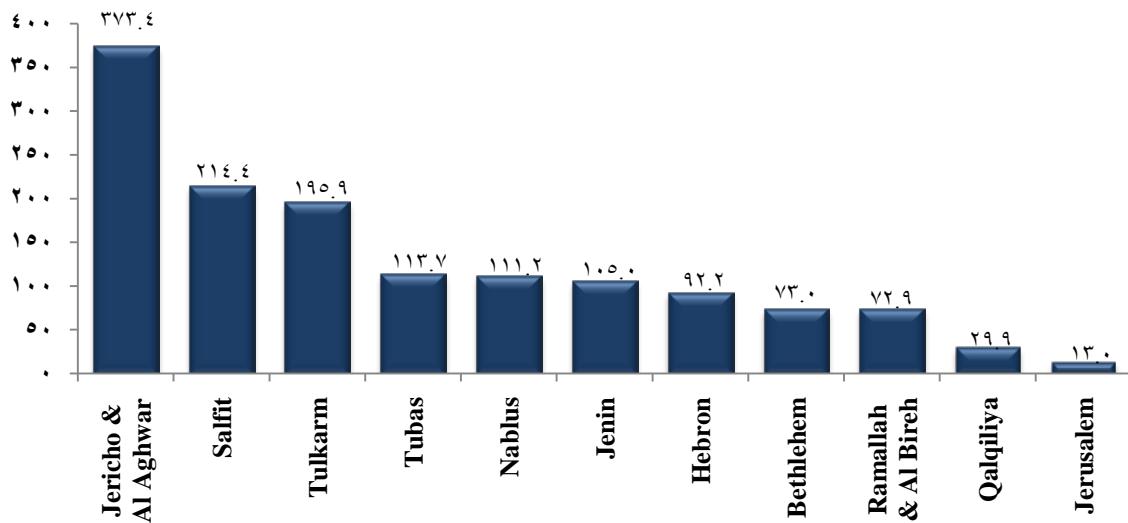

Distribution of new psychiatric cases recorded in mental and community health centers by sex showed 1,564 cases of males with percentage of 57.7% and 1,148 females with percentage of 42.3% out of the total new cases recorded.

The age distribution showed that the largest number of these cases distributed in the age group 25- 49 years, amounting to 1,085 cases.

**Graph (37) Distribution of New Reported Psychiatric Cases by Sex & Age Groups, MoH, West Bank, Palestine 2016**

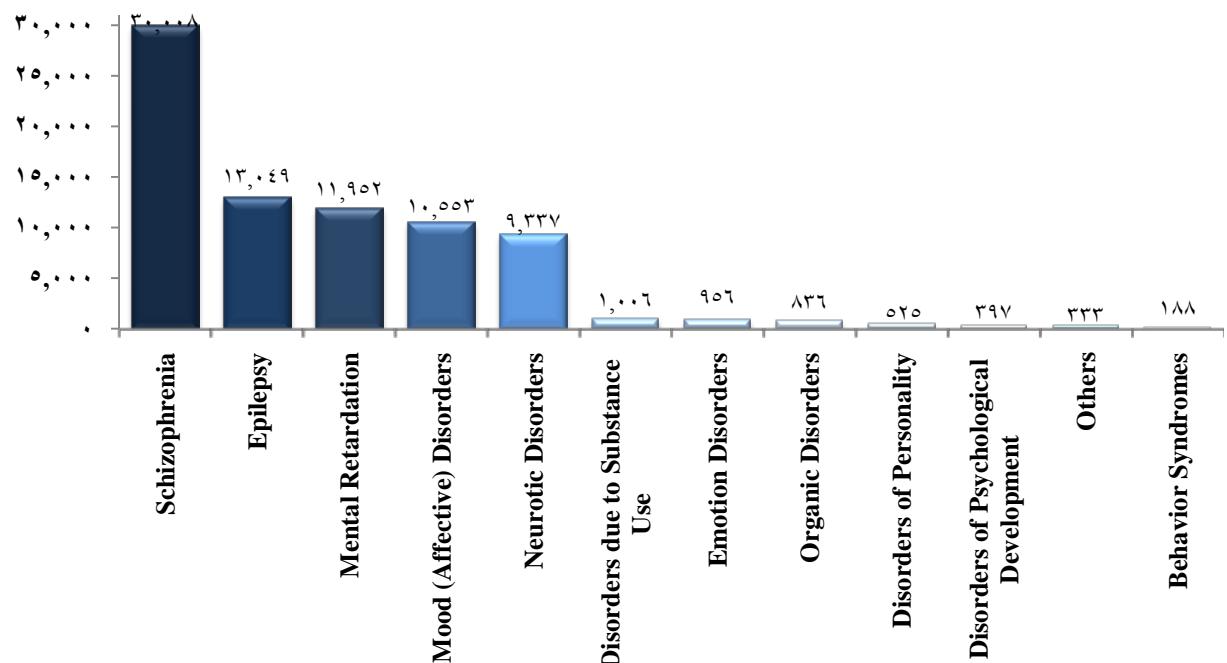

**Graph (38) Distribution of Psychiatric Diseases Incidence Rate by Governorate, West Bank, Palestine 2016**

#### 2.4.4 Visitors of Community Mental Health Centers by Diagnosis:

In 2016, the total number of patients in community mental health centers in West Bank showed that Schizophrenia, Epilepsy and Mental retardation are the highest treatment with 30,008, 13,049 and 11,902 cases respectively.

**Graph (39) Distribution of Number of Community Mental Health Centers Visitors by Diagnosis, West Bank, Palestine 2016**

## 2.5 Oral & Dental Health:

### 2.5.1 Dental Clinics:

MOH provides dental services through 37 clinics in PHC centers in West Bank.

MOH developed an electronic patient file which was started at the beginning of 2010; however, 75.9% of reported patient files were still paper base due to the lack of commitment of most dentists to use the electronic patient file. In addition, there are technical problems and lack of equipment and other problems continue to prevent reaching the goal, taking into account that access to files in clinics using the HIS system (Avicenna) is still not possible due to technical reasons.

### 2.5.2 Oral and Dental Health Services in MoH Facilities:

In 2016, the total number of patients who received oral and dental health services in PHC centers was 43,236.

The total number of fillings performed in these clinics was 15,138 including 7,283 silver fillings, 4,356 temporary fillings and 3,499 cosmetic fillings. While 13,857 cases of tooth extraction were reported, and the number of scaling and polishing cases was 910.

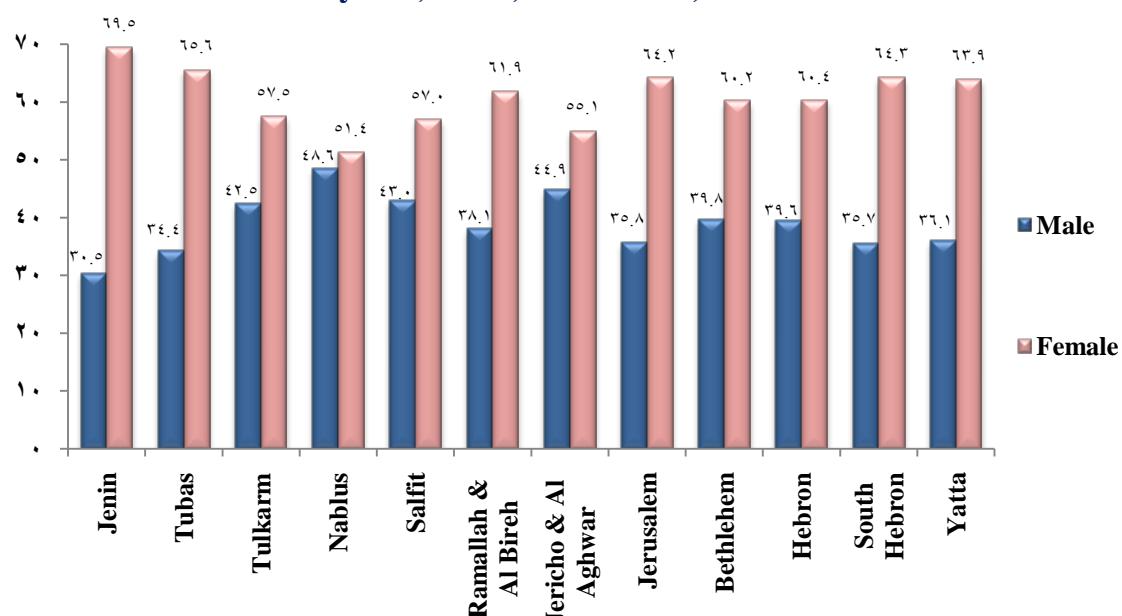

Dental clinics also offer dental care for pregnant women regardless of health insurance. In 2016, the number of pregnant women who benefited from dental care during the year was 5,487.

### 2.5.3 Dental Services in PHC Centers from Computerized Electronic Patient Files (EPF):

In 2016, there were 32,799 patients treated for (EPF) in dental clinics in West Bank, out of them there was 11,745 males and 20,854 females with percentage of 63.6% females. This means that females formed the largest group who received oral and dental treatment in PHC facilities.

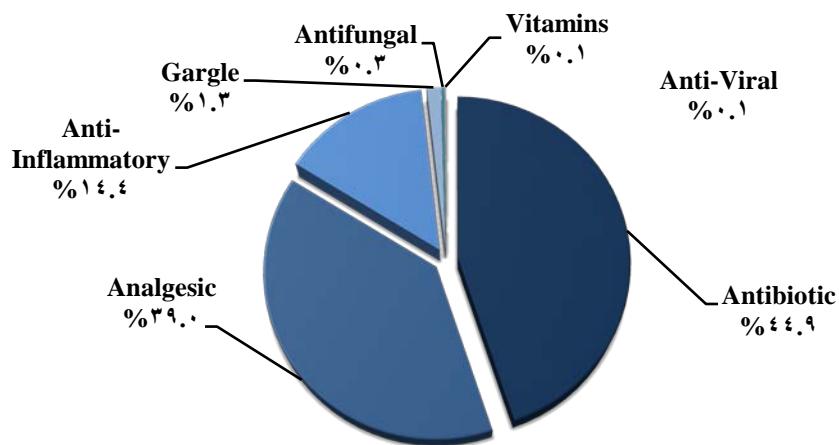

Patients in the age group 10-17 years were the most visitors to dental and oral services, with 7,605 visitors, representing 23.2% of the total number of patients.

**Graph (40) Proportional Distribution of Beneficiaries from Dental Clinics Services by Sex, MoH, West Bank, Palestine 2016**

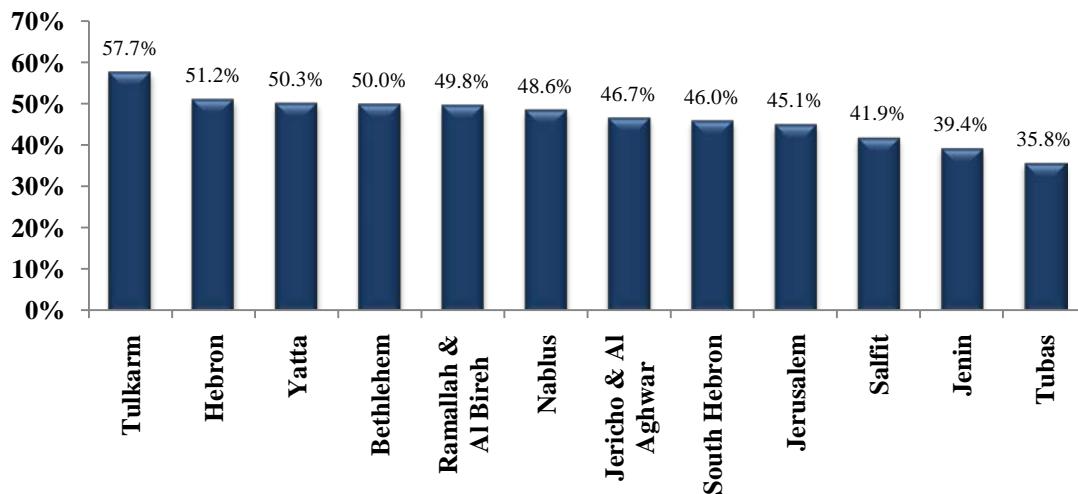

Dentists in the clinics prescribe the appropriate medication for the cases that review in the clinics. The antibiotic recorded the highest percentage of the medication prescribed, with percentage of 41.7% of the total medication described.

**Graph (41) Proportional Distribution of Medications Described in Dental Clinics, MoH, West Bank, Palestine 2016**

**Graph (42) Proportional Distribution of Antibiotics from the Total Prescriptions Medicines in Dental Clinics by Governorate, MoH, West Bank, Palestine 2016**

## 2.6 Road Traffic Accidents (RTA):

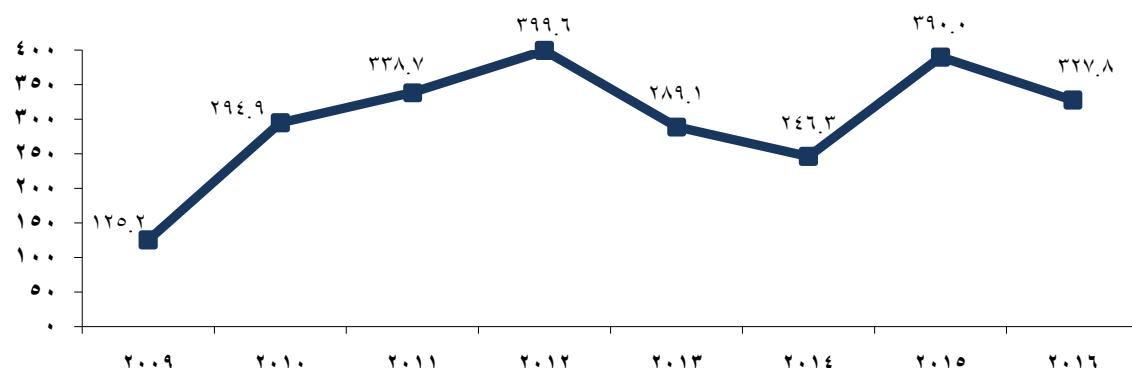

### 2.6.1 Road Traffic Accident Monitoring Program:

Traffic accidents are reported by governmental, non-governmental and private hospitals in West Bank. Road Traffic accidents surveillance started in the second half of 2009. In 2016, 8,229 cases were recorded, of which 8,077 were injured and 152 were dead. The incidence rate for RTA was 308.2 per 100,000 of population.

### 2.6.2 Death Rate of Road Traffic Accidents in Palestine:

In 2016, the reported death rate from road accidents in Palestine was 5.3 per 100,000 populations, in West Bank 5.7 per 100,000 populations while in Gaza Strip 4.7 per 100,000 populations.

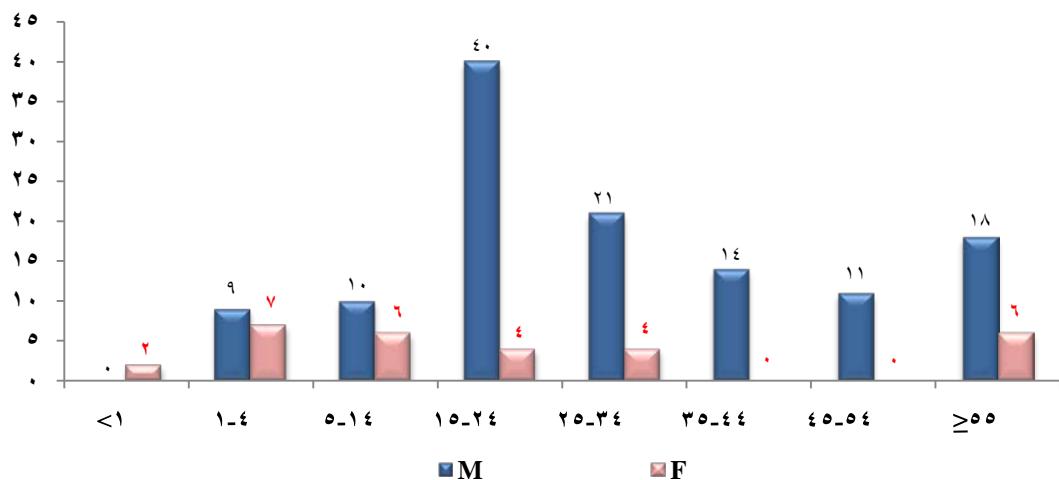

**Graph (43) Distribution of Road Traffic Accidents Incidence Rate by Year, West Bank, Palestine 2009 - 2016**

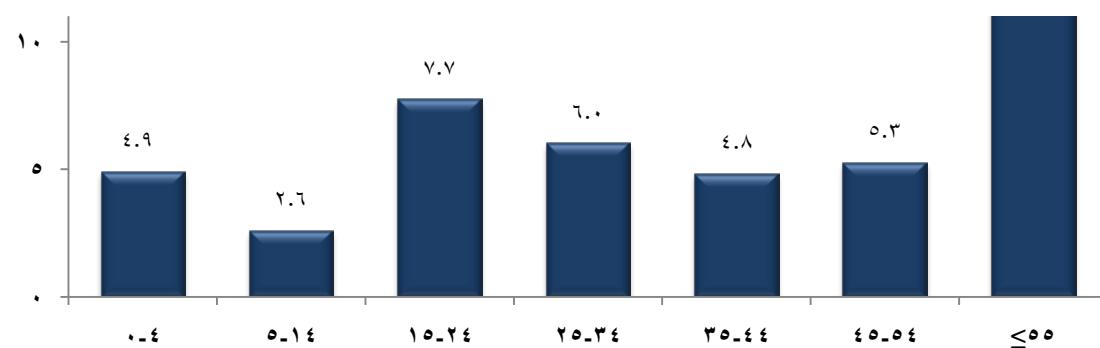

### 2.6.3 Distribution of Road Traffic Deaths by Age Group:

The number of deaths recorded in West Bank was 152, the highest in the age group (15-24) and 28.9% of the total number of road traffic deaths recorded in 2016.

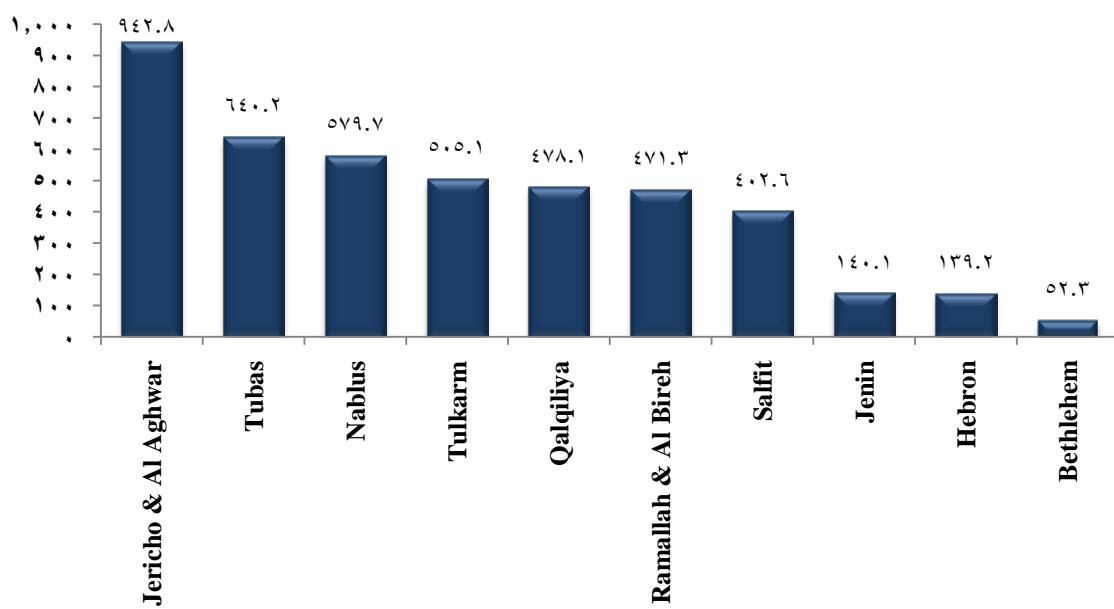

**Graph (44) Distribution of Number of Road Traffic Deaths by Sex & Age Groups, West Bank, Palestine 2016**

**Graph (45) Distribution of Road Traffic Incidence Deaths by Age Groups, West Bank, Palestine 2016**

**Graph (46) Distribution of Road Traffic Injuries Incidence Rate by Governorate, West Bank, Palestine 2016**

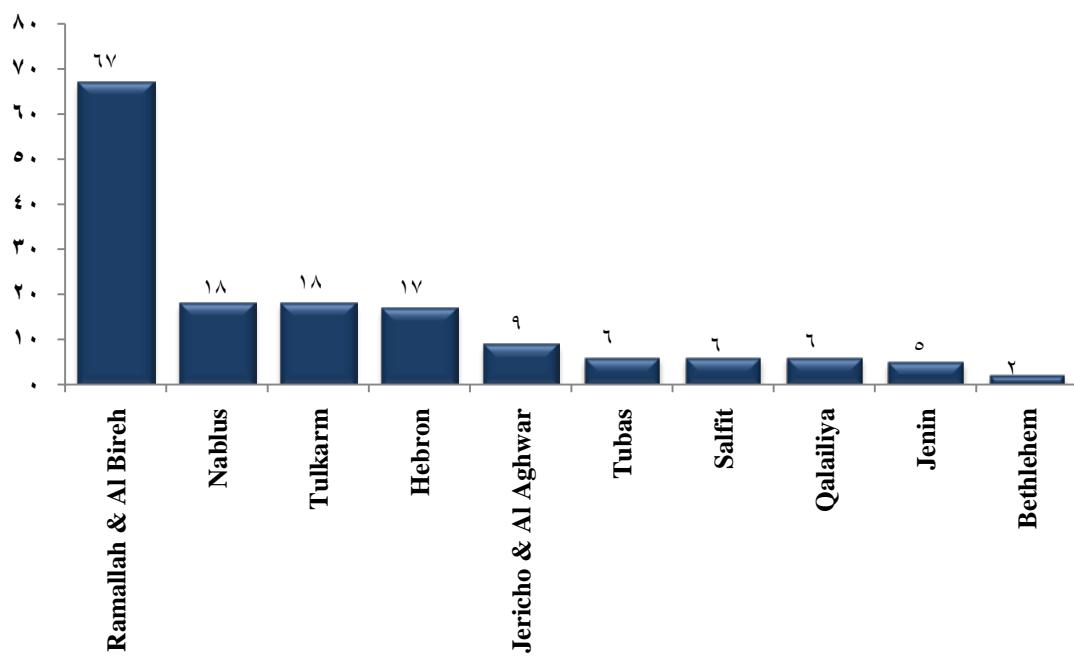

#### **2.6.4 Distribution of Road Traffic Injuries by Severity of Injury, Age group & Governorate:**

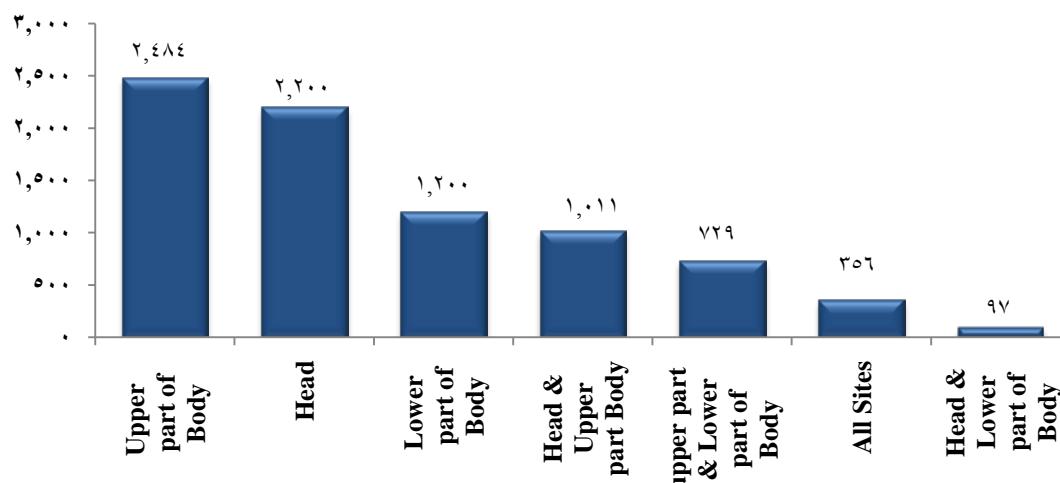

In 2016 Road traffic injuries were characterized by a mild injury with percentage of 75.3% of the total reported injuries, 22.8% of it was moderate and 1.9% was severe injury of the total reported cases.

Ramallah and Al Bireh governorate recorded the highest number of severe injuries, reaching 67% of the total reported severe cases.

**Graph (47) Distribution of Reported Number of Severe Road Traffic Injuries by Governorate, West Bank, Palestine 2016**

**Graph (48) Distribution of Reported RTA Injuries by Body Site of Injury, West Bank, Palestine 2016**

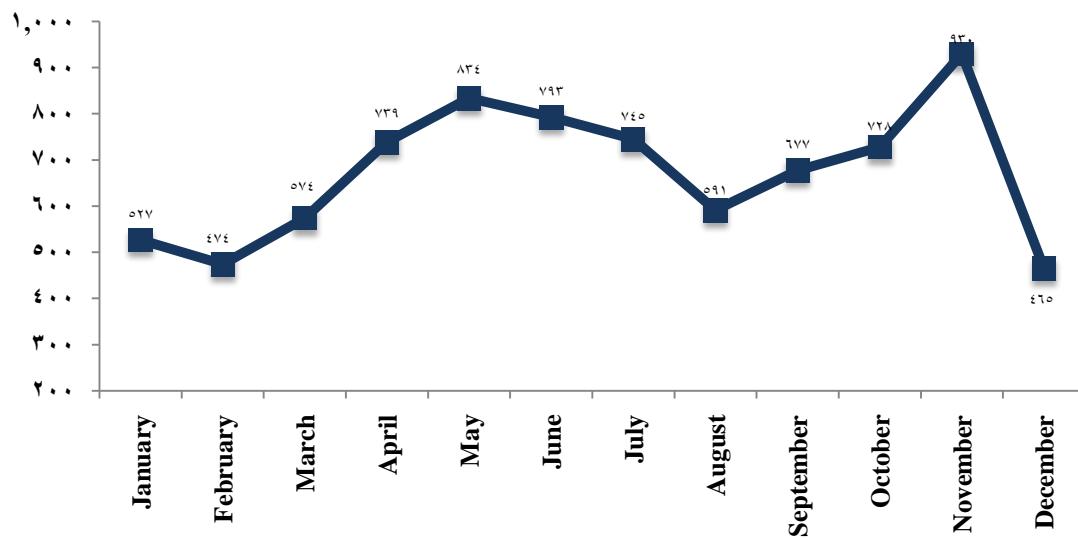

#### **2.6.5 Distribution of RTA Injuries by type of Vehicle:**

Vehicles drivers accounted for the highest number of injuries, amounting to 3,766 cases, with a percentage of 46.6% of the total number of injuries, while the number of vehicles occupants injured was 3,232 with percentage of 40.0%. The number of Pedestrians was 986, constituting 12.2% of the total number of injuries.

#### **2.6.6 Distribution of RTA injuries by Length Hospital Stay:**

The total number of injuries admitted to hospitals for less than one day is 7,716 injuries which accounted for 95.5% of the total injuries. The percentage of injuries that stayed for one day was 329 which accounted for 4.1%, while the number of cases stayed from 2 to 3 days was 18 cases by Just 0.2%.

**Graph (49) Distribution of RTA by Month, West Bank, Palestine 2016**

## 2.7 Work Accidents:

Palestinian Health Information Center (PHIC) at MOH started the surveillance of work accidents since 2014 with establishing its own database for this purpose.

In 2016, 1,654 work injuries were reported, an increase of 54.4% over the number of work injuries reported in 2015 which was 1,071 injuries.

In 2016, ten deaths were reported due to work accidents, an increase of 66.6% over the number of work accidents reported in 2015. Five cases were recorded in Hebron governorate, two from Nablus governorate and one from Ramallah and Al Bireh governorate, one from Tulkarm and one from Salfit governorate.

Eight deaths were within the Green Line (Israel).

There were three work deaths in the 16-24 age group, two deaths in the 25-29 age group, three deaths in the 30-39 age group, and two deaths in the 40-45 age group.

In 2016, incidence rate of work injuries among Palestinians in the West Bank was 61.9 per 100,000 populations, while it was 37.4 per 100,000 populations in 2014.

Jericho and Al Aghwar governorates recorded the highest rate of reported work accidents and reached 212.8 per 100,000 populations.

Bethlehem governorate recorded the lowest rate of work accidents and reached 22.5 per 100,000 populations.

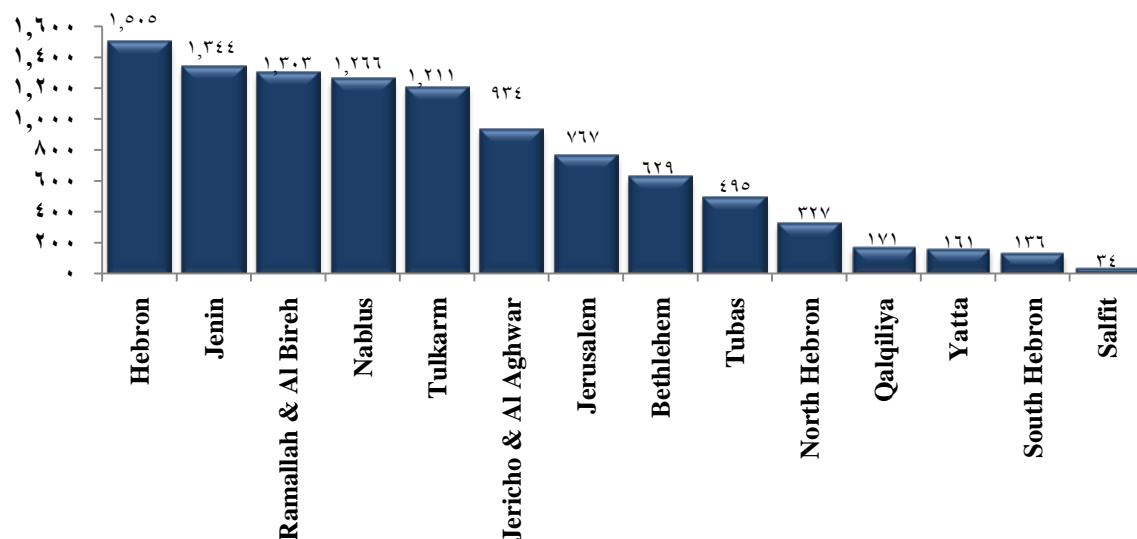

The highest percentage of work injuries was recorded in the 15-24 age groups, followed by the 25-34 age groups.

## 2.8 Environmental Health:

### 1. Tested Food Samples:

In 2016, the number of food samples tested was 10,283, with a contamination percentage of 11.1%.

**Graph (50) Distribution of Number of Tested Food Samples by Health Directorate, West Bank, Palestine 2016**

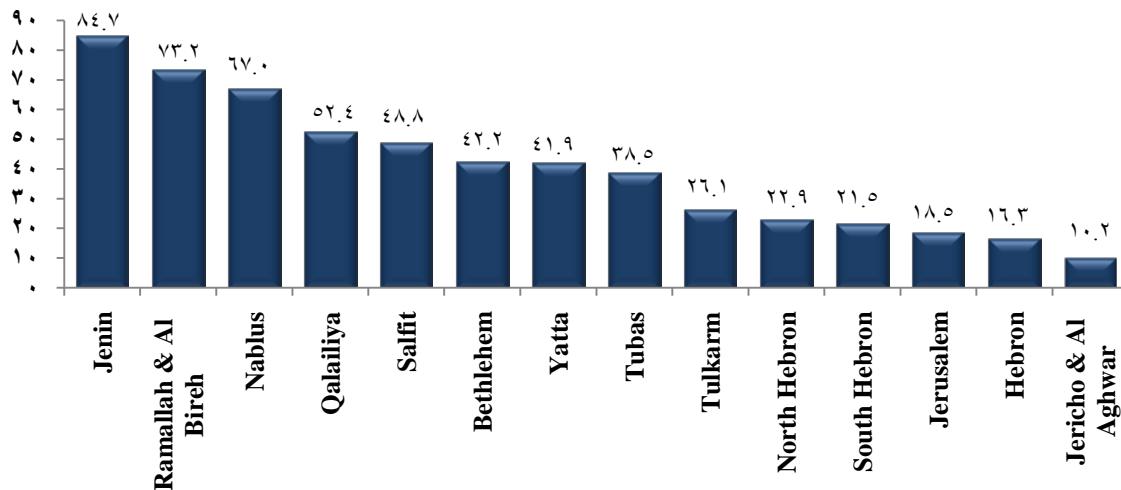

### 2. Tested Water Samples:

In 2016, the total number of water samples tested was 11,980, with a contamination percentage of 14.7%.

### 3. Crafts and Industries:

The number of existing trades and industries was 51,895, of which 41.8% were licensed, with complaints amounting to 148, numbers of Irregularities was 35.

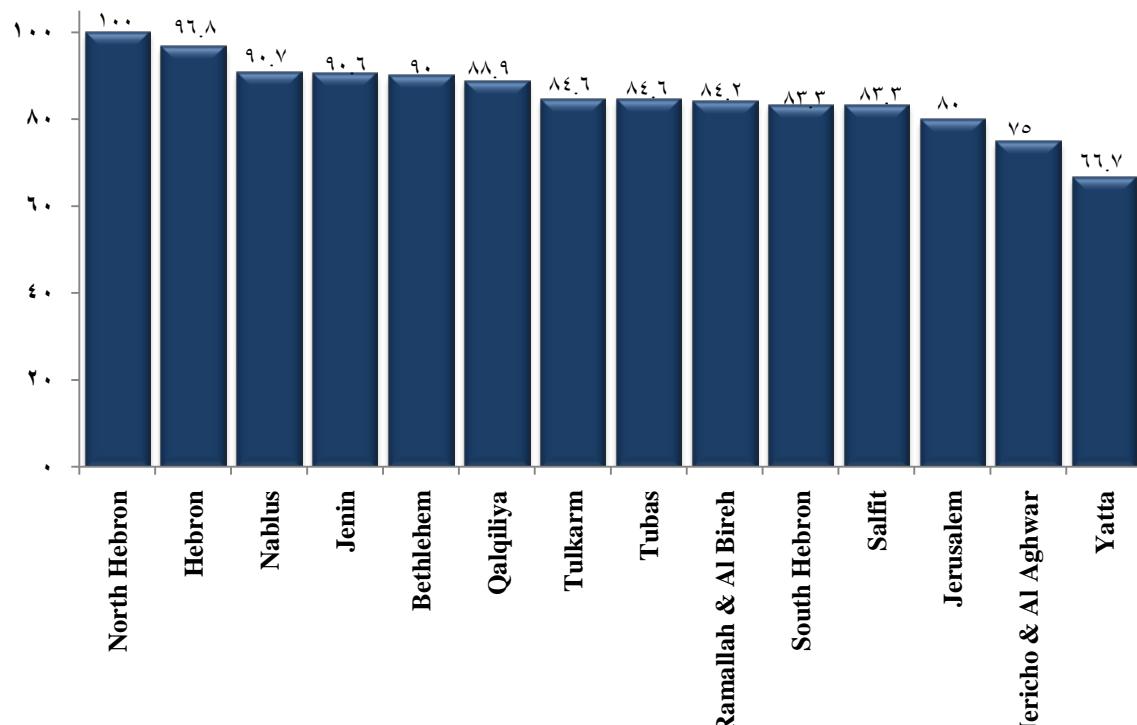

**Graph (51) Proportional Distribution of Licensed Crafts and Industries by Health Directorate, West Bank, Palestine 2016**

### 4. Environmental Detection of Factory Applications:

The total number of applications submitted during the year 2016 from the factories for the purposes of environmental detection were 230 applications, 87.8% of these requests were approved, while the rest were rejected.

**Graph (52) Proportional Distribution of Accepted of Factory Requests by Health Directorate, West Bank, Palestine 2016**

## **5. Combating Insects & Rodents:**

In the interest of Environmental Health Department to fight insect and rodents

In 2016, it distributed 6,021 liters of insecticides, 217 liters of herbicides and 2,450 kilograms of rodenticide.

## **2.9 Health Education Activities in 2016:**

In 2012, Palestinian Health Information Center (PHIC) built a computerized database for health education activities. The health education staff and statisticians were trained in the different health districts directorates. It was built in full coordination with the relevant departments in primary health care and public health, School Health department.

During 2016, 19,684 educational activities were carried out.

### **Implementing Teams for Health Education Activities:**

Health education activities were carried out by a number of staff including physicians, nurses, health counselors, pharmacists and others. The activities of the nursing staff were the highest, with 67.2% of these activities, 7.2% for midwife and 6.9% for health advisor.

### **Diversity of Methods of Implementing Health Education Activities:**

Health education teams carried out educational activities in a number of ways, including lectures, discussion groups, presentations and seminars. The lecture accounted for 40.3% of the health education activities carried out in 2016, followed by discussion groups, which accounted for 27.3% of the activities.

### **Health Education Activities according to Places of Implementation:**

The implementation of health education activities varied between sports clubs, schools, clinics and other places. The implementation of health education activities in clinics was the highest, with 89.4% of these activities followed by the activities carried out in schools, which amounted to 6.2% of these activities.

### **Implemented Health Education Programs:**

Health education programs varied between reproductive health, childhood diseases, non communicable diseases and healthy lifestyles. Healthy lifestyle activities accounted for 28.7% of the programs implemented in 2016 in various health directorates.

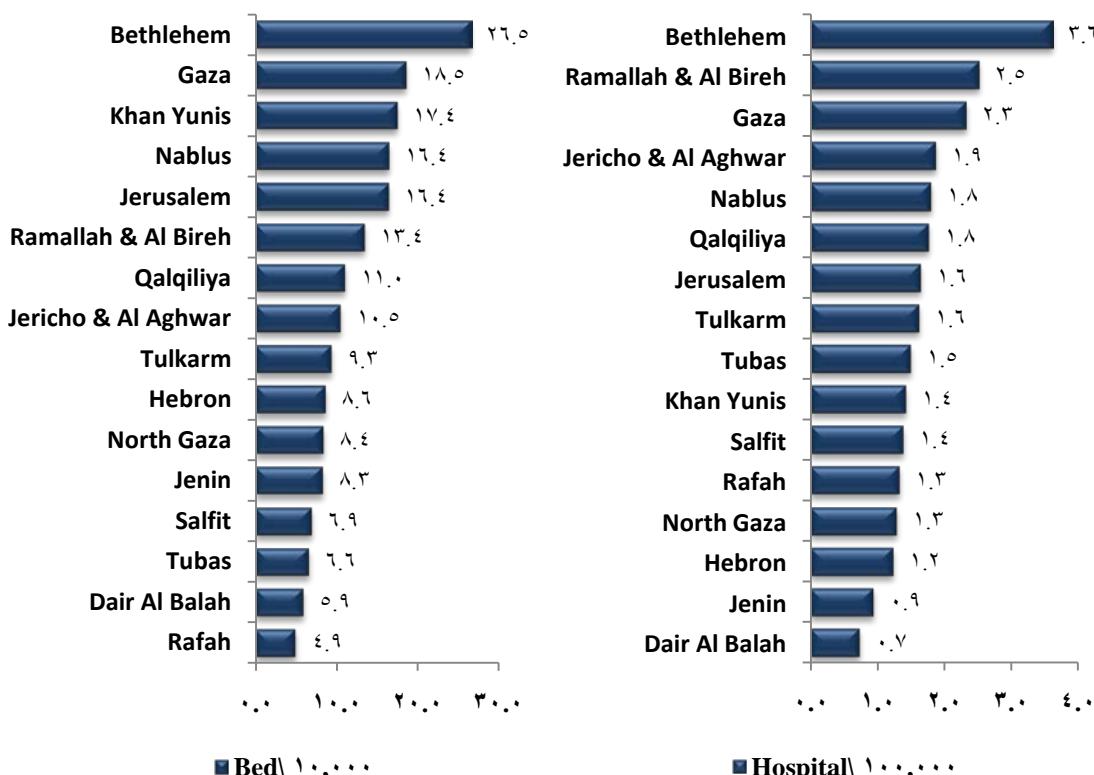

## **2.10 Secondary and Tertiary care in Palestine:**

### **2.10.1 Hospitals in Palestine:**

In 2016, the total number of hospitals in Palestine was 81 hospitals, 51 of them in West Bank, including East Jerusalem, which formed 63% of the total number of hospitals in Palestine.

The total number of hospital beds in Palestine (including psychiatric and neurological hospitals) is 6,146, with rate of 784 populations per bed, including East Jerusalem hospital beds; the rate was 784 population per bed in the Gaza Strip and 783 populations per bed in West Bank.

**Graph (53) Distribution of Hospital Rates per 100,000 Populations & Bed Rate per 10,000 Populations by Governorate, Palestine 2016**

## 2.10.2 Classification of Hospitals by Specialty:

### 1. General Hospitals:

These hospitals provide secondary health care services to their geographical area. Some of these hospitals have sufficient capacity to provide secondary health care and some tertiary health care. In 2016, the number of general hospitals in Palestine was 43, with a capacity of 4,455 beds.

### 2. Specialized Hospitals:

These hospitals provide specialized, advanced and comprehensive services in secondary and tertiary care. In 2016, there were 21 hospitals in Palestine with a total capacity of 1,206 beds.

### 3. Maternity Hospitals:

These hospitals provide services in the field of obstetrics and gynecology. In 2016, there were 13 hospitals in Palestine with a capacity of 296 beds.

### 4. Rehabilitation & Physiotherapy Centers:

Medical centers offering rehabilitation and physiotherapy services. In 2016, there were four centers with a total capacity of 189 beds in Palestine.

## 2.10.3 Ministry of Health Hospitals:

The Ministry of Health owns and manages 63.1% of the beds of general hospitals in Palestine, 39.2% of the beds of specialized hospitals, 14.5% of the maternity beds, and all mental and psychiatric beds.

The beds of the Rehabilitation and Physiotherapy centers in Palestine are all owned and managed by non-governmental organizations.

The number of hospitals in the Ministry of Health is 27 hospitals, with a capacity of 3,325 beds, or 54.1% of the total number of beds in Palestine.

There are 14 MoH hospitals in West Bank, with a capacity of 1,661 beds, equivalent to 50% of the total hospital beds of MOH, while there are 13 MoH hospitals in Gaza Strip. 1,664 beds or 50% of the total MoH hospital beds in Palestine

#### **2.10.3.1 Distribution of Hospital Beds of MoH by Specialty:**

##### **1. The beds of internal diseases and its sub-specialties:**

MoH allocated 849 beds of its hospital beds to internal diseases and its subspecialties. This family constitutes 25.5% of the total beds of hospitals of the MoH, of which 467 beds in West Bank and 382 in Gaza Strip

##### **2. General Surgery Beds & sub-Specialties:**

MoH allocated 907 beds to general surgery departments and sub-specialties. These beds comprised 27.3% of the total number of hospitals in MoH, of which 462 beds in West Bank and 445 beds in Gaza Strip.

##### **3. Pediatric Beds:**

The percentage of beds allocated to admit children is 19.3% of the total number of beds in MoH, which in 2006 reached 641 beds, including 260 beds in West Bank, 14 beds allocated for pediatric diseases and 381 beds in Gaza Strip.

##### **4. Beds of Obstetrics & Gynecology:**

The number of beds allocated to obstetrics and gynecology in MoH hospitals was 502 beds, representing 15.1% of the total number of hospitals in the MoH, of which 242 beds in West Bank hospitals and 260 beds in Gaza Strip hospitals.

##### **5. Intensive Care Unit Beds (Special Care):**

The total number of beds is 412 beds, constituting 12.4% of the total number of hospital beds of the MOH, including 216 beds in West Bank hospitals, and 196 beds in Gaza Strip hospitals.

##### **6. Beds of Mental & Psychiatric Diseases:**

MoH is the only provider of this service to the Palestinian citizens. It is provided by two hospitals, one in Gaza Strip with a capacity of 25 beds and the other in West Bank with a capacity of 180 beds.

#### **2.10.3.2 Indicators of Patients Admitted to Hospital Departments:**

##### **- Days of Treatment:**

In 2016, the total number of treatment days was 498,179 treatment days, with 170 days of treatment per 1,000 inhabitants in West Bank.

##### **- Beds Occupancy Rate:**

In 2016, the percentage of bed occupancy in MOH hospitals in the WB was 92.2%.

During the year 2016, the highest occupancy rate was recorded at Hebron Hospital (Alia), which reached 134%. The lowest occupancy rate was in Mohammed Ali Al Mohtasib Hospital in Hebron Governorate, which reached 45.2%.

#### **- Length of Stay:**

The rate of length of stay of the patient in MoH hospitals in Palestine was 2.2 days, with the exception of mental and psychiatric hospitals, where the rate of stay was 2.3 days at the psychiatric hospital in West Bank. In 2016, the highest patient stay rate was at Beit Jala (Al Hussein) Hospital, which was 2.6 days, while the lowest stay was recorded in both the Turkish Tubas Hospital and the Mohammed Ali Al Muhtasib Hospital, which reached 0.7 days.

#### **- Surgeries:**

59,278 surgical operations were performed in MoH hospitals in West Bank in 2016.

#### **- Deliveries in Hospitals:**

The number of live births registered in MoH hospitals was 36,050 in West Bank.

#### **- Caesarean Sections:**

In 2016 Caesarean Sections (CS) performed in MoH hospitals were 962 operations accounting for 24.9% of all deliveries in West Bank.

### **2.10.3.3 Hospital Outpatients Indicators:**

#### **- Outpatient Clinics:**

In 2016, the total number of follow up visits to outpatient clinics in MoH hospitals reached 581,713 visits in West Bank.

#### **- Emergency Services:**

In 2016, the number of visits to the emergency services in MoH hospitals reached 864,613 visits in West Bank.

#### **- Haemodialysis Services:**

In 2016, the total number of haemodialysis units in West Bank was 11 units in MoH, with 148 units of the Industrial kidney and one unit in An-Najah National University Hospital in Nablus with 35 devices for the kidney machines.

The number of patients receiving dialysis services in hospitals in WB was 1,119 on a regular basis, with a total of 147,494 haemodialysis.

#### **- Physiotherapy Services:**

During the year 2016, total visits to physiotherapy departments in the outpatient clinics of MoH hospitals in West Bank governorates amounted to 26,451 visits.

#### **- Diagnostic Radiology:**

These services are provided by radiology departments located in all hospitals of MoH West Bank. In 2016, the number of diagnostic radiographs conducted in the hospitals of MoH in Palestine was 643,324, including 49,019 ultrasound and 66,096 CT scans. This is in addition to 517,854 images of normal diagnostic radiographs and 10,355 magnetic resonance images.

**Table (3) Some of MoH Hospital Indicators, West Bank, Palestine 2012- 2016**

Indicators*	2012	2013	2014	2015	2016
No. of Beds	2,979	3,071	3,054	3,053	3,325
% of Occupancy Rate	82.7%	85.3%	86.6%	88.2%	92.2%
Length of Stay	2.4	2.4	2.5	2.9	2.2

\* Not include mental & Psychiatric hospitals.

#### **2.10.3.4 Psychiatric Hospitals:**

In 2016, the number of psychiatric hospitals beds in Palestine reached 205 beds. In West Bank, the percentage of beds occupancy was 67.3%. The rate of stay was 88.5 days, and the days of treatment in the psychiatric and mental hospital in West Bank were 44,246 days.

#### **2.10.4 Non-Ministry of Health Hospitals:**

In 2016, the number of non-Ministry of Health hospitals in Palestine reached 54, with a total bed capacity of 2,821 beds, representing 45.9% of the total hospital beds in Palestine.

The private sector owns and manages 16 hospitals with a bed capacity of 536 beds, or 7.9% of the total hospital beds in Palestine.

Non-governmental organizations (NGOs) own 34 hospitals, with a total beds capacity of 2,061 beds, or 33.5% of the total hospital beds in Palestinian Medical Military Services (PMMS) operate 3 hospitals, and UNRWA operates one hospital in Qalqiliya Governorate in West Bank.

##### **- An-Najah National University Hospital:**

The hospital was established by An-Najah National University in Nablus as an educational hospital affiliated with the Faculty of Medicine and Health Sciences. It was partially started in the second half of 2013 with a capacity of 22 beds, which was increased to 123 beds in 2016.

##### **- Medical Military Services Hospitals:**

There are 3 military hospitals in Palestine, all are in Gaza Strip; the Field Jordanian Hospital, Abasan Hospital and Balsam Hospital with a bed capacity of 161 beds. The Field Jordanian Hospital has 44 beds, Abasan Hospital has 43 beds and Balsam Hospital has 74 beds. It is worth to mention there are no Military Services Hospitals in West Bank.

##### **- UNRWA Hospital:**

Medical services at UNRWA own and operate only one hospital in Palestine, it is located in Qalqiliya governorate in West Bank, with a capacity of 63 beds.

##### **- Jerusalem Hospitals:**

There are 7 hospitals operating in East Jerusalem with a bed capacity of 698 beds.

##### **- Rehabilitation Centers:**

Palestine has 4 rehabilitation centers, all of which are non-governmental, with a capacity of 189 beds, which is 3.1% of the total hospital beds in Palestine.

#### **2.10.5 Palestine Medical Complex (PMC):**

On August 8, 2010, President Mahmoud Abbas inaugurated the Palestinian Medical Complex in Ramallah. The complex was established by a presidential decree issued in 2009 with the aim of developing the management of the governmental hospitals in the city of Ramallah and upgrading the quality of health services provided to the Palestinian citizens. Promoting social participation and rationalizing spending by reducing outpatient referrals abroad.

##### **Palestine Medical Complex Wings:**

The Palestine Medical Complex consists of four wings: Ramallah's son's wing, Paediatric wing, Cardiac and Specialized surgeries wing, Emergency wing, in addition to the Central Blood Bank.

##### **1. Ramallah's Son's Wing**

It includes 135 beds, with an occupancy rate of 99.3%.

## **2. Paediatric Wing:**

It includes 57 beds and an occupancy rate of 103.8%.

## **3. Heart & Specialized Surgeries Wing:**

It includes 46 beds, with an occupancy rate of 98.6%.

## **4. Emergency Wing:**

In 2016, 105,489 patients were treated in the emergency wing.

## **5. National Blood Bank:**

The National Blood Bank was established by a decision of His Excellency the Minister of Health to work on providing a national stockpile of safe blood, which is provided when needed by establishing the concept of voluntary blood donation.

The National Blood Bank donated 23,334 blood units in 2016, of which 7,494 units were donated through voluntary donations and 15,840 donated by relatives to relatives in need of blood.

## **2.11 Laboratories & Blood Banks:**

### **2.11.1 Laboratories Classification:**

General Directorate of Medical Support Services is the official body for the care of laboratories and blood banks. This service is provided in Palestine, where the laboratory is equipped with the latest laboratory equipment and the necessary manpower.

### **Laboratories in the Ministry of Health:**

Laboratories in the Ministry of Health are classified into three categories: central, medium and peripheral.

#### **- Central Laboratories:**

It is an advanced laboratories which the samples are transferred to it from different governorates of WB for examination, under this classification falls the following laboratories:

#### **1. Central Public Health Laboratory in Ramallah:**

In this laboratory, food, medicine and drinking water are tested for safe human consumption. Neonatal screening samples are also screened for phenylketonuria (PKU) and thyroid stimulating hormone (N-TSH). Serological tests are also carried out for some viral diseases and DNA.

#### **2. Histopathology Laboratories:**

In West Bank, histopathology tests are conducted in Rafidia Surgical Hospital in Nablus, in Beit Jala Hospital and Palestine Medical Complex.

There are 6 histopathologists and 8 laboratory technicians working in this field. A total of 13,592 samples have been examined, the average cost of the sample examination is 25 Nis.

#### **- Intermediate Labs:**

It is developed in hospitals of MoH, in which samples of inpatients, outpatient clinics and samples transferred from clinics of health directorates are examined in each governorate.

The average number of labs in West Bank was 14, with 232 technicians and specialists, and 4,714,807 laboratory tests were carried out. The average number of annual examinations per lab technician was 21,944, and the average direct cost per examination was 2.7 NIS

**Table (4) Distribution of Intermediate Labs Tests, MoH, West Bank, Palestine 2016**

Item	No. of Tests	%
Clinical Chemistry	2,785,974	59%
Hematology & Coagulation	1,056,433	22.4%
Routine Test	398,862	8.5%
Serology & Immunology	195,209	4.2%
Microbiology	84,673	1.8%
Hormones	193,656	4.1%
	4,714,807	100%

**- Terminal Laboratories:**

Which are PHC laboratories. The samples of these clinics are examined and divided into four levels (one to four).

In West Bank, there are a total of 188 laboratories distributed in all governorates, of which 16 non-governmental laboratories have been contracted. There are 242 technicians working in these laboratories. A total of 2,142,143 laboratory tests have been carried out. The average number of annual examinations is 8,852 for each technician; the average test cost is 2.5 NIS.

**Table (5) Distribution of Terminal Labs Tests, MoH, West Bank, Palestine 2016**

Item	No. of Tests	%
Clinical Chemistry	1,046226	%48.8

Total	2,142,143	%100

**1. Blood Banks in Hospitals:**

Most blood transfusion services are concentrated in hospitals. MoH is the main provider of blood transfusion services in Palestine and supervises the other institutions that provide this service.

The number of blood donors in MoH hospitals in West Bank was 23,334, of which 7,494 were voluntary donations, 15,840 donated to relatives or acquaintances, 32.1% were voluntary donors and 67.9% were relatives or acquaintances.

All donated blood units are screened for blood transfusion diseases. These include: B viral hepatitis where positive tests were 0.5%, viral hepatitis C was positive and 0.1% positive and HIV (AIDS). Initial results showed that 5 positive samples were needed and the syphilis test was done for the units of fresh blood transfusion and the units from which the platelets were prepared. The positive results were zero.

In 2016, 48,293 units of blood and blood transfusion were transferred to patients in MoH hospitals in West Bank.

**Table (6) Distribution Blood Units given, MoH Hospitals, West Bank, Palestine 2016**

Units Given	No. of Units	%
<b>Whole Blood</b>	<b>525</b>	<b>%1.1</b>

## 2.11.2 Laboratories & Blood Banks Staff:

The number of laboratories and blood banks staff working in MoH in Palestine with a certificate of laboratory medical sciences is 998 cadres, 26 of which are administrative sites. There are 539 technicians working in West Bank and 433 in Gaza Strip. There is no complete separation between laboratories and blood banks. The scientific qualifications of these cadres range from diploma to doctorate, the vast majority of them are a bachelor's degree in medical analysis.

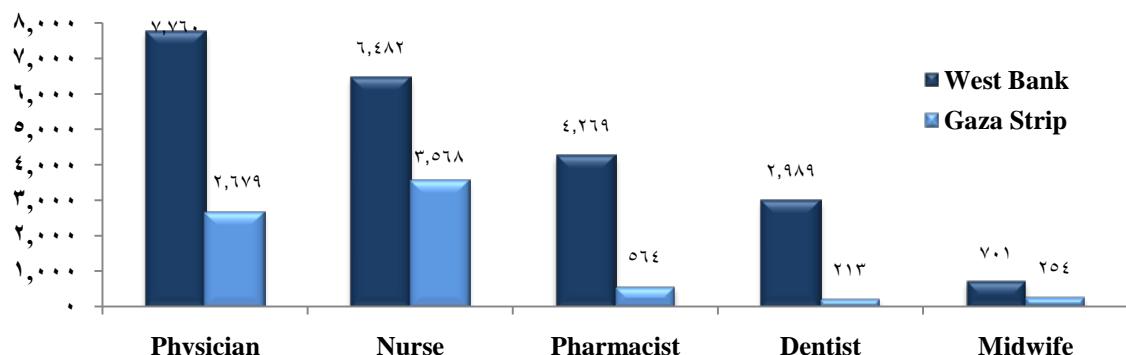

## 2.12 Health Human Resources in Palestine:

Medical services in Palestine are provided by MoH, non-governmental health institutions, military medical services, the (UNRWA) and the private sector.

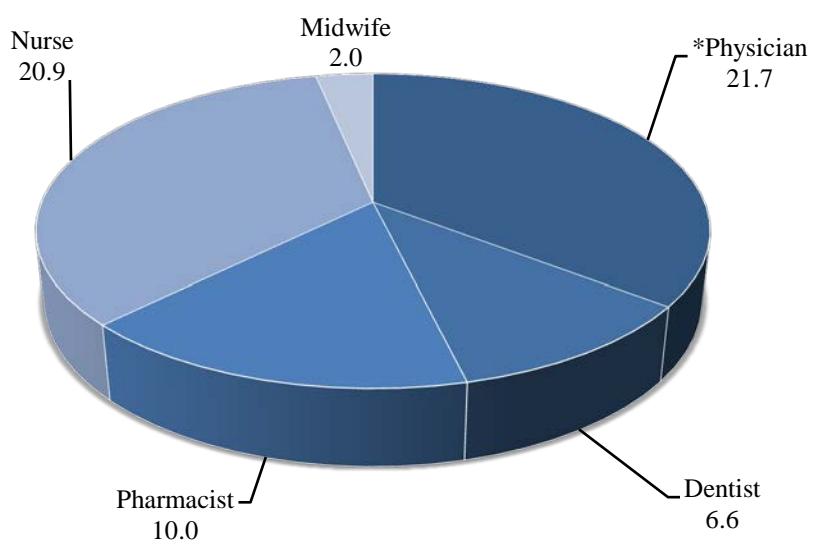

The number of medical cadres registered in various medical associations in Palestine reached 29,479 cadres, of which 22,201 were in WB at 75.3%, and 7,278 were in Gaza Strip at

24.7%, while the number of medical staff working in MoH was 7,149 employees, 24.3% Of the total human medical personnel working in the health sector.

**Graph (54) Distribution of Medical Human Resources by Specialty & Region, Palestine 2016**

**Graph (55) Medical Human Resources Rate per 10,000 Populations, Palestine 2016**

\* Includes Generals & specialists Physicians

### 2.12.1 Distribution of Human Resources Working in MoH:

MoH is the largest employer of human resources working in the health sector in Palestine. In 2016, the number of employees in the Palestinian MoH reached 14,248 employees at a rate of 29.6 employees per 10,000 population, of which 7,534 (52.9%) were employed in West Bank and 47,714 % In Gaza Strip.

The number of medical staff working in MoH reached 8,723, including the supporting medical professions, which accounted for 61.2% of the total number of employees in the MoH, in addition to 5,525 employees working in the field of administration and services, representing 38.8% of the total workforce in MoH.

#### 1. Physicians:

The number of physicians working in different centers and units of MoH was 2,529 physicians, with 5.3 doctors per 10,000 population of Palestine; 4.1 physicians per 10,000 populations in West Bank and 7.0 physicians per 10,000 populations in Gaza Strip.

Physicians are distributed according to specialization where 1,464 with 57.9% are general physicians, with a rate of 3.0 physicians for every 10,000 populations, of which 711 with 48.6% work in West Bank and 753, 51.4% in Gaza Strip. There are 878 with 34.7% specialized physicians out of total physicians, equivalent to 1.8 specialized physicians per 10,000 populations, of whom 436 work in West Bank by 49.7% and 442 in Gaza Strip by 50.3%. 187 with 7.4% are dentists with 0.4 dentists per 10,000 populations, 70 with 37.4% in West Bank and 117 with 62.6% in Gaza Strip.

## **2. Pharmacists:**

MoH employs 478 pharmacists with a rate of one pharmacist per 10,000 populations, 264 of who are pharmacists 55.2% in West Bank, and 214 pharmacists 44.8% in the Gaza Strip.

## **3. Nursing & Midwifery:**

The number of nurses and midwives working in MoH was 4,142 nurses and midwives, of which 2,715 with 65.5% were employed in West Bank and 1,427 with 34.5% in Gaza Strip, distributed according to specialization to 3,745 nurses with 7.8 per 10,000 populations and 397 midwives with 0.8 per 10,000 inhabitants.

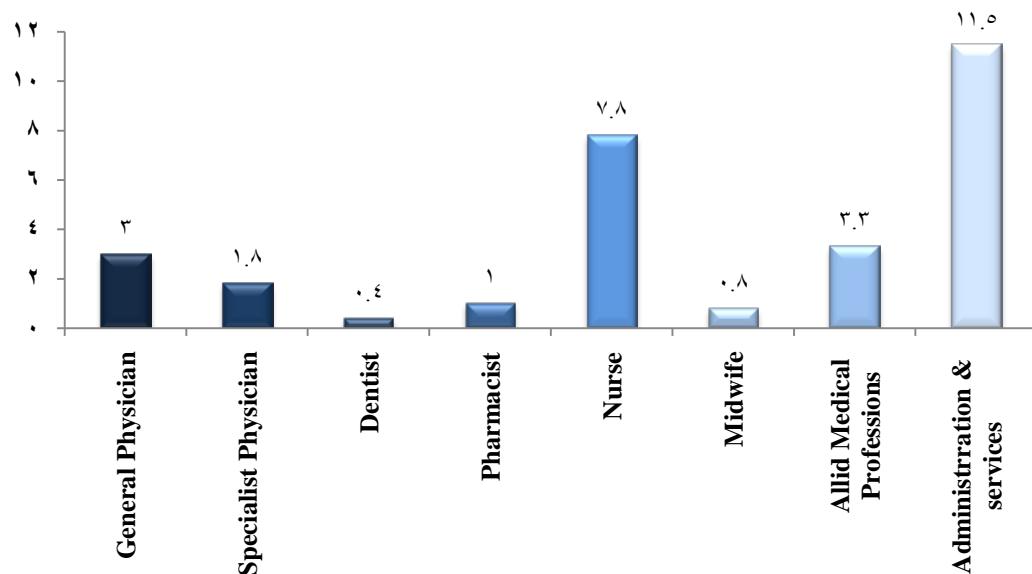

## **4. Allied Medical Professions:**

MoH employs 1,574 staff in the allied medical professions, with an average of 3.3 employees per 10,000 populations, of which 1,150 with 73.1% in West Bank and 424 with 26.9% in Gaza Strip.

## **5. Administration & Services:**

MoH employs 5,525 employees in management and services at 11.5 per 10,000 populations, of which 2,188 with 39.6% are in West Bank and 3,337 with 60.4% are in Gaza Strip.

**Graph (56) Human Resources Rates per 10,000 Populations by Specialty, MoH, Palestine 2016**

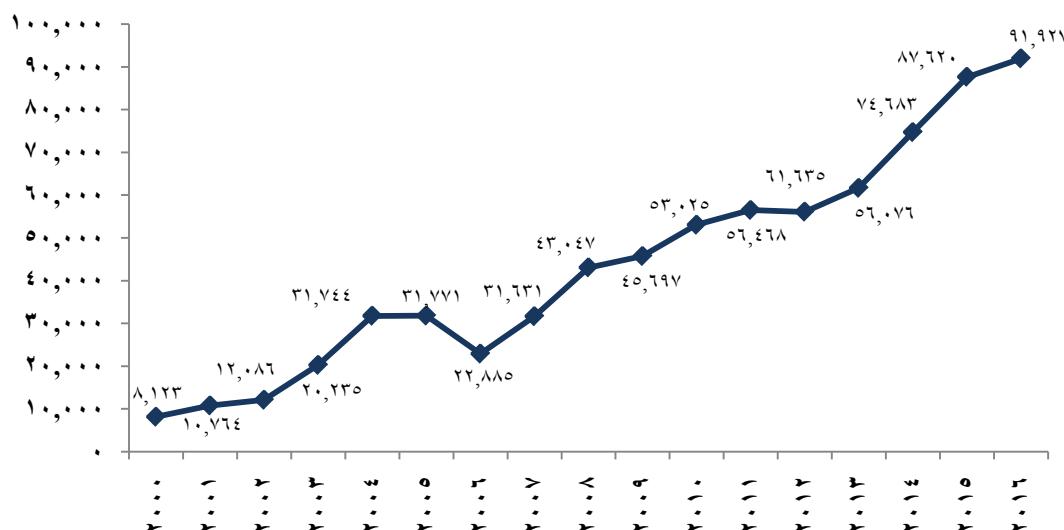

## **2.13 Purchase of Health Services from outside MoH (Referral for Specialized Treatment outside MoH Facilities):**

### **2.13.1 Number of Referrals outside MoH Facilities in 2016:**

In 2016, the total number of referrals outside MoH was 91,927; an increase of 4.9% over the year 2015, with a total of 87,620 referrals, with an increase of 23.1% over the year 2014, referrals in that year was 74,683 referrals.

In 2016, the total cost of all referrals amounted to 566,720,980 NIS, an increase of 1.04% over the year 2015, where the cost of referrals amounted to 560,873,668 NIS.

**Graph (57) Number of Referrals for Treatment outside of MoH Facilities, Palestine 2000- 2016**

### **2.13.2 Distribution of Service Purchase Referrals in 2016 by Sex:**

The number of males referred to treatment outside hospitals of MoH was 48,680 males, 53%, and the number of female 43,247 females and 47% of the patients referred in 2016.

### **2.13.3 Distribution of Service Purchase Referrals by type of Service:**

The number of referrals for medical consultation was 19,927, accounting for 21.5% of total referrals, at a cost of 57,039,352 NIS. In 2015, the rate of referrals for consultation was 18.1%. In 2016, the number of referrals admitted was 72,169 referrals, constituting 78.5% out of all referrals at a cost of 509,681,628 NIS. While in 2015, the rate of referrals admitted was 81.9%.

### **2.13.4 Distribution of Referrals in West Bank & Gaza Strip:**

The number of referrals from Gaza Strip reached 24,616, representing 26.8% of the total number of referrals in 2016, at a cost of 164,948,307 NIS, or 29.1% of the cost of purchasing the service from outside MoH facilities.

The number of referrals from West Bank reached 67,311 transfers, representing 73.2% of the total referrals, at a cost of 401,772,673 NIS, or 70.9% of the cost of purchasing the service from outside MoH facilities.

## **2.13.5 Distribution of Referrals by Place of Treatment:**

### **A. Purchasing the Service from Local Hospitals (inside Palestine):**

These include private and non-governmental hospitals in Gaza Strip, West Bank and East Jerusalem, where 76,949 cases were referred, representing 83.7% of MoH's total referrals in 2016.

The total cost of these transfers amounted to 440,482,859 Nis, which is equivalent to 77.7% of the cost of purchasing the service from outside MoH, with an average cost of one referral of 5,724 NIS.

In 2015, this cost was 432,203,766 Nis, which accounted for 77.1% of the total cost of purchasing the service, at an average cost of 5725 NIS.

#### **\* Purchasing the Service from Hospitals in Gaza Strip:**

2,994 medical referrals were issued to hospitals in the southern governorates (Gaza Strip). All these medical referrals were for patients from Gaza Strip, constituting 3.3% of the total number of medical referrals for treatment outside the Ministry of Health. Out of total Gaza Strip referrals 12.2% were issued for cases transferred to non-governmental hospitals within Gaza strip..

The cost of referrals issued for treatment in the Gaza Strip outside MOH was 9,353,118 NIS, which accounting 1.7% of the total cost of purchasing the service, at an average cost of 3,124 Nis per referral.

#### **\* Purchasing the Service from West Bank Hospitals:**

33,741 referrals for treatments were referrals to non-MoH hospitals in West Bank. This represents 36.7% of the total referrals of MoH, at a cost of 170,225,234 NIS, representing 30% of the total treatment expenses abroad, with an average cost of 5,045 NIS per every referral.

#### **\* Purchasing the Services from East Jerusalem Hospitals:**

In 2016, the total number of referrals to East Jerusalem hospitals was 40,214, representing 43.7% of the treatment referrals outside MoH, at a cost of NIS 260,904,507, equivalent to 40.8% of the total cost of purchasing the service from outside MoH. The cost was 6,230 NIS per every referral.

29,633 referrals were conducted for patients from West Bank at a cost of 177,026,965 NIS and 10,581 cases from Gaza Strip at a cost of 83,877,542NIS.

In 2015, the cost of referrals amounted to 228,827,732 NIS, equivalent to 40.8% of the total cost of purchasing the service from outside MoH, at an average cost of 6,230 NIS per every referral for East Jerusalem Hospitals.

### **B. Purchasing the Service from Hospitals outside of Palestine:**

These include hospitals in Egypt and Jordan as well as hospitals located within the Green Line (Israel), where 14,978 referrals were made, representing 16.3% of MoH's total revenues in 2016 at a total cost of 126,238,121 NIS, equivalent to 22.3% The total cost of purchasing the service from outside MoH, at an average cost of 8428 NIS per every referral.

In 2015, the cost of referrals outside Palestine reached 128,669,902 NIS, equivalent to 22.9% of the total cost of purchasing the service from outside MoH, at an average cost of 10,606 NISs per every referral.

#### **\* Purchasing the Service from Hospitals in Egypt:**

The total number of referrals to Egypt in 2016 was 1,752, or 99.5% of those referred to Egyptian hospitals, and 9 of them were from the West Bank, or 0.5% of total referrals to Egypt.

In 2016, the cost of treatment in Egyptian hospitals amounted to 2,837,602 NIS, which constitutes 0.5% of the total cost of purchasing the service, and the average cost per conversion is 1,611 NIS.

In 2015, the cost of treatment in Egyptian hospitals amounted to 3,155,680 NIS, which constituted 0.6% of the total cost of purchasing the service, and the average cost of the referral is 1,795 NIS per every referral.

#### **\* Purchasing the Service from the Hospitals of the Hashemite Kingdom of Jordan:**

50 health care facilities were issued in the health facilities of the Hashemite Kingdom of Jordan, accounting for 0.05% of the total number of service purchases in 2016, including 24 from West Bank and 26 from Gaza Strip.

In 2016, the cost of purchasing the treatment service was 246,885 NIS; representing 0.04% of the total cost of purchasing the service, and the average cost per every referral is 4938 NIS.

In 2016, referrals to Jordan decreased by 31.5% from the year 2015, which amounted to 703,648 NIS, representing 0.13% of the total purchase of the service, with an average cost of one referral of 9,639 NIS.

#### **\* Purchasing the Service from Hospitals inside the Green Line (Israel):**

In 2016, the number of referrals within the Green Line (Israel) reached 13,167, or 14.3% of the total number of cases of purchase of the service, by 8,699 cases from West Bank, representing 12.9% of West Bank referrals and 4,468 referrals from Gaza Strip or 18.2% from Gaza strip referrals.

The cost of referrals within the Green Line amounted to 123,153,634 NIS, or 21.7% of the total cost of treatment outside of Ministry of Health. The average cost per referral was 9,353 NIS.

In 2015, the cost of referrals within the Green Line amounted to 124,810,574 NIS, representing 22.3% of the total cost of treatment outside MOH. The average cost of one referral was 12,118 NIS.

#### **2.13.6 Distribution of Purchase of Service in 2016 by Governorate:**

Hebron governorate was the highest governorate in terms of the number of referrals, because Hebron governorate is the first governorate in terms of population in Palestine, followed by Gaza governorate.

#### **2.13.7 Distribution of Referral Cases by Disease & Cost:**

**Table (8) Top 10th of Diseases by Number of Referrals & Cost (NIS), Palestine 2016**

Disease	No.	%	Cost	%

## 2.14 Health Insurance:

### 2.14.1 Health insurance in Gaza Strip:

Under article (2) of the presidential decree issued on 26/6/2007, which stipulates that "all citizens in the southern governorates are exempted from all services fees provided by the ministries, bodies and institutions of the Palestinian National Authority as of date, including the services provided for the first time All residents of Gaza Strip enjoy the free health insurance provided by the Ministry of Health from then until now. In other words, the coverage of the population of Gaza Strip by the health insurance of the Ministry of Health is 100%.

### 2.14.2 Health Insurance in West Bank:

In 2016, there were 214,982 families participating in health insurance in West Bank. Insurance revenues in West Bank was 178,609,441 NIS, and 15,304 families had free health insurance.

The revenues of symbolic contributions in some services (medicines, radiology and laboratory) amounted to 51,263,161 NIS.

The highest number of insured families was in Hebron governorate with 55,446 families, followed by Ramallah and Al-Bireh governorate with 30,366 families. The lowest number of insured families in Jericho and Al-Aghwar governorate reached 4,500 families.

### 2.14.3 Types of Health Insurance:

#### 1. Compulsory Insurance:

This type of insurance is shared by public sector employees, municipalities and retirees. The number of families participating in this insurance was 67,331 in West Bank. The return on this insurance was 60,619,111NIS.

#### 2. Voluntary Insurance:

The number of families participating in this insurance was 2,662 in West Bank, and the return on this insurance was 1,910,583 NIS.

### **3. Insurance of workers within the Green Line (Workers in Israel):**

The number of families benefiting from this insurance was 40,330 families in West Bank, and the return of this insurance was 62,680,977 NIS.

### **4. Group Insurance (Group Contracts):**

The number of families participating in this insurance was 42,616 families in West Bank, and the cash yield from this insurance was 30,572,870 NIS.

### **5. Insurance of Social Affairs (Social Welfare):**

The number of families participating in this insurance was 31,727 in West Bank, and the return on this insurance was 14,860,900 NIS.

### **6. Prisoners' Insurance:**

The number of insured prisoners and their families in this insurance was 15,012 in West Bank, and the return of this insurance was 7,965,000 NIS.

## **2.15 Pharmacy in Palestine:**

MoH is responsible for all pharmaceutical issues in Palestine, which are the backbone in the treatment of patients. MoH seeks to provide medicines and medical supplies and fill the shortage of stocks.

**Table (10) Distribution of Expenditure of Medicines & Medical Consumables from Drug stores (in NIS), MoH, Palestine 2014- 2016**

Year	Medicines, Vaccines & Lab Materials	Medical Consumables	Total
2014	186,170,588	22,621,623	208,792,211
2015	268,454,352	40,298,643	308,752,995
2016	270,689,662	40,363,896	311,053,558

### **Rationalize Consumption of medicines:**

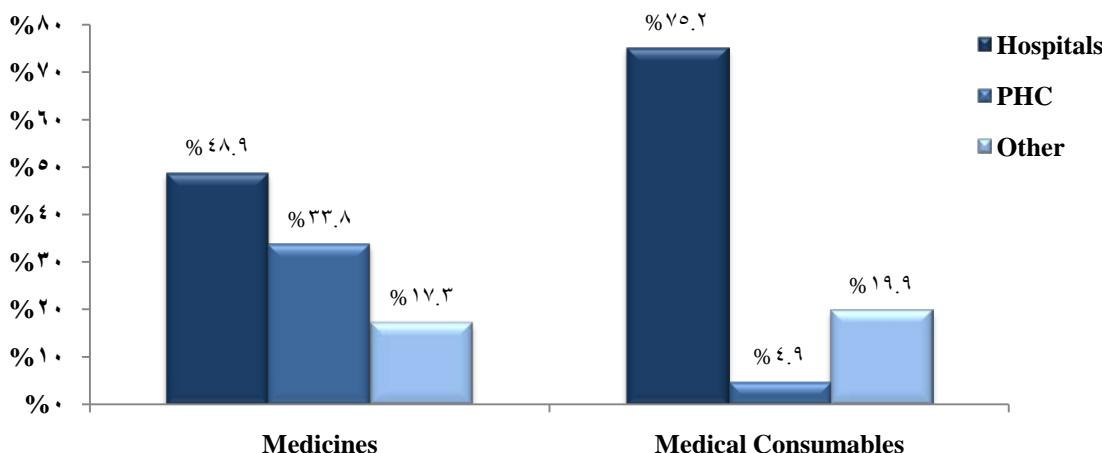

In 2016, the list of essential drugs in circulation comprised 522 items of all pharmaceutical forms and compositions, as well as a list of complementary drugs consisting of 40 varieties, as required by the services provided by Ministry of Health, while the list of basic medical tasks consists of 1,600 items.

In 2106, 826 activities were carried out to rationalize drug consumption.

**Table (11) Distribution of Expenditure of Medicines & Medical Consumables from Drug stores (in NIS) by Consumer Site, MoH, Palestine 2016**

Site	Hospitals	PHC	Other	Total
Medicines	132,358,464	91,509,138	46,799,725	270,667,327
Medical Consumables	30,335,377	1,969,489	8,032,551	40,337,417

**Graph (58) Proportional of Outgoing Medicines & Medical Consumables from Drug Store by NIS & Consumers, MoH, Palestine 2016**

#### **Pharmaceutical Control:**

The total number of inspection visits to the different pharmaceutical establishments distributed to all the governorates of West Bank was 4,055 in addition to 297 inspection visits to non-pharmaceutical institutions to ensure that the pharmaceutical institutions applied the laws, regulations, instructions and ministerial decisions related to practicing the pharmacy profession and ensure the arrival of a safe, effective and high-quality medicine at the official price of the Palestinian patient, the number of criminal procedures issued by the Drug Control 74 criminal proceedings in 2016.

#### **Medicines Register:**

Medical Registration is including registration of human and veterinary medicines, registration of food supplements, medicinal herbs, cosmetics, medical instruments and materials. In 2016, 252 human medicines were registered, and veterinary medicines registered 9 items. Medical equipment registered in the year 21, as well as 51 types of medical instruments and materials, and 532 cosmetic preparations.

It were approved on registered of 105 human medicines, five veterinary drugs, and 131 cosmetic preparations ,adding to 76 free sales certificates for human medicines and 139 pharmaceutical preparations (CPP) were approved.

#### **Medicine Pricing:**

In 2016, the number of exported and imported medicines reached 3,475, of which 1,072 were local medicines and the rest were imported medicines. The price of 1,181 pharmaceutical products has been reduced since the beginning of 2016.

#### **Pharmaceutical Quality:**

Until the end of 2016, the number of local pharmaceutical factories for the pharmaceutical industry was five factories in West Bank and three factories in Gaza Strip, five factories for veterinary medicines, three factories for food supplements and medicinal herbs, 16 cosmetics factories. The Palestinian Manufacturing Certificate was renewed for four local human pharmaceutical factories.

The number of inspection visits to local factories was 158 visits to inspect the application of technical quality instructions and requirements of good industrial practice, and 78 visits to the newly released products.

Pharmaceutical samples were followed up with a total of 2,170 samples, of which 1,146 medical samples and 1,024 samples were cosmetic.

#### **Medicines Import:**

During the year 2016, 819 import licenses for raw materials were approved, 781 import licenses for cosmetics were issued, 294 import and export controls were approved, 27 import permits were approved for unregistered medicines for which there was no registered alternative, and approval of 10 permits for the introduction of medical instruments and tasks.

#### **Pharmaceutical Human Resources:**

In 2016, the number of new pharmacists in West Bank reached 204 pharmacists, reaching a total of 4,269 pharmacists. The total number of pharmacists' assistants was 1,118.

**Table (12) Pharmacists Rate per 10,000 Populations by Governorate, West Bank, Palestine 2016**

Governorate	** No. of Pharmacists	* Population	Pharmacists\ 10,000 Of Pop.

#### **Pharmaceutical Human Resources in MoH:**

In MoH working 478 pharmacists with a rate of one pharmacist per 10,000 populations, 264 of who are 55.2% in West Bank and 214%, or 44.8% in Gaza Strip. The pharmacists' assistants were 304 pharmacists at MoH, 0.6 per 10,000 of whom 170 were pharmacists, or 55.9% in West Bank, and 134%, or 44.1%, in Gaza Strip.

**Table (13) Pharmacists by Qualification & Workplace, MoH, West Bank, Palestine 2016**

#### Pharmaceutical institutions:

##### Private Pharmacies:

At the end of 2016, there were 1,023 pharmacies with renewed licenses in West Bank, with one pharmacy rate for every 2,869 inhabitants. There is a ministerial decision in coordination with the Pharmacists Syndicate to determine the number of pharmacies in proportion to the population (one pharmacy / 4,000 inhabitants), and to encourage the opening of pharmacies in remote rural areas.

Hebron governorate recorded the highest number of pharmacies with 22.7%, while Jericho and Al Aghwar governorate recorded the lowest percentage of pharmacies and reached 1.3%. The most densely populated governorates are Ramallah and Al Bireh governorates, with one pharmacy for every 2,132 inhabitants.

**Table (15) No. of Populations per Pharmacy by Governorate, West Bank, Palestine 2016**

Governorate	* No. of Pharmacy	** Population	Pop.\ Pharmacy

#### **Stores & Pharmaceutical Companies:**

In 2016, the number of drug stores, cosmetic warehouses and food supplements stores, as well as pharmaceutical companies that directly imported drugs were 146 stores and companies.

#### **2.16 Health Expenditure in MOH:**

In 2016 According to the data received from the General Directorate of Finance in the Palestinian Ministry of Health, the current budget of Palestinian Ministry of Health amounted to 1,711,900,000 NIS, distributed over the main budget items, where the salary item accounted for the largest percentage of 50% of the total budget followed by treatment abroad by 27% , While the item of medicines and medical consumables amounted to 16% and the item of capital expenditures and other operating are the smallest percentage which amounted to 7% of the total current budget.

**Graph (59) Proportional Distribution of Ongoing Budget, MoH, Palestine 2016**

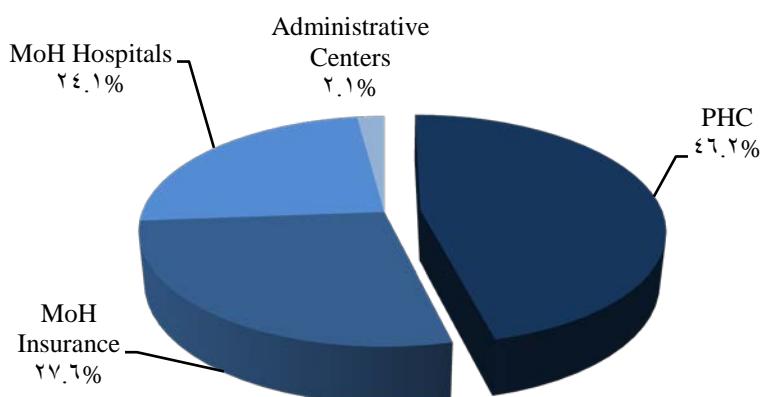

The balance of arrears (for debts from 2015 and earlier) amounted to NIS 604,700,216, distributed over the main budget items. The referral abroad item (purchase of services from outside MOH) constituted 55% of the total balance of arrears. Medicines and medical consumables accounted for 41%, other capital and operating expenses accounted for 4% of the total balance of arrears.

## **2.17 General Revenues of the Palestinian MOH:**

In 2006, the general revenues of the Palestinian MOH amounted to 121,316,838 NIS, divided by type of revenue. The general revenues collected from primary health care constituted the highest percentage of revenues, reaching 46.2%, followed by public revenues from health insurance, which amounted to 27.6% Public revenues collected from government hospital revenues were 24.1%, while public revenues from administrative centers were the lowest which account of 2.1%.

**Graph (60) Proportional Distribution of Total Revenues, MoH, Palestine 2016**

## Section III

### Trends in Health Status

#### 3. Health Status in Palestine

##### 3.1 Morbidity

###### 3.1.1 Communicable Diseases:

Vaccination coverage levels are one of the best indicators of the health system performance. Therefore, MoH provides all the needed services to ensure that immunizations for each child according to the national immunization schedule are granted.

###### 1. Poliomyelitis & Acute Flaccid Paralysis (AFP):

Poliomyelitis became under control since the MoH was able to prevent and eradicate the disease with no cases recorded since 1988.

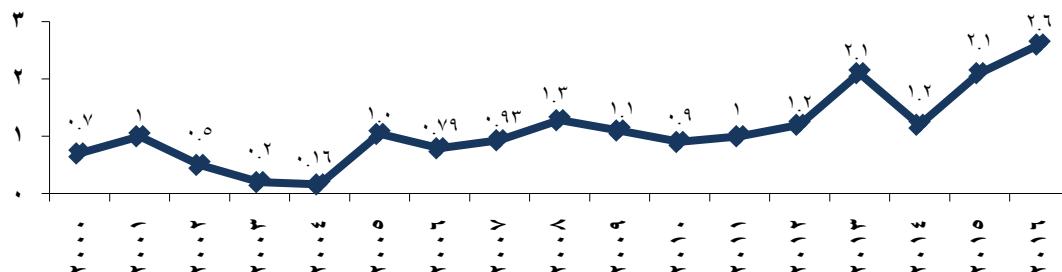

Based on WHO recommendations, MoH monitors cases of acute flaccid paralysis in children under the age of 15 years and takes two stool samples from each case which is recorded in order to ensure that Palestine is free from poliomyelitis.

In 2016, 46 cases of acute flaccid paralysis were reported, with a rate of 2.6 per 100,000 children under the age of 15, of which 30 were registered in West Bank and 16 in Gaza Strip, all of which were polio-free.

In 2015, 38 cases of acute Flaccid Paralysis were reported, with a rate of 2.1 per 100,000 children under the age of 15, of which 26 were registered in West Bank and 12 in Gaza Strip, all of which were free of poliovirus.

MoH follows the World Health Organization (WHO) standards for poliomyelitis eradication through high immunization coverage, national vaccination days, vaccination of children at risk places where needed, and epidemiological surveillance of acute Flaccid Paralysis (AFP).

**Graph (61) Incidence Rate of AFP per 100,000 Children under 15 years of Age, Palestine 2000- 2016**

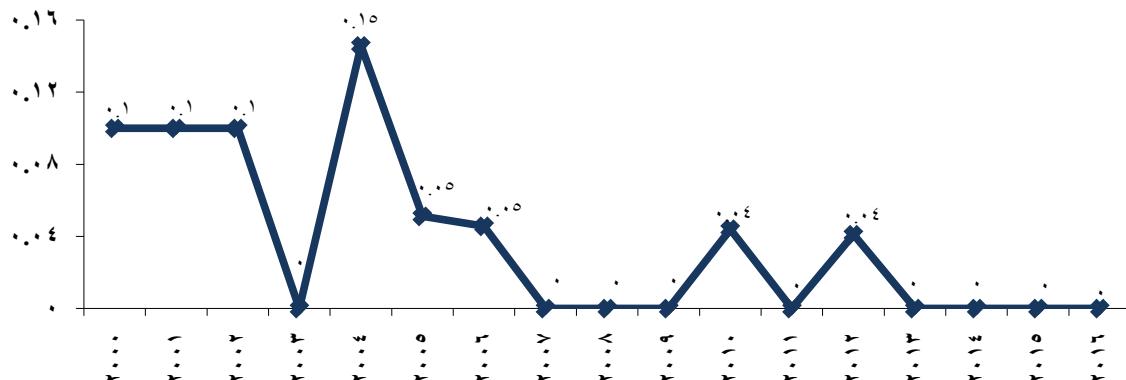

###### 2. Measles:

In the last few years, measles incidence rate was about 0.1 per 100,000 of population. A single measles case was recorded in Hebron Governorate in 2006, while no cases have been reported since 2007 in both West Bank and Gaza Strip. MoH has been able to reach the required standards for measles elimination, according to WHO, through high coverage of children with measles doses at the age of 9 months and 15 months, which replaced by MMR at 12 months and 18 months. Measles vaccination campaigns and MMR routine vaccination in the past years were implemented to increase the herd immunity in the Palestinian community against this disease.

In 2010, only one case was recorded in Jerusalem governorate, while no cases were recorded in 2011. In 2012, only one case was recorded in Nablus Governorate, while in 2013, 2014, 2015 and 2016 no cases were recorded.

**Graph (62) Incidence Rate of Measles per 100,000 Pop., Palestine 2000- 2016**

### 3. Tuberculosis:

#### 3.1 Pulmonary Tuberculosis

The incidence rate of pulmonary tuberculosis is increasing worldwide, at an annual rate of 1.1%. In 2016, 36 cases of tuberculosis were recorded in Palestine with an incidence rate of 0.79 per 100,000 populations, of which 6 were in West Bank with a rate of 0.22 per 100,000 population and 30 cases in Gaza Strip at a rate of 1.59 per 100,000 populations.

In 2015, the number of registered tuberculosis cases was 18, eight cases in Gaza Strip and ten cases in West Bank, with a rate of 0.38 per 100,000 populations.

#### 3.2 Extra-pulmonary Tuberculosis:

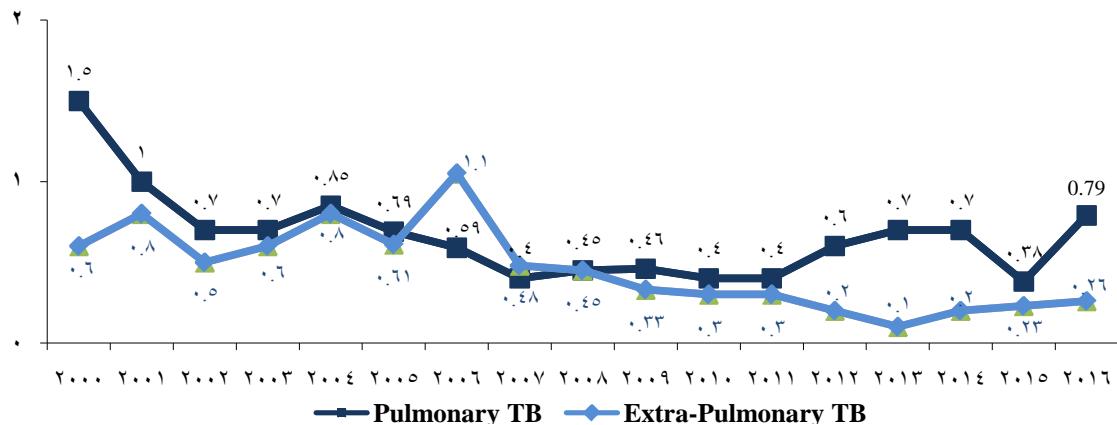

In 2016, 12 extra-pulmonary tuberculosis cases were reported, of which 9 were in Gaza Strip and 3 in West Bank at a incidence rate of 0.11 per 100,000 population.

While in 2015, 11 cases of extra-pulmonary tuberculosis were reported, including 6 cases in Gaza Strip and 5 cases in West Bank with a rate of 0.17 per 100,000 populations,

The coverage of neonatal vaccination against BCG has reached very high levels (almost full coverage).

Since 1996, MOH has implemented the DOTS system for the treatment of TB patients, which is based on direct surveillance and treatment of TB patients.

**Graph (63) Incidence Rate of Tuberculosis per 100,000 Pop., Palestine 2000- 2016**

#### **4. Tetanus:**

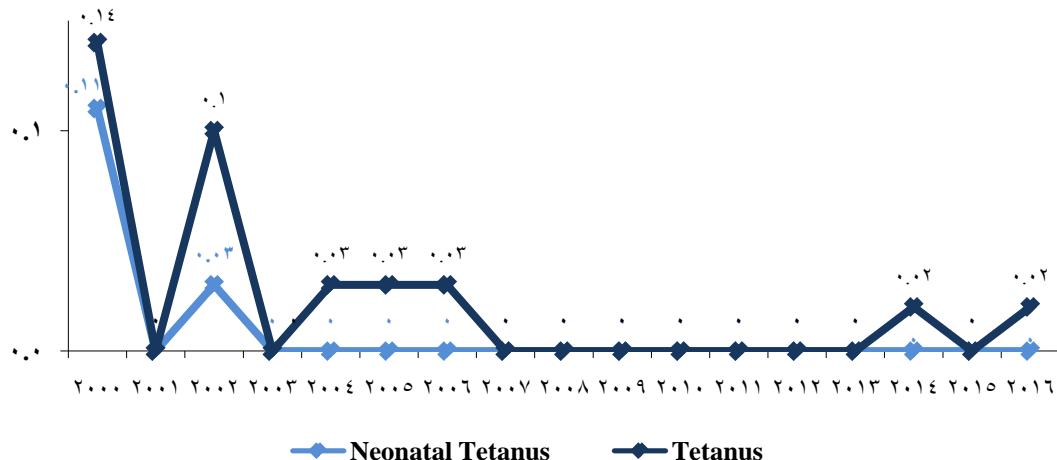

Tetanus and especially neonatal tetanus, remains a public health problem worldwide. However, in Palestine, no case has been reported among newborns in the past four years that reflects MoH success in controlling and eradicating neonatal tetanus, in addition to high coverage among pregnant women for vaccination (TT).

In 2009, one case of neonatal tetanus was recorded in the South Hebron district, while no cases were reported in 2010.

In 2011, two cases of tetanus were recorded, one case of neonatal tetanus was recorded in Bethlehem governorate and other the case was reported in an adult in Ramallah and Al Bireh governorate. In 2012 and 2013, no cases were reported at all. In 2014, only one case was reported in Nablus, and in 2015 no cases were reported. In 2016, one case among an adult in Nablus governorate was reported.

WHO strategy for the elimination of neonatal tetanus has aimed at having an annual incidence rate less than 1\1000 live births in each region, this goal has been achieved by Palestine for the last ten years.

**Graph (64) Incidence Rate of Tetanus per 100,000 Pop., Palestine 2000- 2016**

#### **5. Mumps:**

In December 2003, there was a significant outbreak of mumps in Nablus governorate, affecting mainly children under the age of 15, with more than 4,000 cases were registered among refugee and non-refugee children.

In addition, during the months of April and May 2004, the spread of the disease reached its peak and spread to other parts of West Bank, which required the implementation of a national campaign against measles and rubella. More than 600,000 people aged 6 years and university students were vaccinated with (MMR) which halted the epidemic in 2006. Thereafter, there was a significant decrease in the number of reported cases of mumps in West Bank.

260 cases were reported with an incidence rate of 7.8 cases per 100,000 populations with 192.8 cases per 100,000 in 2005, to continue to decline in 2007, where it reported 190 cases only.

The reported cases of the disease declined in 2008 to 105 cases, with 97 cases in West Bank and 8 in Gaza Strip. The incidence rate was 2.8 cases per 100,000 populations.

The number of cases of mumps increased slightly in 2009 to 118, with 84 cases in West Bank and 34 cases in Gaza Strip. The national incidence rate was 3 per 100,000 populations, in West Bank 3.4 per 100,000, and in Gaza Strip 2.3 per 100,000 populations.

In 2010, there was an increase in the number of cases of mumps in Gaza Strip, while there was a decrease in the number of cases in West Bank. The total the number of cases of mumps

reported in Palestine was 159 cases, including 70 cases in West Bank and 89 cases in Gaza Strip. The incidence level was 4.2 per 100,000 populations, in West Bank 3.1 per 100,000 and in Gaza Strip 5.8 per 100,000 populations.

In 2011, there were 153 cases of mumps, of which 62 cases were reported in West Bank and 91 in Gaza Strip. The incidence rate of infection was 3.7 per 100,000 populations, in West Bank 2.4 per 100,000 and in Gaza Strip 5.7 per 100,000 populations.

In 2012, there was another decline in the number of mumps cases in Gaza Strip and West Bank, where there were 89 cases of mumps reported in Palestine, 29 in West Bank and 60 in Gaza Strip. The incidence rate in West Bank was 1.1 per 100,000 and in Gaza Strip was 3.6 per 100,000 populations.

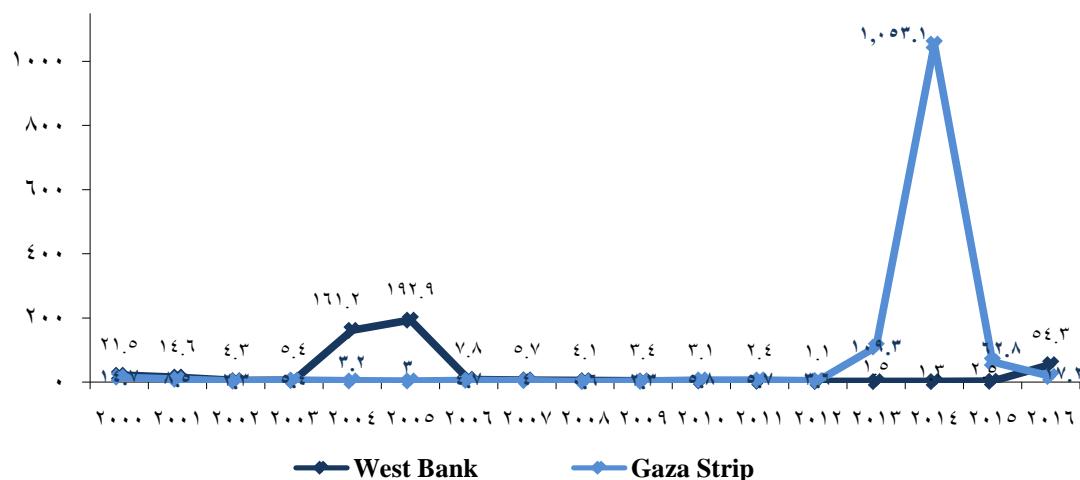

In 2013, there was a significant increase in the number of mumps cases in Gaza Strip. The number of mumps cases reported in Palestine was 1,931, In West Bank and 1,891 in Gaza Strip. The incidence rate at the national level was 43.1 per 10 In West Bank, 1.5 per 100,000 in Gaza Strip and 109.3 per 100,000 in Gaza Strip.

In 2014, there was a significant increase in the number of mumps cases in Gaza Strip to mount up to 18,535 cases. The number of mumps cases reported in Palestine was 18,570, of which 35 were in West Bank, the incidence rate was 408.1 per 100,000 populations, in West Bank 1.3 per 100,000 and in Gaza Strip 1,053.1 per 100,000 populations.

In 2015, the number of mumps cases reported in Palestine was 1,214 cases, of which 71 were in West Bank and 1,143 in Gaza Strip. The incidence rate at national level was 25.9 per 100,000 populations, in West Bank 2.5 per 100,000 and in Gaza Strip 62.8 per 100,000 populations.

In 2016, there were 1,773 cases of mumps reported in Palestine, of which 1,449 cases in West Bank and 324 cases in Gaza Strip. The incidence rate was 39.0 per 100,000 populations, while in West Bank it was 54.3 per 100,000 populations, in Gaza Strip 17.2 per 100,000 populations.

#### **Graph (65) Incidence Rate of Mumps per 100,000 Pop., Palestine 2016**

## 6.1 Viral (Aseptic) Meningitis:

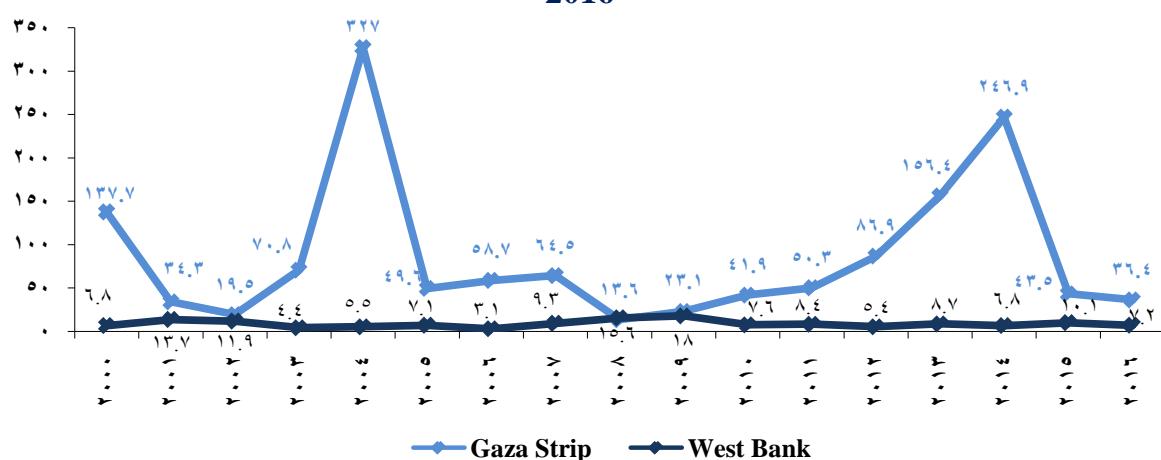

Viral meningitis is rarely serious, but patients need support and care, and may cause many viruses; such as Coxsackie's or intestinal virus.

Viral meningitis is one of the endemic diseases in Palestine with some seasonal variation, with the majority of cases, more than 72% in spring and summer seasons.

875 cases were recorded in Palestine in 2016, with incidence rate of 19.2 per 100,000 populations, of which 191 cases in West Bank with an incidence rate of 7.2 per 100,000 population and 684 cases in Gaza Strip with an incidence rate of 36.4 per 100,000 populations.

1,082 cases were recorded in Palestine in 2015; the incidence rate was 23.1 per 100,000 populations, of which 290 were in West Bank, with an incidence rate of 10.1 per 100,000 populations and 792 cases in Gaza Strip with an incidence rate of 43.5 per 100,000 populations.

**Graph (66) Incidence Rate of Viral Meningitis per 100,000 Pop., Palestine 2000-2016**

## 6.2 Bacterial Meningitis:

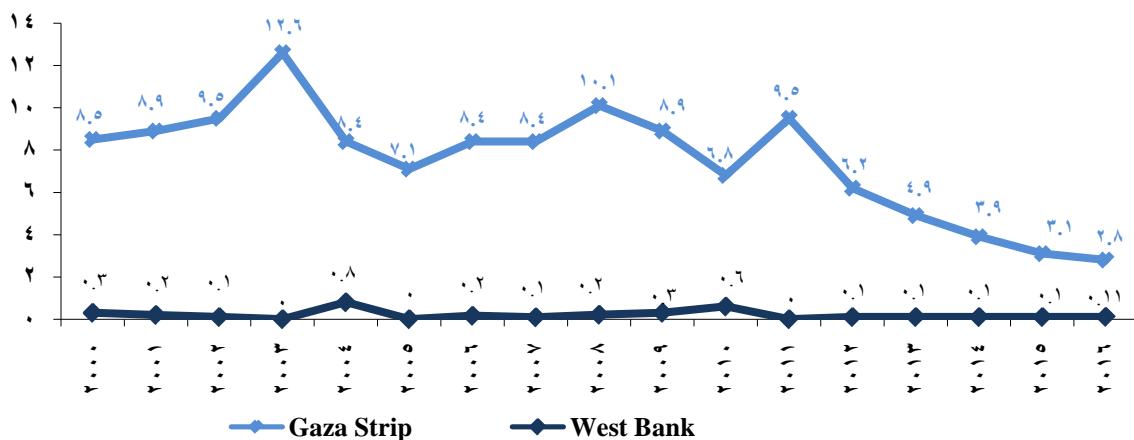

Bacterial meningitis is caused by different types of bacteria (Haemophilus Influenza type B, Neiseria meningitidis, Streptococcus pneumonia, and other types of bacteria)

## 6.3 Meningococcal Meningitis:

This type of meningitis is one of the most important infectious diseases known to humans. In 2016, there was a decrease in the number of reported cases, where 56 cases were reported with an incidence rate of 1.2 per 100,000 populations in Palestine, of which 3 cases in West Bank with an incidence rate of 0.11 per 100,000 of the population and 53 in Gaza Strip with an incidence rate of 2.8 per 100,000 population.

The number of reported cases in 2015 was 60, with an incidence rate of 1.3 per 100,000 populations, of which 3 were in West Bank at an incidence rate of 0.1 per 100,000 population, one in southern Hebron, two in Hebron and 57 in GS at an incidence rate of 3.1 per 100,000 populations.

**Graph (67) Incidence Rate of Meningococcal Meningitis per 100,000 Pop., Palestine 2000- 2016**

#### 6.4 Haemophilus Influenza type b Meningitis:

Infection is caused by Haemophilus Influenza type b (Hib) which causes meningitis, that is responsible for high rates of morbidity and mortality among children worldwide. It is called child bacterial Meningitis.

As a result of MoH immunization policy, no cases were recorded in 2014 and 2015. In 2016, two cases were reported and they were in Ramallah & Al Bireh and North Gaza governorates, with an incidence rate of 0.04 per 100,000 populations.

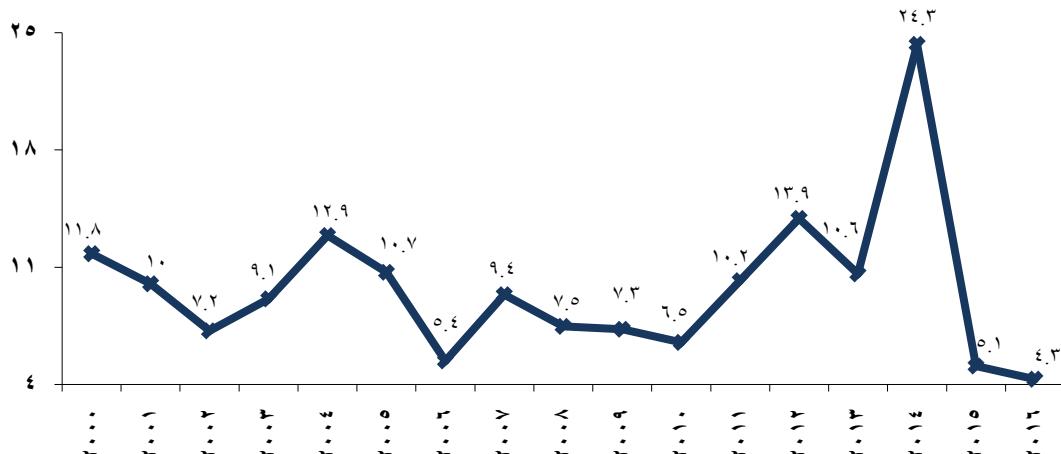

#### 6.5 Other types of Bacterial Meningitis:

Various types of bacteria, especially Streptococcus pneumonia, cause inflammation of the meningitis in Palestine.

In 2016, the reported cases decreased to 197 cases with an incidence rate of 4.3 per 100,000 populations. The reported cases in West Bank were 89 cases with an incidence rate of 3.3 per 100,000 and in GS 108 cases with an incidence rate of 5.7 per 100,000 populations.

240 cases were reported in 2015, with an incidence rate of 5.1 per 100,000 populations. The number of reported cases in West Bank was 105, with an incidence rate of 3.7 per 100,000, and 135 in the Gaza Strip with an incidence rate of 7.4 per 100,000 populations.

**Graph (68) Incidence Rate of Other Bacterial Meningitis per 100,000 Pop., Palestine 2000- 2016**

## **7. Viral hepatitis infections:**

Viral hepatitis A, B, C is one of the major public health problems in the world.

### **7.1 Viral Hepatitis A:**

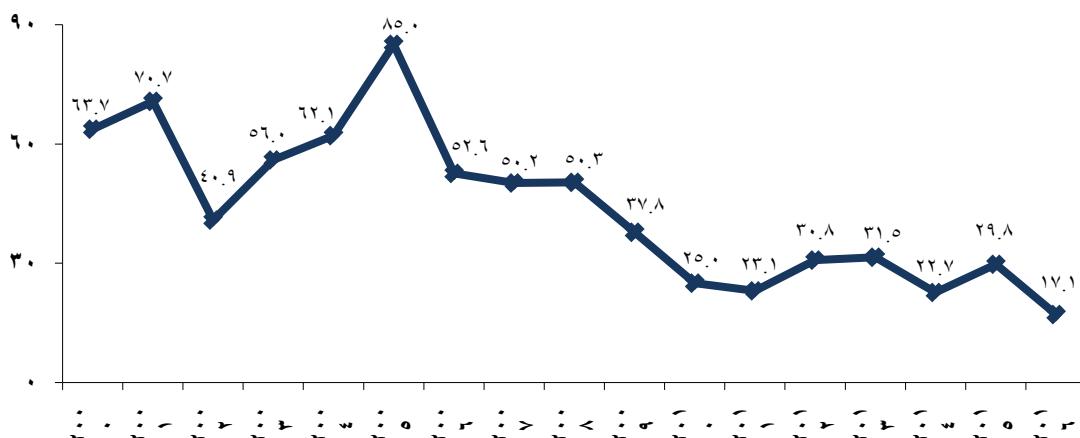

Viral hepatitis A is considered as one of the most common diseases and a major cause of viral hepatitis in the world with a direct correlation with age.

In 2016, there was a decrease in the number of cases reported, 780 cases of viral hepatitis A were reported with an incidence rate of 17.1 per 100,000 populations, of which 313 cases in West Bank with an incidence rate of 11.7 per 100,000 populations and 467 cases in Gaza strip with an incidence rate of 24.8 per 100,000.

In 2015, 1,397 cases of hepatitis A were reported with an incidence rate of 29.8 per 100,000 populations, of which 481 cases in West Bank at an incidence rate of 16.8 per 100,000 population and 916 cases in Gaza Strip at an incidence rate of 50.3 per 100,000.

Most cases of viral hepatitis A occur in early childhood and are asymptomatic.

**Graph (69) Incidence Rate of Viral hepatitis A per 100,000 Pop., Palestine 2000-2016**

### **7.2 Viral Hepatitis B:**

Viral Hepatitis B is a major health problem in the Middle East. In Palestine, the incidence rate of hepatitis B cases ranged from 11-15 per 100,000 in the period 1990-1994. From 1995 to 1999, the incidence rate was 5-9 per 100,000 populations and declined to 3 per 100,000 populations in 2000.

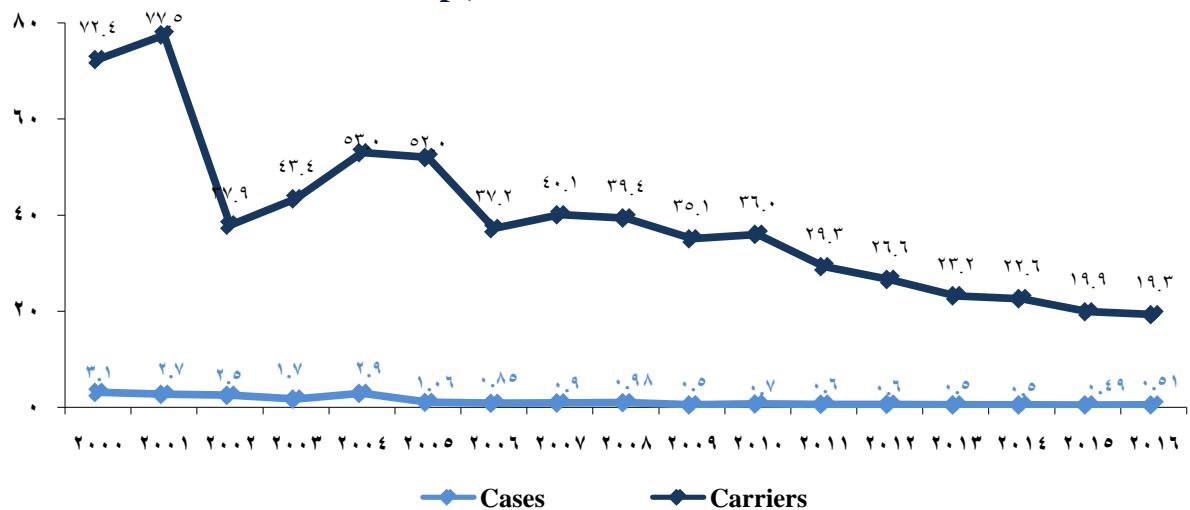

In 2016, 23 cases were reported with an incidence rate of 0.51 per 100,000 populations, of which 22 cases in West Bank at an incidence rate of 0.82 per 100,000 and one case was reported in Gaza Strip in Khan Yunis governorate at a rate of 0.05 per 100,000 populations.

The number of carriers reported with the hepatitis B virus was 904 cases with an incidence rate of 19.9 per 100,000 populations, of which 613 carriers in West Bank at an incidence rate of 23.0 per 100,000 population and 291 carriers in Gaza Strip at a rate of 15.5 per 100,000 populations.

In 2015, 23 cases were recorded, with an incidence rate of 0.49 per 100,000 populations, of which 16 cases in West Bank with an incidence rate of 0.56 per 100,000, and in Gaza Strip, 7 cases with an incidence rate of 0.38 per 100,000 populations.

The number of carrier reported in the same year with the hepatitis B virus was 931 carriers with incidence rate of 19.9 per 100,000 populations, of which 658 carriers in West Bank at an incidence rate of 23.0 per 100,000 populations and 273 carriers in Gaza Strip at an incidence rate of 15.0 per 100,000 populations.

**Graph (70) Incidence Rate of Cases & Carriers of Viral Hepatitis B per 100,000 Pop., Palestine 2000- 2016**

### 7.3 Viral Hepatitis C:

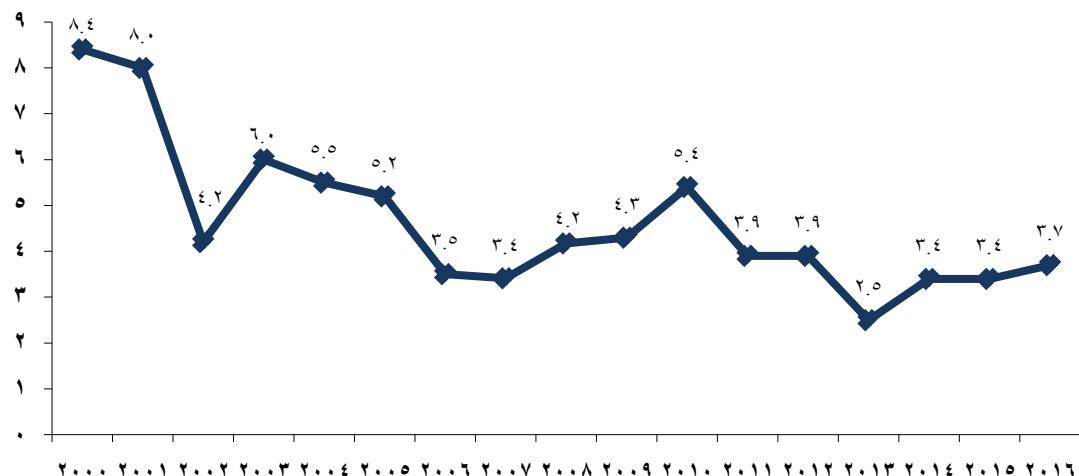

Hepatitis C has emerged as a serious public health problem in the world since 1990. WHO estimates that 3% of the world population is infected with hepatitis C and that 80% of the cases develop into chronic inflammation that can lead to cirrhosis and liver cancer.

In Palestine, epidemiological surveillance of viral hepatitis C began in 1994. The incidence of hepatitis and virus carriers ranged from 3-9 per 100,000 in the period 1996-1999 to 8 per 100,000 between 2000 and 2001. In 2002 it decreased to 4.2 per 100,000 populations, but it started to rise in 2003, with an incidence rate of 6 per 100,000 populations.

In 2016, there were no cases reported, but 167 carriers of viral hepatitis C was reported with an incidence rate of 3.7 per 100,000 populations, of which 97 carriers in West Bank at incidence rate of 3.6 per 100,000 and 70 cases in Gaza Strip at incidence rate of 3.7 per 100,000 populations.

In 2015, there were three cases of the disease was reported, two cases in West Bank and one case in Gaza Strip, and 160 carrier of viral hepatitis C with an incidence rate of 3.4 per 100,000 populations, of which 111 cases in West Bank at 3.9 per 100,000 populations And 49 cases in Gaza Strip at incidence rate of 2.7 per 100,000 populations.

**Graph (71) Incidence Rate of Viral Hepatitis C per 100,000 Pop., Palestine 2000- 2016**

## **8. Brucellosis:**

Brucellosis is one of the major endemic diseases in Palestine, with an incidence rate of 32.4 per 100,000 in 1998, one of the highest in the Mediterranean. In 1998, a disease control program was implemented in collaboration with WHO and UNDP.

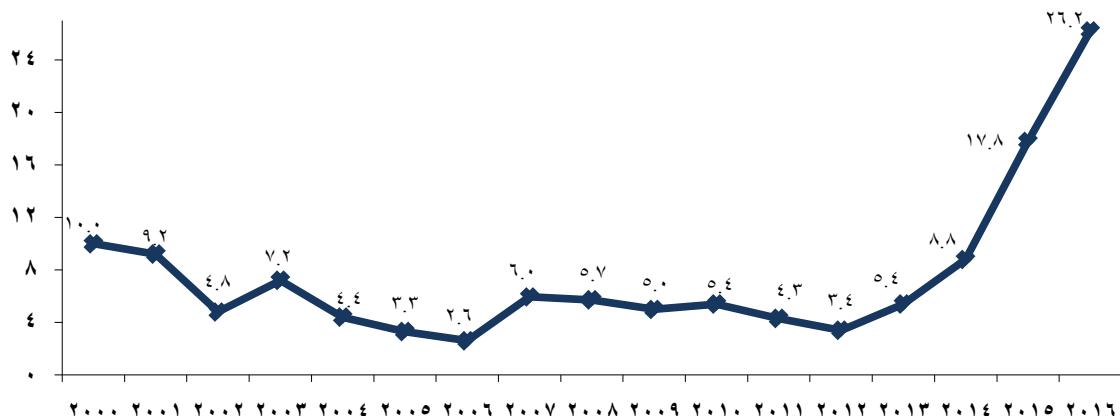

In Palestine, the cause of this disease (*Brucella melitensis*) is mainly found among sheep and goats. There is a seasonal trend among the annual cases, 60% of cases are recorded in the months of April through September.

Since 2000, there has been a general decline in the incidence rate of Brucellosis, reaching to 10 per 100,000 populations. In 2007, 85% of the total nationally reported cases were in Hebron governorate.

In 2015, the number of reported cases in Palestine was 833 cases with a disease incidence rate of 17.8 per 100,000 populations. There was an increase in the number of reported cases in West Bank which was 820 cases with an incidence rate of 28.6 per 100,000 populations; the incidence rate in Gaza Strip was 0.71 per 100,000 populations.

In 2016, there was another increase in the number of reported cases in West Bank. The number of reported cases in Palestine was 1,191 cases with a disease incidence rate of 26.2 per 100,000 populations. 1,187 cases were reported in West Bank with an incidence rate of 44.4 per 100,000 populations and 4 reported cases in Gaza Strip with an incidence rate of 0.2 per 100,000 populations.

**Graph (72) Distribution of Incidence Rate of Brucellosis per 100,000 Pop., Palestine 2000- 2016**

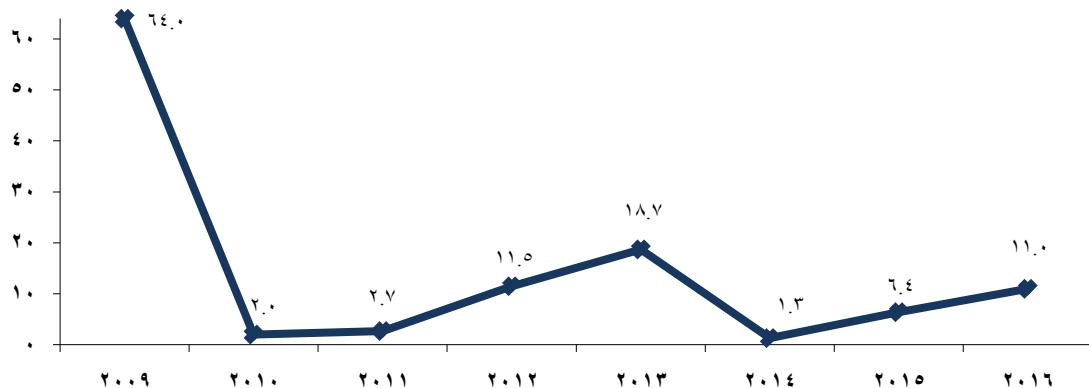

## **9. H1N1:**

In 2016, the number of reported cases of H1N1 was 449, with an incidence rate of 11 per 100,000 populations. In West Bank, the incidence rate was 18.7 per 100,000 populations, and no cases were reported in Gaza Strip.

In 2015, the total number of reported cases was 301 cases, with an incidence rate of 6.4 per 100,000 populations. All cases were also in West Bank with an incidence rate of 10.5 per 100,000 populations, and no cases were reported in Gaza Strip.

### Graph (73) Distribution of Incidence Rate of H1N1 per 100,000 Pop., Palestine 2009- 2016

#### 10. ADIS / HIV:

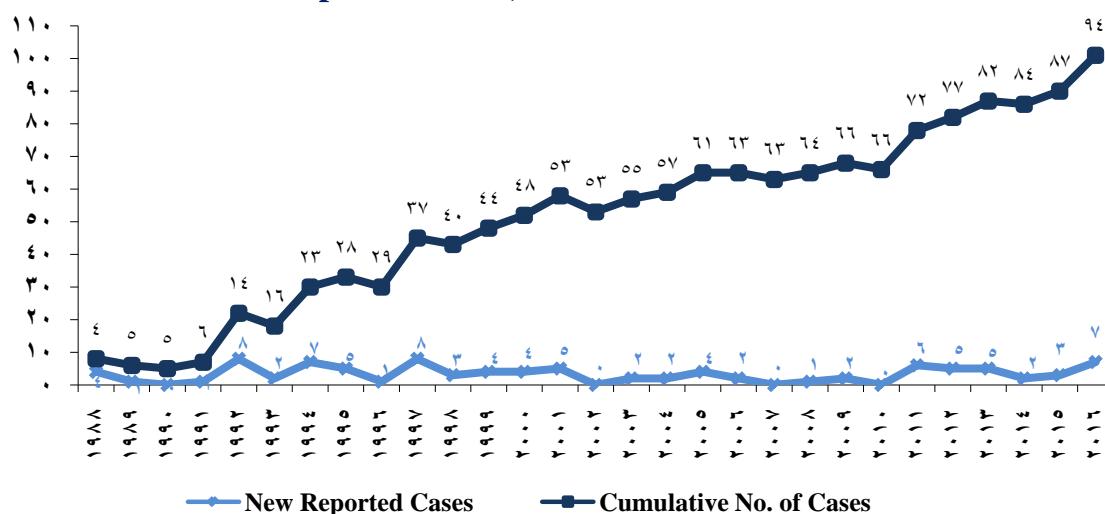

Although the spread of AIDS is increasing in most countries of the world, Palestine, like other Arab and Mediterranean countries, has low HIV\ AIDS infection rate. HIV\ AIDS cases have been reported in Palestine since 1988. The cumulative number of HIV\ AIDS reported cases up to 2016 was 94 cases, of which 74 were AIDS cases and 20 cases were HIV positive.

**Table (16) Cumulative Number of HIV\ ADIS Cases, Palestine 1988- 2016**

HIV or AIDS	No.	%
HIV	20	21.3%
AIDS	74	78.7%
Total	94	100%

Most of the reported cases were among males; 76 cases out of 94 registered cases, which accounted to 80.9% of the total cases recorded.

### 11. Epidemiology of Sexual Transmitted Diseases (STDs) in Palestine:

Similar to other neighboring Arab countries, MoH faces several challenges to combat sexual transmitted diseases (STDs), including behavioral changes and privacy aspects, social stigma, difficulty to follow-up cases, treatment and reluctance of people to access clinics and centers to seek services for such diseases.

These diseases are diagnosed and recorded according to etiology and syndromic approach, according to WHO recommendations.

#### 1. Etiological Diagnosis:

During the year 2016, there were 20,441 cases among females in West Bank, where the incidence rate of infection was 1,556.3 per 100,000 of the total number of women in West Bank, diagnosed according to the causes. The number of registered cases among males was 548 with an incidence rate of 40.4 per 100, 000 male.

#### 2. Syndromic Diagnosis:

During the year 2016, 40,124 new female cases of sexually transmitted diseases were recorded in West Bank, which were diagnosed using syndromic approach with an incidence

rate of infection of 3,054.9 per 100,000 of women in West Bank. On the other hand, the number of cases among males was 391 with an incidence rate of 28.8 per 100,000 males. Epidemiological surveillance system of sexual transmitted diseases in Palestine is still in need of further improvement. In this regard, there is a need for more community awareness and the development of the capacities of the human resources working in this field, especially in Gaza Strip.

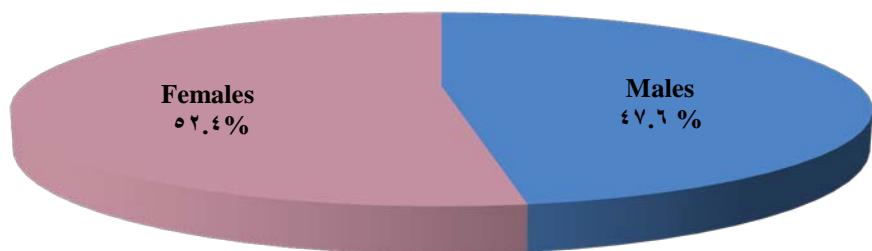

### **3.1.2 Non Communicable Diseases (NCDs):**

#### **3.1.2.1 Cancer:**

In 2016, the total number of new reported cancer cases in West Bank was 2,536, with an increase of 5.7% from the 2,400 new reported cases in 2015. In 2016, the incidence rate of cancer in West Bank was 86.4 new cases per 100,000 populations.

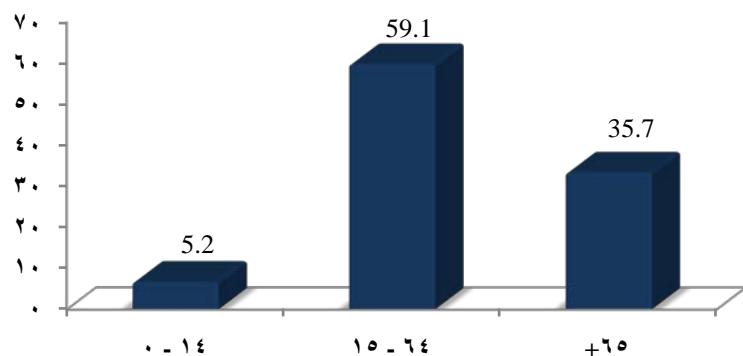

The number of new reported cases in females was 1,330, which is 52.4% of new reported cancer cases, and 1,206 among males with 47.6% of new reported cancer cases.

**Graph (77) Proportional Distribution of Reported Cancer Cases by sex, West Bank, Palestine 2016**

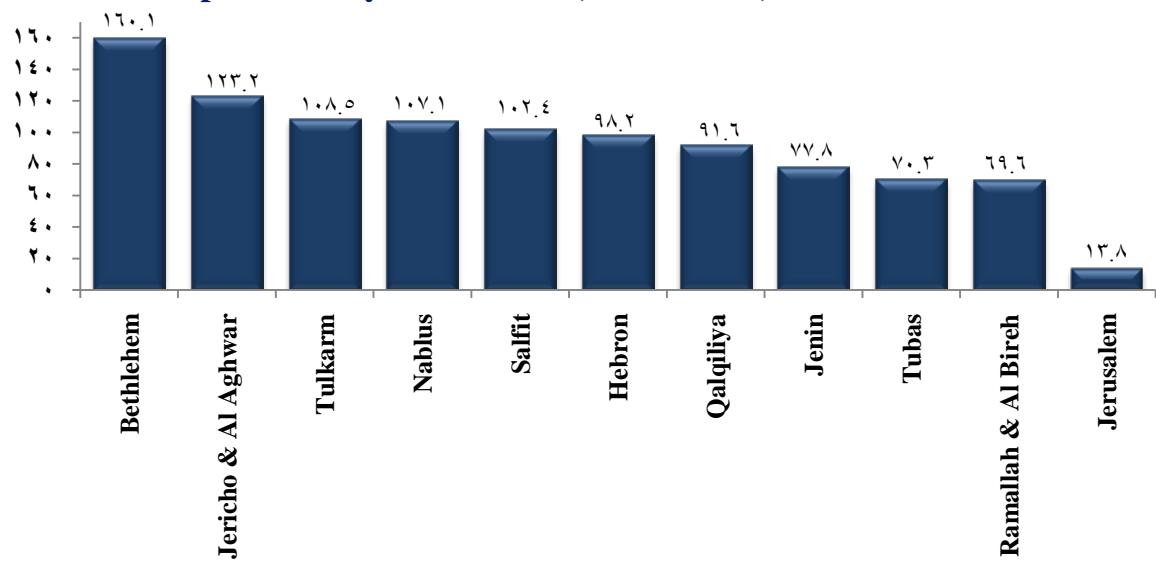

There were 906 cancer reported cases in the age group above 65 years, which is 35.7% of the total number of reported cases. It worth minting, that the proportion of this age group is only 2.9% of total populations. In addition, 1499 reported cancer cases were reported in the age group of 15-64 which counts for 59.1% of the reported cancer cases. Moreover, 131 cases were reported or under-15 year old group, which is 5.2% of all reported cases, knowing that this age group is 39.2% of the total population.

**Graph (78) Proportional Distribution of Cancer Reported Cases by Age Group, West Bank, Palestine 2016**

The geographical distribution of reported cancer cases shows that Bethlehem governorate had the highest incidence rate of cancer cases that reached 160.1 per 100,000 populations. Jericho and Al Aghwar governorate become second with an incidence rate of 123.2 per 100,000 population, followed by Tulkarm with an incidence rate of 108.5 100,000 populations.

**Graph (79) Distribution of Reported Cancer Incidence Rate per 100,000 Populations by Governorate, West Bank, Palestine 2016**

#### Distribution of Reported Cancer Cases in West Bank:

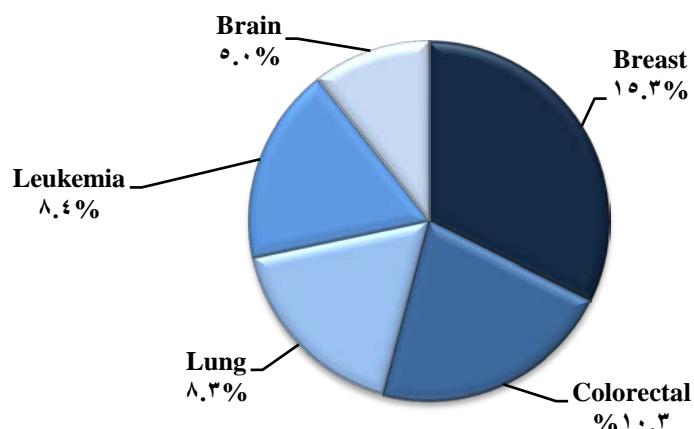

In 2016, breast cancer ranked the first type of cancer in the West Bank among all type of cancer, with 388 cases this is to 15.3% of total reported cancer cases. In addition, breast cancer was the first type of cancer reported among females where it accounted for 28.9% of the total reported cancer cases among Palestinian female.

The rafter, colorectal cancer ranked the second with 262 cases, which accounts to 10.3% of all reported cancer cases.

In addition, leukemia ranked the third among reported cancer cases, with 214 new cases, which is 8.4% of the total reported cancer cases.

Lung cancer was ranked the first among reported cancer cases among males which accounts for 13.6% of all reported cancer cases among Palestinian males in West Bank.

**Graph (80) Proportional Distribution of Cancer Reported Cases by Site, West Bank, Palestine 2016**

### 3.1.2.2 Diabetes Mellitus:

#### 1. New Diabetic Cases Reported in MoH PMC Clinics:

In 2016, the new reported diabetes Mellitus cases in MoH PHC diabetes clinics in West Bank were 5,148 cases, distributed to 2,370 cases among males with an incidence rate of 174.6 per 100,000 populations and 2,778 among females with an incidence rate of 211.5 per 100,000 populations.

#### 2. Treatment of Diabetes in MoH PHC Clinics:

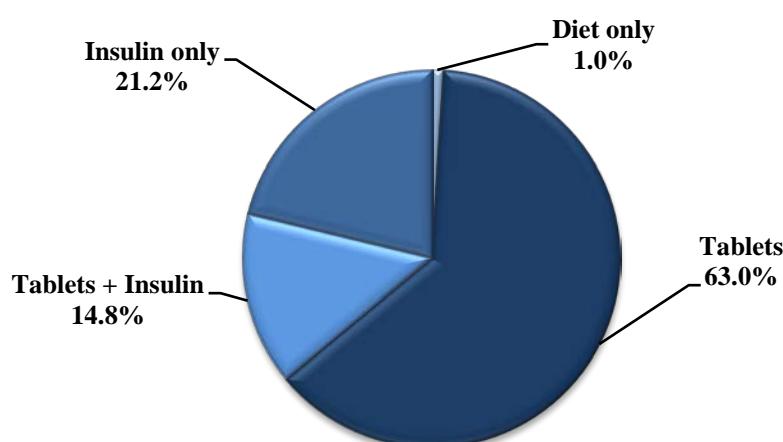

In 2016, 21.2% of diabetes clinic attendees were treated with insulin, compared with 20.0% in 2015 and 21.1% in 2014.

In 2016, 14.8% of diabetes mellitus cases were treated with both tablets and insulin compared to 13.1% in 2015 and 10.9% in 2014.

63.0% of patients were treated with tablets, compared with 61.2% in 2015 and 62.8% in 2014.

In 2016 only 1.0% of diabetic patients were treated by diet only, compared to 0.5% in 2015 and 0.4% in 2014.

**Graph (81) Proportional Distribution of Diabetes Mellitus Treatment in PHC Clinics, MoH, West Bank, Palestine 2016**

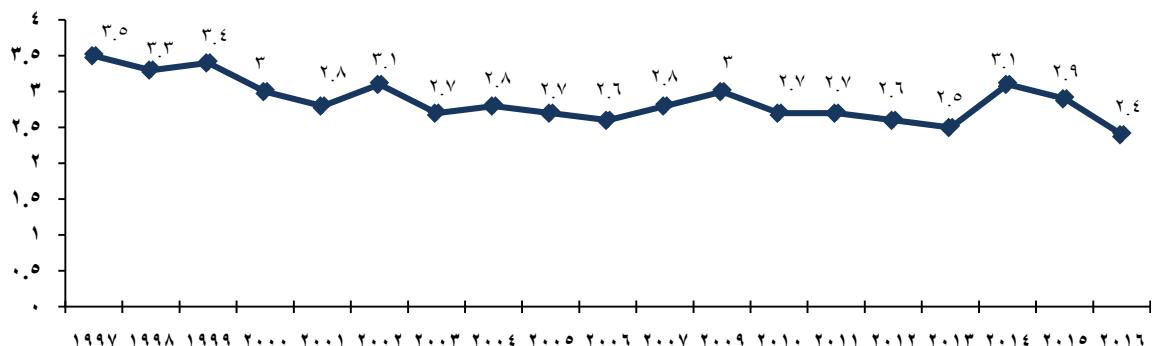

## **3.2 Mortality:**

### **3.2.1 Crude Death Rate in Palestine:**

In 2016, reported crude mortality rate in Palestine was 2.4 cases per 1,000 populations, 2.7 cases per 1,000 populations in West Bank and 2.0 cases per 1,000 populations in Gaza Strip. In 2015, it was 2.9 per 1,000 populations in Palestine; with 3.0 cases per 1000 populations in West Bank and 2.7 per 1,000 of populations in Gaza Strip.

**Graph (82) Crude Mortality Rate per 1,000 Populations, Palestine 1997- 2016**

### **3.2.2 Number of Deaths in Palestine in 2016:**

In 2016, the total number of reported deaths in Palestine was 10,940, of which 7,177 were in West Bank, which is 65.6% of total deaths in Palestine.

In 2015, the total number of reported deaths was 12,690, of which 7,714 were in West Bank, which was 60.8% of total deaths in Palestine.

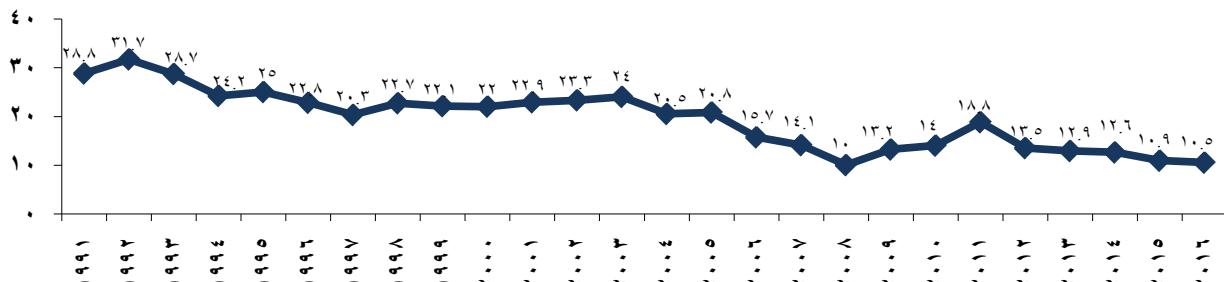

### **3.2.3 Major Causes of Death in Palestine in 2016:**

- Cardiovascular diseases remains the leading cause of death among Palestinians, accounting for 30.6% of deaths recorded in 2016.
- Cancer was the second leading cause of death, with 14.0% of deaths.
- Cerebrovascular diseases were the third leading cause of death, with 12.8% of causes leading to death.
- Conditions in the perinatal period were the fourth leading cause of death 8.0%. In addition complications of diabetes came in the fourth rank with a proportion of 8.0%.
- Respiratory diseases ranked the sixth with 6.3%.
- While accidents of all kinds ranked the seventh among the leading causes of death with 5.3% of deaths.
- Congenital anomalies were the eighth leading cause of death, accounting for 2.7%. Also in the eighth place came the infectious diseases, especially septicaemia at the same rate of 2.7%.
- In the tenth place digestive diseases accounted for 2.4% of total reported deaths in 2016.

### **3.2.4 Reported Infant Mortality in Palestine 2016:**

Reported infant mortality rate in Palestine in 2016 was 10.5 per 1,000 live births. In 2015, the infant mortality rate was 10.9 per 1,000 live births.

**Graph (83) Reported Infant Mortality Rate per 1,000 Live Births, Palestine 1991-2016**

### 3.2.5 Under Five Children Reported Mortality Rate:

In 2016, under five children reported mortality rate was 12.2 deaths per 1,000 births. In 2015, under five children reported mortality rate was 13.9 deaths per 1,000 live births in Palestine.

### 3.2.6 Cancer Mortality in Palestine 2016:

In 2016, in Palestine cancer deaths were 14.0% of the total reported deaths with 53.8% of deaths among males, and 46.2% among female.

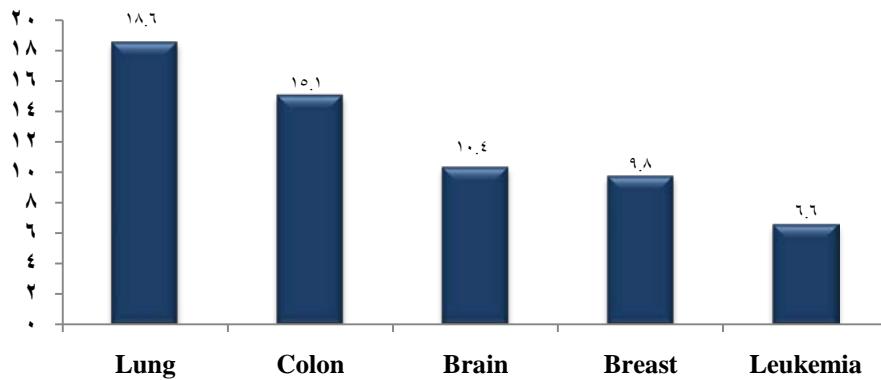

The first cause of cancer deaths in 2016 was lung cancer, 18.6% of all cancer-related deaths, followed by colon cancer by 15.1%, then brain cancer by 10.4%, and breast cancer by 9.8% then leukemia by 6.6%.

In cancer causing deaths among males, lung cancer was the leading cause of death, followed by colon cancer.

In females, breast cancer ranked the first as the leading cause of death followed by colon cancer.

In 2015, the cancer mortality rate was 13.8% of all deaths recorded in Palestine.

**Graph (84) Proportional Distribution of the most Reported Cancer Deaths of all Reported Cancer Deaths, Palestine 2016**

### 3.2.7 Reported Diabetes Mellitus Deaths:

In 2016, there were 576 deaths due to complications of diabetes, with mortality rate of 21.6 per 100,000 populations in West Bank, with 287 deaths among males, 21.2 cases per 100,000 males and 289 deaths among females, 22.0 cases Per 100,000 females in West Bank.

869 deaths were recorded in 2015 in Palestine due to complications of diabetes, at a mortality rate of 19.7 per 100,000 populations, with a mortality rate of 17.3 deaths per 100,000 males. The female rate was 19.9 deaths per 100,000 females in Palestine.

**Table (20) Distribution of Diabetes Mortality Incidence Rate per 100,000 Populations by Sex & Age Group, West Bank, Palestine 2016**

Item	Age Group				Sex		Total
	0 - 4	5 - 19	20- 59	60+	Female	Male	
No. of Reported Deaths	0	1	105	470	289	287	576
IR \ 100,000 Pop.	0.0	0.0	6.3	17.6	22.0	21.2	21.6

### 3.2.8 Maternal Mortality in 2016:

These are the deaths of a woman while pregnant or within 42 days of termination of pregnancy. This indicator is linked to the sustainable development goals to reduce maternal mortality. Active monitoring of maternal mortality in Palestine has been implemented since 2009.

In 2016, the number of maternal deaths recorded in Palestine were 18 cases, including 9 in West Bank and 9 in Gaza Strip.

Reported maternal mortality rate (MMR) in Palestine in 2016 was 13.8 per 100,000 live births; 12.4 per 100,000 live births in West Bank and 15.5 per 100,000 live births in Gaza Strip.

In 2015, 20 cases of maternal deaths were recorded, of which 5 in West Bank and 15 in Gaza Strip. The maternal mortality rate was 15.7 deaths per 100,000 live births. The maternal mortality rate in West Bank was 7.2 per 100,000 Live births and in Gaza Strip 25.9 per 100,000 live births.

**Table (21) Distribution of Number of Reported Maternal Mortality by Governorate, Palestine 2016**

West Bank	Jenin	Tubas	Tulkarm	Nablus	Qalqiliya	Salfit	Ramallah & Al Bireh	Jericho & Al Aghwar	Jerusalem	Bethlehem	Hebron
9	1				1	2		1	1		3

Gaza Strip	North Gaza	Gaza	Dair Albalah	Khan Yunis	Rafah
9					

### 3.2.9 Near-Miss of Maternal Mortality:

In order to monitor the success stories achieved by MoH hospitals through the medical staff working within it to reduce maternal mortality and treatment of cases that could have led to such deaths, and within the recommendations of WHO, MoH through the General Department for Health and Development of Women in collaboration with PHIC to establish a Near-Miss maternal mortality monitoring system.

In 2016, the number of reported Near-miss was 25 cases in most hospitals of MoH, but unfortunately, the data in some cases incomplete and does not to be considered a Near-Miss case.

**Table (22) Distribution of Number of Near-Miss Reported Cases by Hospital,  
WEST Bank, Palestine 2016**

Hospital	No. of Reported Near-Miss Cases	%
Jenin (Khaleel Sulaiman)	2	8%
Tulkarm (Thabit Thabit)	4	16%
Rafidia\ Nablus	3	12%
Qalqiliya (Darweesh Nazal)	1	4%
Salfit (Yasser Arafat)	2	8%
Palestine Medical Complex (PMC)	6	24%
Beit Jala (Al Housein)	1	4%
Hebron (Alia)	4	16%
Mohammad Ali Al Mohtaseb	2	8%
<b>Total</b>	<b>25</b>	<b>100%</b>

11Near-Miss cases were in 30-39 age group, 3 cases in 40-49 age group and 2 cases with unknown age.

Six cases complained from severe haemorrhage when admitted to the hospital or less than 12 hours of hospitalization, and 3 cases having haemorrhage after 12 hours of admissions.

9 cases suffered from severe preeclampsia, and two cases had ruptured uterus, while no specific diagnosis for five reported cases.

Three cases were had normal vaginal delivery, and 21 cases had caesarean section (CS), including 4 cases with hysterectomy, and one case without information about the way of delivery.

The length of stay in the hospital ranged from two to twelve days, while the period of stay of five cases was not determined.

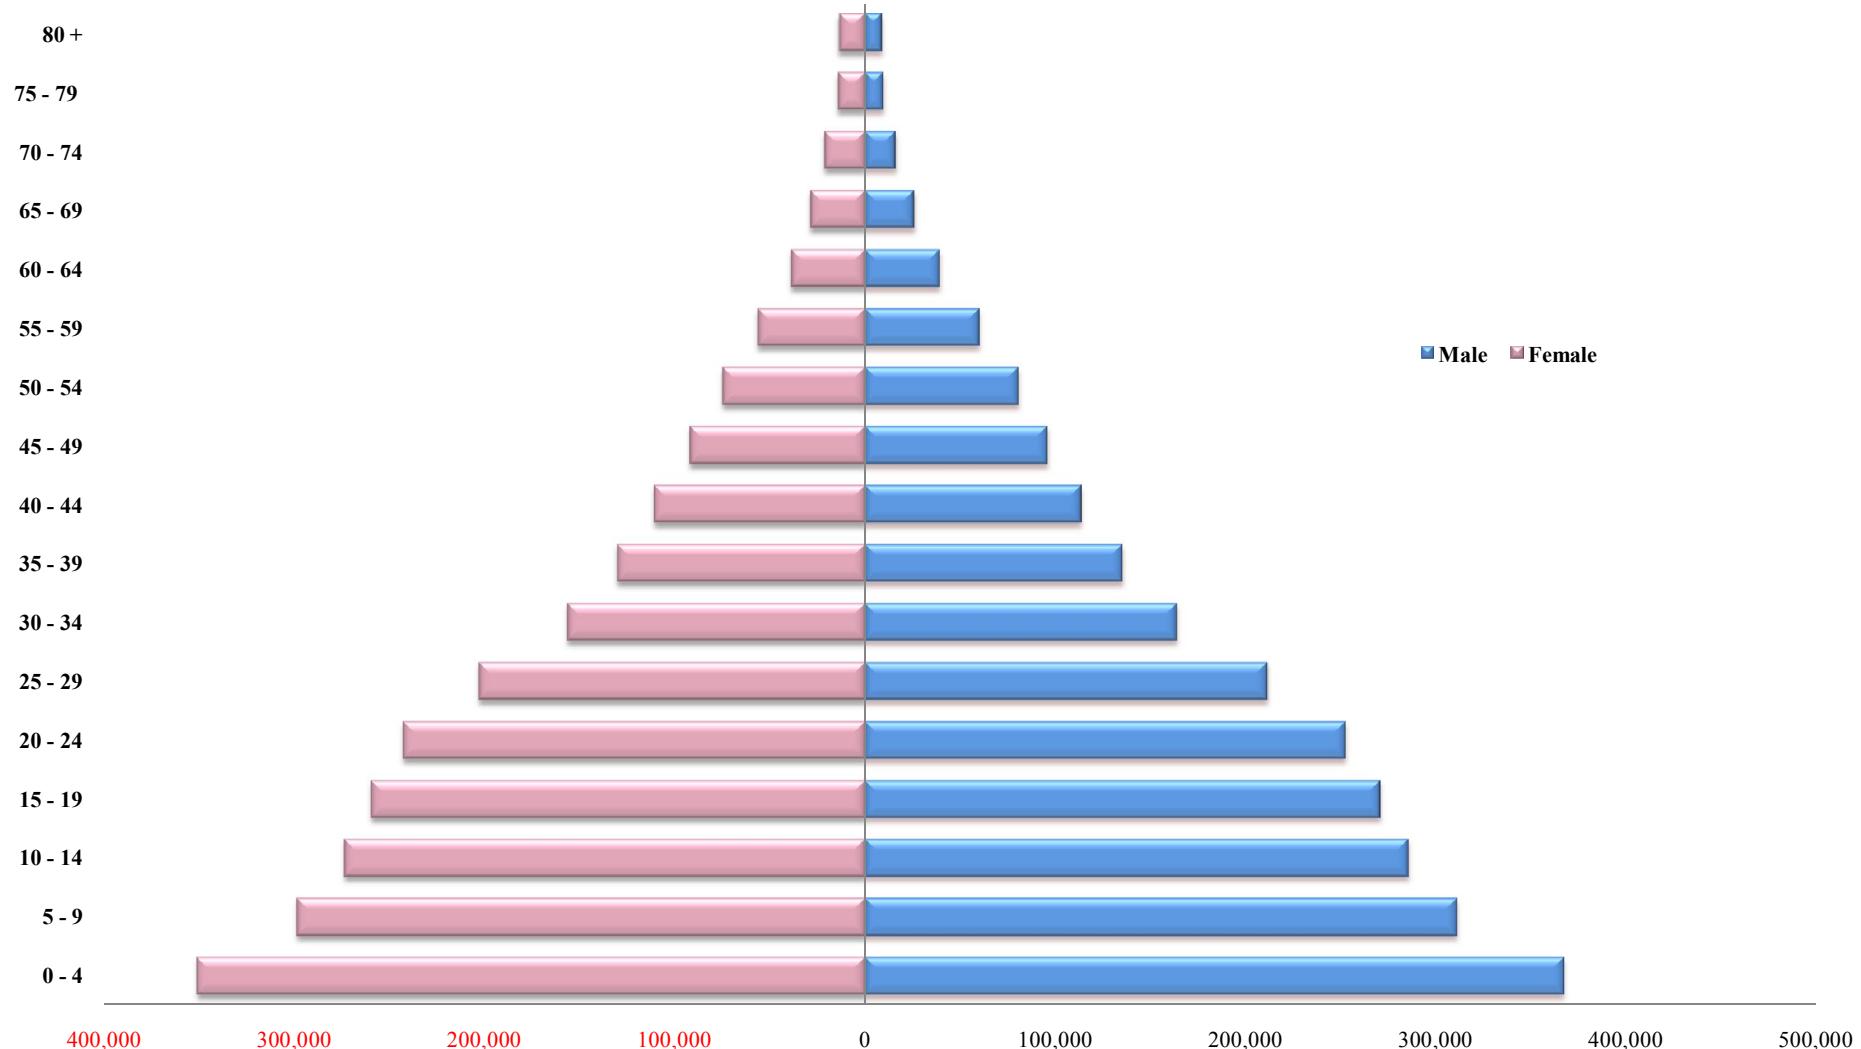

### **3.2.10 Deaths in Reproductive Age Women in 2016:**

The total reported number of mortality among reproductive age women (15-49 years) in West Bank in 2016 was 275 deaths, out of which 28 deaths in the age group 15-19 years, which is accounted for 10.2% of all deaths among reproductive age women. While the age group of 20-29, there were 66 deaths accounted for 24.0% of the total mortality of reproductive age women.

Among the 30-39 age group, 57 deaths occurred in 20.7% of the total deaths of reproductive age women. While the age group of 40 to 49 years, there were 124 reported deaths 45.1% of all deaths of reproductive age women.
